1. MANAGEMENT SUMMARY

1.1 The Facility Management Suite

Indian Force Security Services (referred as IFSS hereafter) is looking for a Facility Management System to support its operations while enhancing productivity, safety, comfort, convenience, cost-effective and providing better service to its users.

In order to achieve this goal, we are proposing our **eFACiLiTY Facility Management Suite** of applications. By harnessing technology to improve the way the administration is run, IFSS can not only bring itself closer to its users and reduce costs, it will also stand as a leader in making use of the Internet to improve the lives of the people using IFSS facilities.

- ✓ Time and Attendance System
- ✓ Visitor Management System
- ✓ Human Resource Management System
- ✓ Payroll Management System
- ✓ Patrol Management System

SIERRA's eFACiLiTY FMS Suite is a complete, comprehensive and integrated application. Applications provided by SIERRA will form the basis of the administration's drive to improve levels of service to the users, employees and businesses in the Client sites and to reduce costs by eliminating internal inefficiencies. Therefore, your investment in SIERRA will enable the Client to move significantly closer to your goal in gaining internal efficiencies with Facilities management applications and evolving to being a truly 24 hour administration with the employees positioned at the heart of your organization.

You would find SIERRA the vendor that would partner with you to help you implement your strategy that would ensure you success, particularly in improving internal effectiveness, providing better service with SIERRA's complete solution and internet technology platform.

1.2 SIERRA Value Proposition – the competitive advantage

SIERRA solution offers numerous competitive advantages compared to any other vendor solution completeness.

- ✓ SIERRA's eFACiLiTY FMS Suite is the only complete set of applications that has inexpensive licensing options and run entirely on the internet, enabling you to cut costs across business intelligence, systems integration and facilities management functions.
- ✓ With SIERRA's eFACiLiTY FMS Suite, you can reap the benefits of open, integrated FMS applications. You can reduce cost and complexity by eliminating integrated applications effort on software interfacing, data translation, or integration.
- ✓ Technology superiority.
- ✓ Implement-able functionality – offers the ability to implement functionally rich SIERRA eFACiLiTY FMS suite as individual modules.
- ✓ Investment protection - Because SIERRA's software architecture is built on open, industry standards, you can leverage this investment across the enterprise. Whether you implement one or all of eFACiLiTY FMS Suite modules, build custom extensions, or integrate with industry applications, you can leverage your investment in SIERRA technology to save your company money.

1.3 Why SIERRA?

SIERRA has the best people to deliver the FMS applications.

- ✓ We have the experience to deliver. We have people with strong product knowledge. Our building and facilities services industry experience combined with our track record, especially in implementing our solutions at government and commercial buildings makes SIERRA a premier choice for implementing the FMS project for IFSS. We use our own product to implement solutions. We have the access to product information and we can provide very stable support mechanism.

eFACiLiTY is a top of the line FMS application.

- ✓ eFACiLiTY is the first and most comprehensive application covering all the above modules integrating seamlessly
- ✓ eFACiLiTY is built completely on the web based architecture
- ✓ eFACiLiTY FMS suite of applications are built on top of a technologically sound, robust and total solution, based on Microsoft's .NET Framework.
- ✓ eFACiLiTY can be completely customized to suit one's individual needs

SIERRA can grow with you into the future.

- ✓ With SIERRA's FMS leadership initiative, agencies small and large can achieve dramatic improvements in efficiency, service and value for building facilities management.
- ✓ By leveraging the Internet, building can connect citizens for expanded access, connect business for streamlined operations and connect employees for better service.
- ✓ SIERRA provides more compatibility and flexibility to support the diverse needs now and for the future.
- ✓ SIERRA enables use of cutting-edge web applications to reduce costs and increase competitiveness

SIERRA is the safe choice.

- ✓ With SIERRA's size, strong local support and proven products and experience, SIERRA is the safe choice for IFSS Facility management project.
- ✓ A stable and innovative company, SIERRA is a proven leader in the software marketplace.

1.4 About SIERRA ODC Private Limited

- ✓ We are a Software/IT Solutions company headquartered in India with offices in Malaysia, USA and UAE.
- ✓ SIERRA is an expert Mobile and Web Applications Development, Offshore Development Services, Software Support Services and end-to-end IT turnkey solutions to large and medium enterprises around the globe.
- ✓ SIERRA is a Microsoft Gold Partner and SAP Partner.
- ✓ Clients in India, USA, Malaysia, Singapore, Australia, Africa, Middle East and Europe
- ✓ SIERRA's 250+ team works implementing solutions for fortune 500 and government organizations. SIERRA is a global software development partner for Japan Tobacco and regional partner for DHL, Novartis, Shell and Schneider Electric.
- ✓ Been in client-server technology area for nearly 22 years and in the Internet technology for the past 17 years
- ✓ SIERRA has several web-based world class products developed and has excellent skills on web application development

1.5 SIERRA's Past Experiences & Customer References

There is an extensive list of customers using the SIERRA's Solutions around the world.

