- **Visitor Details Entry**

- Security guard/reception can record visitor's full name, contact number, company/organization, and purpose of visit.

- **Visitor ID Proof Collection**
 - Capture ID proof details such as Aadhaar, PAN, Passport, Driving License, or any valid government-issued ID.
- **Host/Staff Selection**
 - Choose the host/staff member whom the visitor wishes to meet (with department details, if required).
- **Appointment Date & Time**
 - Schedule the exact date and time of the meeting request to avoid overlaps or unauthorized entry.
- **Visitor Photograph**
 - Capture or upload visitor photo instantly for better identification and record-keeping.
- **Visitor Signature**
 - Collect visitor's digital signature at the gate or reception as part of entry verification.
- **Approval Request Notification**
 - Automatically send appointment requests to the host/staff for approval or rejection via system notification/SMS/email.
- **Badge/Pass Generation**
 - Once approved, system generates a digital/printable visitor pass with QR/barcode for seamless entry.
- **Special Instructions/Notes**
 - Option to add notes like "Requires escort", "Car parking needed", or "High-priority guest."
- **Secure Record Management**
 - All appointment requests (approved/denied) are stored in the system for future reference, reporting, and audits.

Clear

- **Visitor Profile Creation**
 - Save complete visitor details including full name, contact number, and purpose of visit.
- **Photo Capture & Storage**
 - Capture and store visitor's photograph for accurate identification and future reference.
- **ID Proof Management**
 - Record and maintain ID proof details (Aadhaar, Passport, Driving License, etc.) for each visitor.
- **Separate Visitor Records**
 - Maintain individual records for every visitor, avoiding duplication and ensuring easy search.
- **Quick Access & History Tracking**
 - Easily retrieve visitor details and view their past visit history for security and audit purposes.

- **Comprehensive Entry & Exit Records**

- Automatically logs visitor check-in and check-out time with exact date and duration of stay.

- **Host/Staff Meeting Details**

- Maintains record of which host/staff the visitor met, along with department information.

- **Visitor Pass Tracking**

- Links each log entry with the visitor pass/QR code for seamless monitoring.

- **Search & Filter Options**

- Quickly find past visitor logs by name, ID proof, date, or host for easy reference.

- **Export & Reporting**

- Generate daily, weekly, or monthly visitor log reports for security audits and management review.

From

Date And Time *

To

Date And Time *

- **Instant Notification to Host**
 - Hosts receive real-time alerts (system/SMS/email) when a new appointment request is created.
- **One-Click Approval or Rejection**
 - Host/Staff can easily accept or reject requests with a single click.
- **Reason/Remarks Option**
 - While rejecting, host can add remarks (e.g., not available, reschedule required).
- **Automatic Visitor Update**
 - Visitor (or guard) gets immediate confirmation of approval/rejection.
- **Auto Pass Generation on Approval**
 - If approved, a visitor pass/QR code is automatically generated for smooth entry.
- **Reschedule Option (optional)**
 - Host can propose a new time/date instead of outright rejection.
- **Secure Log Maintenance**
 - All accept/reject decisions are stored in the system for audit and reference.

- **Advance Appointment Scheduling**
 - Hosts or admins can pre-register visitor details before the actual visit.
- **Visitor Information Entry**
 - Record visitor's name, contact, company, ID proof, and purpose of visit in advance.
- **Pre-Approval by Host**
 - Host approves the appointment beforehand to speed up check-in at the gate.
- **Pre-Generated Visitor Pass**
 - System creates a digital/print pass or QR code that can be shared with the visitor.
- **Quick Check-In at Gate**
 - Visitor only needs to show the pre-approved pass/QR for instant entry, reducing wait time.
- **Reduced Manual Data Entry**
 - Guards don't need to re-enter visitor details; all data is already available in the system.
- **Enhanced Security & Accuracy**
 - Ensures only pre-approved visitors can access the premises, minimizing unauthorized entry.

- **Complete Visit Records**
 - Stores detailed logs of all past visits including visitor name, ID, photo, host, and purpose.
- **Check-In / Check-Out Tracking**
 - Maintains accurate entry and exit time for each visit.
- **Quick Search & Filters**
 - Easily find visitor history by name, date, ID proof, or host.
- **Repeat Visitor Identification**
 - Instantly recognize returning visitors with previous records and visit patterns.
- **Security & Audit Reports**
 - Generate visitor history reports for compliance, audits, and incident tracking.
- **Data Retention & Backup**
 - Ensures secure storage and backup of visitor records for long-term use.
- **Export & Sharing (optional)**
 - Export visitor history into Excel/PDF for management review or security teams.

- **Easy Date & Time Change**
 - Hosts can quickly modify the appointment schedule without creating a new request.
- **Visitor Notification**
 - Automatic alerts (SMS/email/system) sent to visitors regarding the updated date and time.
- **Approval Workflow**
 - The re-scheduled appointment is updated in the system and requires host confirmation if needed.
- **Automatic Pass Update**
 - Visitor pass/QR code gets regenerated with the new date and time to avoid confusion at entry.
- **Conflict-Free Scheduling**
 - System checks host availability to prevent overlapping appointments.
- **Complete Log Maintenance**
 - All reschedules are recorded in the visitor's history for security and audit purposes.
- **Convenience for Both Parties**
 - Saves time for host and visitor by eliminating the need to cancel and re-create appointments.