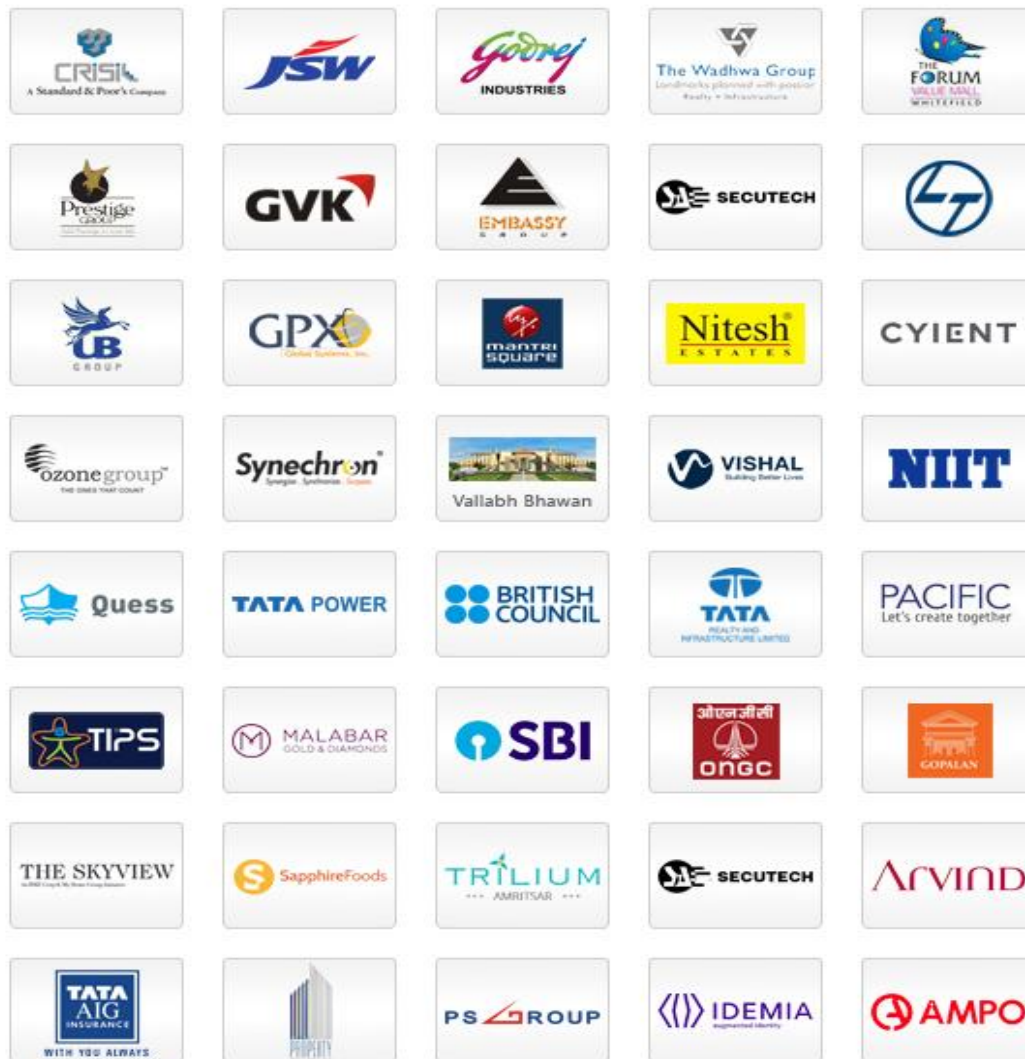

Governments

Fortune 500

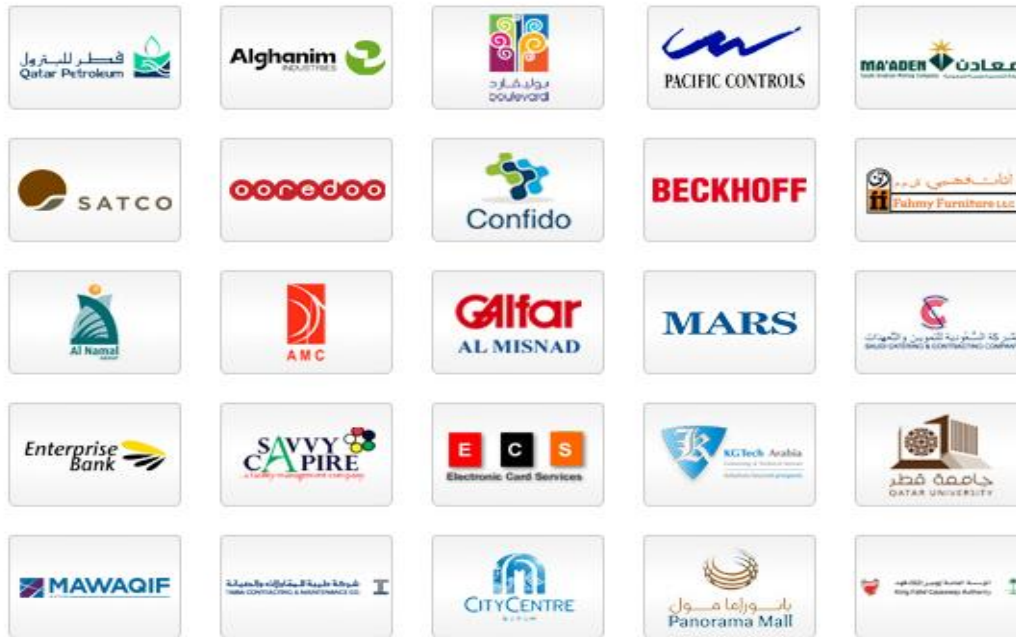

India

Asia Pacific , USA & UK

Middle East & Africa

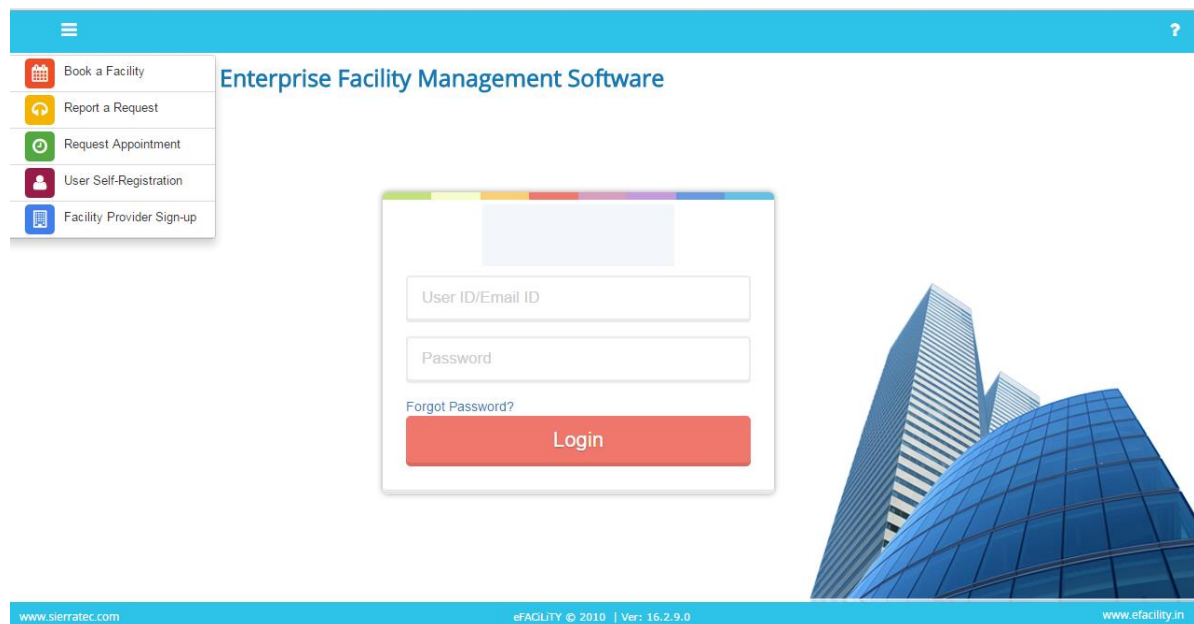

2. PROPOSED FACILITIES MANAGEMENT SYSTEM AND SERVICES

2.1 FMS Overview

FMS Portal provides a versatile and intelligent facility management system that can easily be integrated with any other software applications as required. The client requirements shall be managed by the following modules of the eFACiLiTY FMS Suite,

- ✓ Time and Attendance System
- ✓ Visitor Management System
- ✓ Human Resource Management System
- ✓ Payroll Management System
- ✓ Patrol Management System

The features of the above modules are listed in the following sections.

Example of the Main Web based (Thin client) User interface:

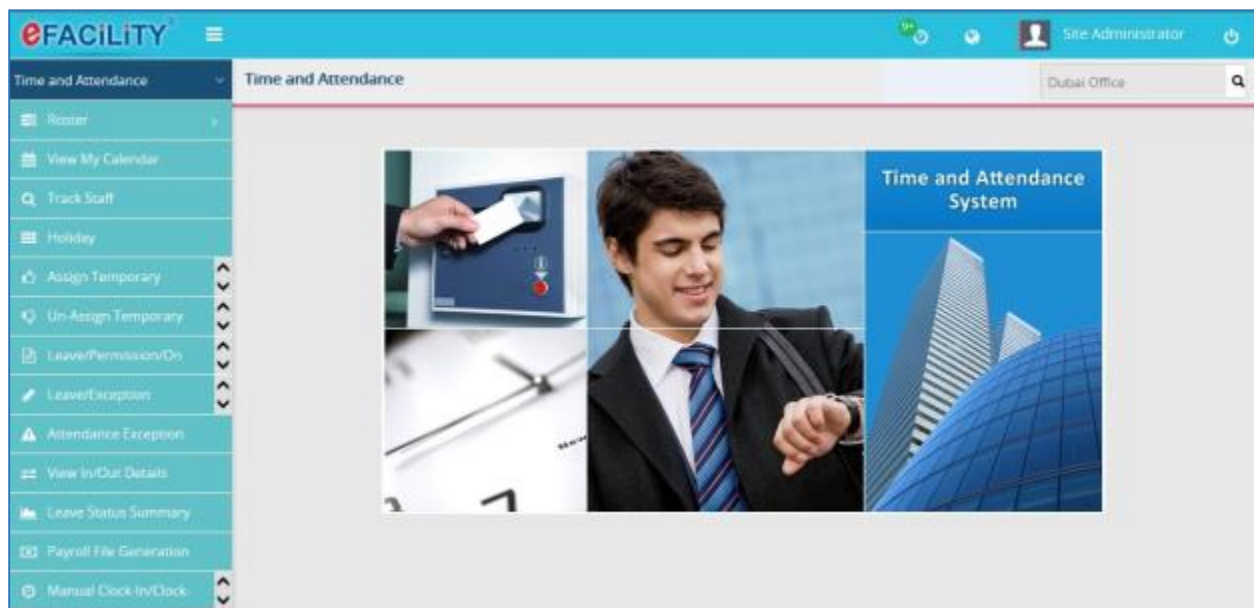

2.2 Time and Attendance System

The need for process endurance in large organizations are challenging and growing increasingly. Employee log in, log out time and also employee tracking can be monitored via integration with access control devices. These challenges are managed efficiently by eFACiLiTY's Time and Attendance System. Manual entry of attendance is usually time consuming and eFACiLiTY provides various features like roster generation, Assignment of shift for an individual / group, apply for leave, Calendar view, User customizable report generation, etc. to facilitate easy implementation of the system.

The below are some of the key features available in the system,

- ✓ Assign / un assign shifts based on requirement
- ✓ Available to employees and management from any Internet enabled computer
- ✓ Email notifications and reminders

- ✓ Tracking, management, and accounting of employee time on multiple projects
- ✓ Leave requests, approvals and rejections
- ✓ User friendly interface to identify leaves and holidays
- ✓ Allows data to be exported to text files, spread sheets
- ✓ Employee movement, check in and check out time tracking using Access Control
- ✓ Identifying late clock in and early clock out's and auto generates reminder mails.
- ✓ Leave Application, Request for Permission, Comp-Off
- ✓ Provision to view in / Out Details, Leave Eligibility (Next Year), Leave Status Summary, Leave Change, Time Exceptions
- ✓ Provision for Managers for Missed Punch Entry, Attendance Exception, Approval / Rejections
- ✓ SMS Attendance System
- ✓ Enhanced Remainder Email Configuration for Exceptions and Approvals
- ✓ Improved report filters & optimized data binding methods for faster reporting

Example Time and Attendance System Screen:

2.2.1 Assign / Un-assign Shifts

- ✓ Employees will be allocated shifts against their Employee Codes
- ✓ Employee or a group of employees can be assigned into any shifts
- ✓ The change in shift's date and time, Accept / Reject shifts can be done
- ✓ Automatic shift assigning for non-shift employees based on the default shifts

2.2.22 Host Location

- ✓ The location information is linked with the staff profile to refer the host / staff's location.
- ✓ When the visitors sign in, the information such as "building / Site", "Floor / Location" where the host is located can be identified.

2.2.23 Other Features

- ✓ MS Exchange integration for calendar based view
- ✓ Access control system integration
- ✓ Integration with HRMS and Payroll Software
- ✓ Integration with Active Directory

2.3 Visitor Management System

The security requirements of large organizations and infrastructure are challenging and growing increasingly. Visitors should be screened, registered, signed in quickly and allowed to visit only the relevant areas via integration with access control devices. These challenges are managed efficiently by eFACiLiTY's Visitor Management system. The registration and authorization process are generally time consuming and eFACiLiTY provides various features like request for appointments, approval and pre-registration, group registration etc. to facilitate easy implementation of the system.

The below are some of the key features available in the system,

- ✓ Online requests for appointment
- ✓ Appointment approvals and rejections
- ✓ Pre-registration of groups and individuals
- ✓ Email/SMS/Mobile App notifications on requests, approvals and rejections
- ✓ Today's appointments and expected visitors
- ✓ Visitor self-sign-in using touch screen kiosks & Visitor sign-out
- ✓ Business card scanning for quick registrations
- ✓ Visitor history tracking & Visitor Blacklisting
- ✓ Visitor photo & signature capture
- ✓ Smartcards / e-Passports integration
- ✓ Items carried in/out scanning
- ✓ Visitor / contractor badge and pass printing
- ✓ Visitor / contractor badge designer & Gate pass printing
- ✓ Returnable items tracking
- ✓ MS Exchange / MS Outlook integration for appointments calendar
- ✓ Access control system / Turnstile gates integration
- ✓ Central implementation to monitor sites across geographies

- ✓ IOS & Android mobile app for Visitor Pre-registration and Meeting Approvals
- ✓ Email/SMS/Mobile App notifications on Visitor Arrival and Sign-out
- ✓ Visitor overstay alert to security and host
- ✓ Generate QR Code stickers to allow visitor self-registration
- ✓ Evacuation/security alerts to visitors during emergency situations
- ✓ Visitor movement dashboards, statistics and reports

2.3.1 Appointment Request

- ✓ Visitors can request for appointments using a simple request form that can be displayed in the company website / portal online
- ✓ Name, Organization, Purpose visit, Phone / Email of the visitor is captured
- ✓ The person from whom they are requesting for the appointment, appointment date / time is captured
- ✓ The details are emailed to the host for confirmation

2.4 Human Resource Management System

eFACiLiTY® Human Resource Management System is an enterprise-ready HRMS software that will enable enterprises/corporates to automate their entire post recruitment HR functions from onboarding to final separation seamlessly.

The exhaustive core module covers all HR activities including employee on-boarding/off-boarding, employee database management, skill management, training & need analysis, content distribution & management, promotions & transfers, performance appraisal, separation, etc. The solution encompasses a configurable workflow management engine that can simplify incorporating all the organization-specific functions seamlessly. Extensive reporting and analytics deliver actionable insights enabling you to build a highly productive workplace.

The role-wise skill matrix allows talent managers to analyze training needs to organizing training programs via the Training Management sub-module and also setup Performance Improvement Plans (PIP) and Performance Development Plans (PMP). eFACiLiTY® HRMS automates all your HR activities that will lead to improved employee engagement, job satisfaction, and employee retention. The solution is fully modular and provides the Payroll Management, Travel Expense Reimbursement Management, Time & Attendance, HR Helpdesk & Knowledgebase and Occupant Health & Well-being as sub-modules ensuring easy implementation of the entire solution while providing a holistic view of the entire HR process.

Key features

Centralized Employee Directory

Track & manage employee profiles, roles & responsibilities, qualifications, skills, employment history, promotion/transfer history, certifications/identity documents, etc.

On-boarding/Off-boarding Workflow Management

The on-boarding/off-boarding process and tasks vary based on several aspects like employee type, designation/grade, department, etc. from organization to organization. The workflow management module perfectly manages this requirement enabling the HR teams to automate these routine activities easily and ensures 100% compliance.

- ✓ Configurable workflows for onboarding include:
Issue ID/access cards, workspace allocation, updating bank details, personal details, required IT setup, scheduling induction programs, assigning supervisor, shift timings, upload documents, enroll to insurance/provident fund, and to comply with all statutory requirements, etc.
- ✓ Configurable workflows for off-boarding includes:
Withdraw ID/access cards, schedule KT sessions, exit interviews, deactivate employee profile, collecting feedback, retirement update, employee resignation & acceptance, de-enrollment, etc.
- ✓ Configurable Promotion or Transfer operations include:
Promotion/transfer settings & schedule, transfer/promotion intimation mails, configure and automate reminder notifications to approve promotion/transfer initiation, reminder mails until completion
- ✓ Automated reminders for pending tasks, email & SMS reminders, mobile approvals, help in executing all the workflow generated tasks more efficiently

Skill Management

These role wise skill & proficiency level requirements, employee wise skills & proficiencies, certifications completed can be maintained allowing the training managers to assess training needs easily for the employees to meet their existing roles and also to move to their next higher role.

Training Management

Training Management sub-module enables the training managers to identify training needs, manage training requests, plan and schedule training programs, organize resources, record attendance, collect training feedback and review the training effectiveness, ensuring complete coverage of the training management process. Key features include:

- ✓ Maintain the library of standard training programs, trainer profiles
- ✓ Perform training need analysis, view training request tickets
- ✓ Group the requirements, plan & schedule training programs, publish training calendars
- ✓ Trigger email/SMS/app notifications and reminders to trainees
- ✓ Book training resources needed
- ✓ Allow self-registration to training programs, prompt up-line supervisors to propose attendees
- ✓ Record attendance, in/out time with QR code scanning
- ✓ Collect training feedback
- ✓ Publish recorded sessions and restrict access to trainees

Performance Appraisal Scheduling

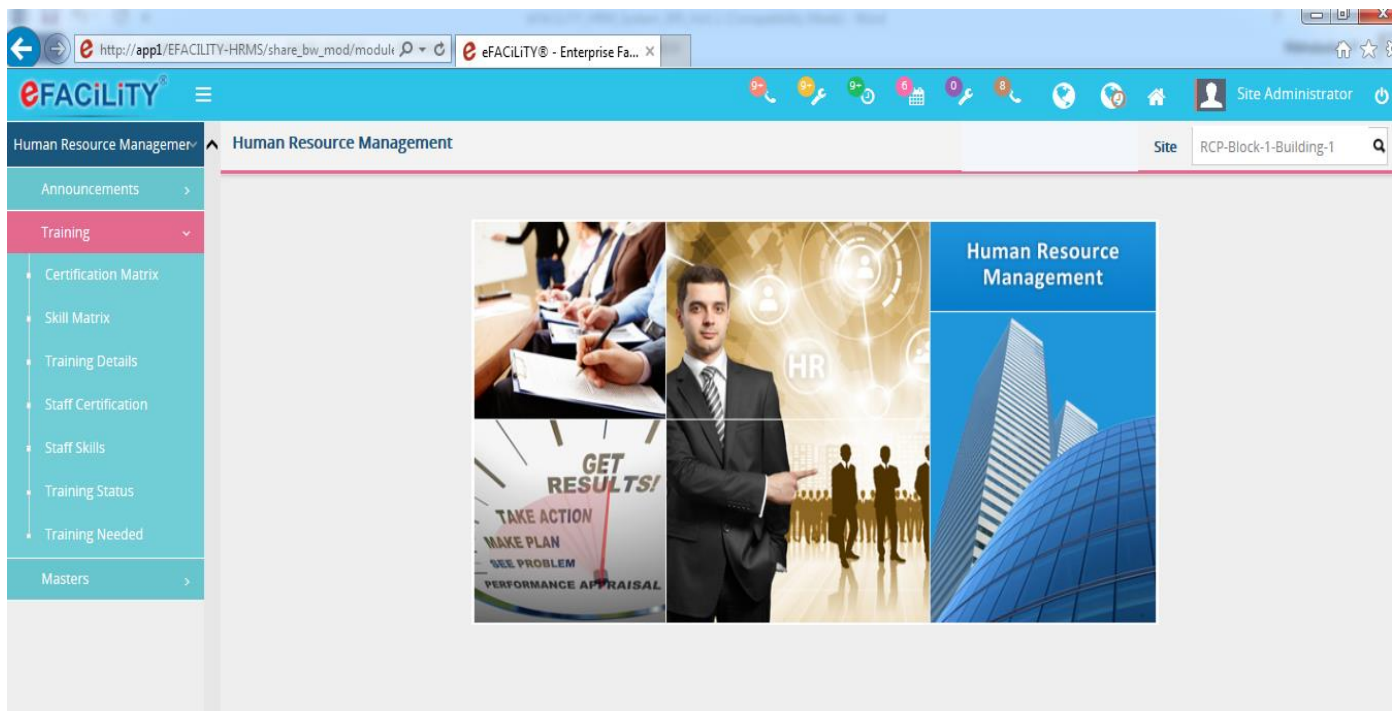

The performance appraisal sub-module facilitates comprehensive performance review management efficiently improving schedule adherence. Key features include:

- ✓ Employee appraisal workflow management
- ✓ Configure designation-specific appraisal evaluation questionnaire/ratings
- ✓ View/configure appraisal cycle
- ✓ Upload evaluation questionnaire/ratings
- ✓ Schedule appraisal meetings/update feedbacks
- ✓ View pending & overdue appraisals
- ✓ Automated appraisal notifications
- ✓ 360-degree feedback from Supervisor/Peers/Sub-ordinates/Other departments

HR Portal - Content Management, News & Announcements

The human resource portal allows HR executives to communicate and share all kinds of company information, health & wellness information, management policies, HR policies or make announcements quickly and easily. The portal is a permanent repository for employees to refer to as and when needed. The key features include:

- ✓ Any time access portal using both web & mobile apps
- ✓ Share content/notifications via emails, SMS, mobile app notifications
- ✓ Scheduled automatic and recurring announcements for special events, training sessions, webinars, circulars, etc.
- ✓ Privilege managed content sharing/distribution based on departments, employee type, designation/grade, locations, etc.

2.5 Payroll Management System

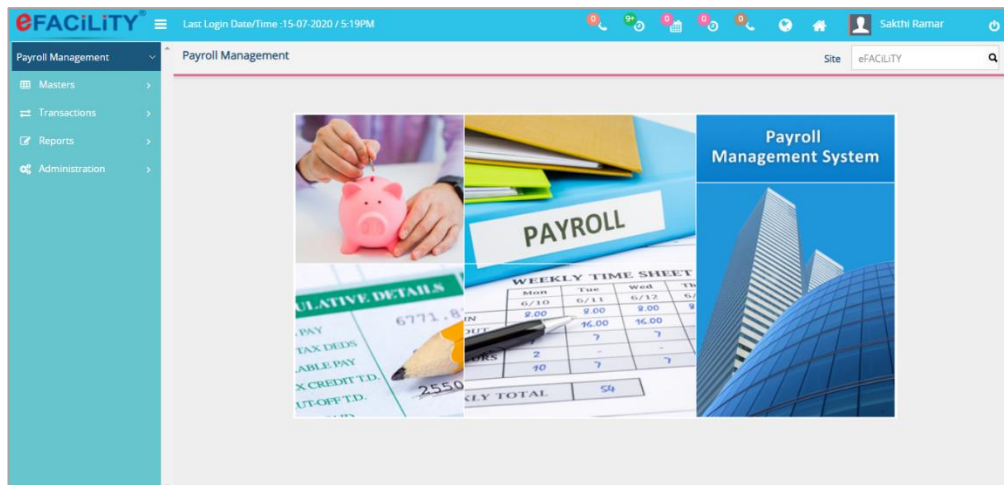

Ensuring employees are paid accurately and on time is a significant part of the business priority for every organization. eFACiLiTY® Payroll Management System reduces the burden associated with employee payments and at the same time makes the management of employee payroll transparent offering complete control of the payroll run.

eFACiLiTY® Payroll Management System is a comprehensive and flexible payroll software that allows managing of both contract and permanent employees payroll processing with flexible pay periods. The tight integration with the Time & Attendance module and minimal manual entries/calculations make the payroll processing fully automated and completely error-free. Statutory compliance including the deduction of ESI, PF, Professional Tax, TDS, etc. are handled in a completely automated manner.

Below are some of the key features available in the system,

- ✓ Complete pay runs in a few steps with fully automated payroll calculation
- ✓ Configurable pay structure/pay slabs/salary templates for each employee & employee type
- ✓ Configurable pay periods/payment cycles
- ✓ Easy capture of one-time/ad-hoc earnings
- ✓ Flexible earnings and deduction formulas
- ✓ Track loans and salary advances
- ✓ Employee emoluments, Salary hold/release

- ✓ Calculate employee increments while maintaining increment history
- ✓ Generate customized Payslip with salary breakdown & deductions
- ✓ Auto-mailing of Payslip to employees & transfer Instructions to Bank
- ✓ Provision for uploading documents for TDS calculation with approval
- ✓ Management of statutory compliance including ESI, PF, Professional Tax, etc.
- ✓ Export reports like Pay Book, Bank Advice, Loan/Advance Ledgers for financial accounting integration
- ✓ Secure access to payroll details with role-based access
- ✓ Integration with Time & Attendance Systems (TAS) & Cafeteria Management Systems (CMS)
- ✓ View upcoming tax dues
- ✓ Intuitive dashboards to provide a holistic summary of the entire payroll operation of the organization
- ✓ Integration with eFACiLiTY® Expense Management System for employee expense & reimbursements credit/debit

2.5.1 Pay Serial and Pay Period

- ✓ Provision to create various pay periods (daily, weekly, monthly) for generating salary

2.5.2 Earning Deduction type

- ✓ Provision to create various earnings and deduction types which are applicable for employee and the same will be reflected in the pay generation process

2.5.3 Salary Structure creation

- ✓ Provision to create the salary structures easily with the applicable earning and deduction types with gross salary / CTC or basic salary automatically

2.5.4 Attendance Information

- ✓ Provision to generate, view, and modify the attendance information for the staff/employee from the TAS module
- ✓ Provision to import the attendance details of the staff/employee

2.5.5 Raise Increment

- ✓ Provision to raise the increment for staff/employee wise as well as department wise

2.5.6 Loan and Advance Issue and Repayment

- ✓ The application can maintain the provided loan amount and advance details for a particular staff/employee
- ✓ The application can deduct the loan amount and advance from the staff/employee's salary and also it has the provision to collect the amount directly

2.5.7 Adhoc earning and deduction entries

- ✓ The application can create the Adhoc earning and deduction entries and the same will be reflected in the salary process for both staff/employee wise and designation wise

2.5.8 Pay Generation and Pay Generation View

- ✓ The application can generate the pay salary to the staff/employee site-wise/employee-wise
- ✓ Provision to view the generated pay salary and send Payslip to the staff/employee through email

2.5.9 Off-Cycle Process

- ✓ Provision to pay outside the regular payroll
- ✓ Provision to calculate non-statutory earnings and deduction

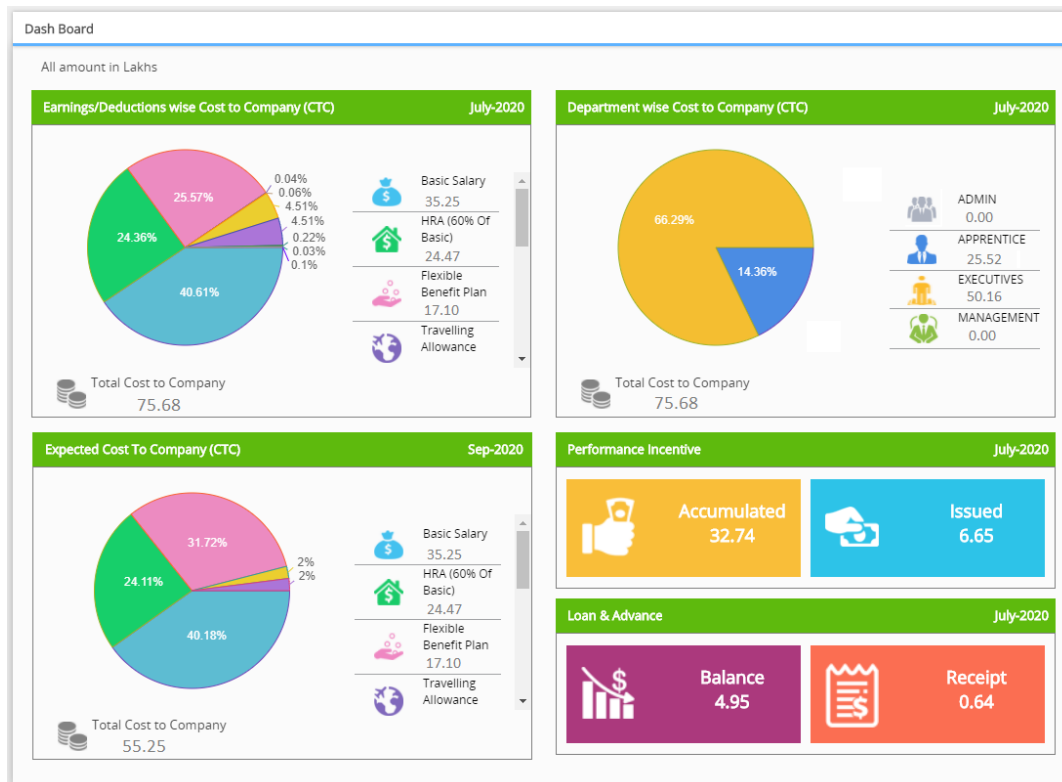

2.5.10 TDS Deduction

- ✓ Provision to enter/submit the TDS details by staff/employee by themselves and the same will be reflected in the salary process when it is applicable

2.5.11 Bonus and Performance Incentive to the Staff/Employee

- ✓ Provision to calculate the bonus for the staff/employee, based on their work experience and net salary

7	Emails shall be triggered to the staff profile users when the Salary is generated and click the send email Payslip option	√	-

8	Emails shall be triggered to the staff profile users when their salaries are cut for particular days during the current month	√	-
9	Emails shall be triggered to any user group defined (Configured in the Configuration) for the document verification which was uploaded against the TDS entry by the user	√	-

2.1 Patrol Management System

eFACiLiTY® Patrol Management System is a software that has a mobile and web component that enables security managers to track the patrolling operations by creating routes and assigning the security guards to do the patrolling and registering the activity by scanning QR codes/NFC tags/Rfid/BLE and also by using GPS tracking at various checkpoints at scheduled intervals. The security guards can also raise incidents instantly. The security guard performance analytics helps in improving the overall security operations.

Key Features

Guard Patrolling

- ✓ Create patrol checkpoints & dynamic routes
- ✓ Shift and Security guard wise route assignment
- ✓ Supports QR Code scanning/NFC/Rfid/BLE/GPS technologies for recording the patrol beats
- ✓ Hits/Misses based security guard performance score
- ✓ Patrol performance reports & dashboards
- ✓ Instant Incident reporting with photos/videos
- ✓ Raise SOS or emergency alerts

Guards Rostering & Attendance

- ✓ Security shift rostering, & shift management across multiple sites
- ✓ Roster approval and re-assignment
- ✓ Attendance tracking with clock-in/out provisions
- ✓ Leave eligibility and approval tracking
- ✓ Integrates with most access control/time & attendance systems
- ✓ Overtime tracking & reporting
- ✓ Integration with payroll software
- ✓ Human Resource Management System with Payroll Processing available for managing the entire workforce

Guard Patrol Mobile App

eFACiLiTY® Patrol app is designed to help guard security officers/managers to track & monitor guard patrols from anywhere and aids guards to conduct their patrols and report incidents instantly with their smartphones!

Security Offices/Managers

- ✓ View guard patrol routes & patrol history (Route-wise, round-wise, check-pointwise hits & misses)
- ✓ Analyse guard performance by viewing the trend charts
- ✓ Guard-wise, route-wise chart with overall score
- ✓ View reported incidents and record new incidents

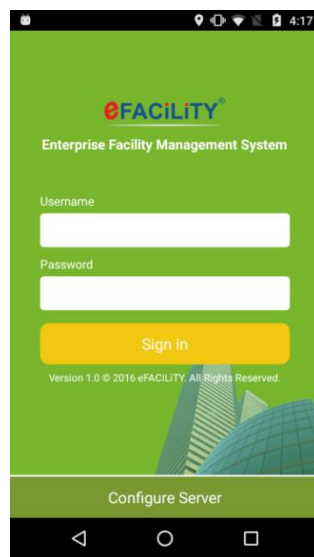

Patrollers/ Security Guards

- ✓ Attendance Clock-in and Clock-out
- ✓ View daily route schedules and assigned checkpoints
- ✓ View history & daily/weekly/month wise hits & trends
- ✓ Raise/report incidents Instantly and upload photographs
- ✓ Receive notifications and raise SOS/Emergency Alerts

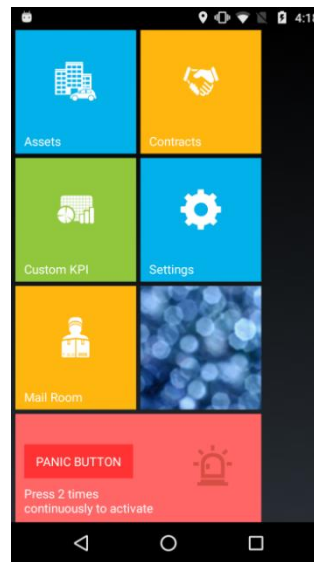

2.2 Smart Facility App

Smart Facility App enables service technicians, managers and other users to access eFACiLiTY via devices like Android Phone, and Android Tablet etc., on the move.

Login: Login screen will be provided for authenticating the login user and applying privileges

Login Screen

Post Login Screen

2.2.1 Smart Facility App - Visitor Management system

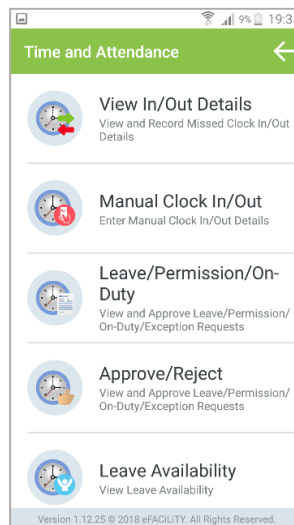

The following are the list of Smart Facility App features available in the Visitor Management System,

- ✓ The option for host to Accept / Reject the appointment requests
- ✓ Provision for the host to manually 'Pre-Register' a visitor
- ✓ Approve appointment requests
- ✓ Visitor Self-sign-in using mobile device (iPad)

2.2.2 Smart Facility App – Time and Attendance system

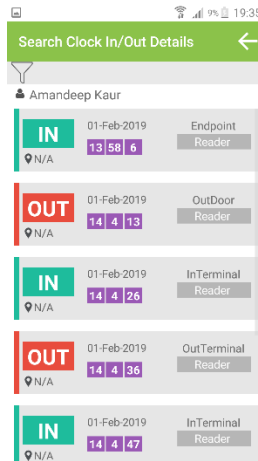

The following are the list of Smart Facility App features available in the Visitor Management System,

- ✓ Provision to Clock In /Clock Out through mobile
- ✓ Option to Approve/Reject Leave/Permission/On-Duty request.
- ✓ Request for Leave/Permission/On-Duty through mobile application.

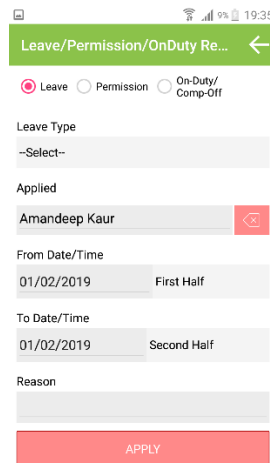

2.2.2.1 View in / Out Details

- ✓ The in and Out time of staff is fetched from the access control system
- ✓ These details can be viewed by managers and staff

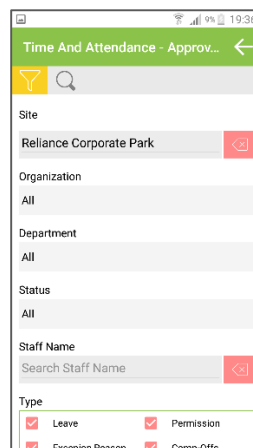

2.2.2.2 Leave Application

- ✓ Provision to apply Leave
- ✓ Available leaves are automatically calculated based on staff attendance
- ✓ Provision for administrators to control advance leave application

2.2.2.3 Admin approval / Reject

- ✓ Option to Approve/Reject Leave/Permission/On-Duty request.

2.2.3 Smart Facility App – Patrol Management System

eFACiLiTY® Patrol app is designed to help guard security officers/managers to track & monitor guard patrols from anywhere and aids guards to conduct their patrols and report incidents instantly with their smartphones!

Security Offices/Managers

- ✓ View guard patrol routes & patrol history (Route-wise, round-wise, check-pointwise hits & misses)
- ✓ Analyse guard performance by viewing the trend charts
- ✓ Guard-wise, route-wise chart with overall score
- ✓ View reported incidents and record new incidents

Patrollers/ Security Guards

- ✓ Attendance Clock-in and Clock-out
- ✓ View daily route schedules and assigned checkpoints
- ✓ View history & daily/weekly/month wise hits & trends
- ✓ Raise/report incidents Instantly and upload photographs
- ✓ Receive notifications and raise SOS/Emergency Alerts

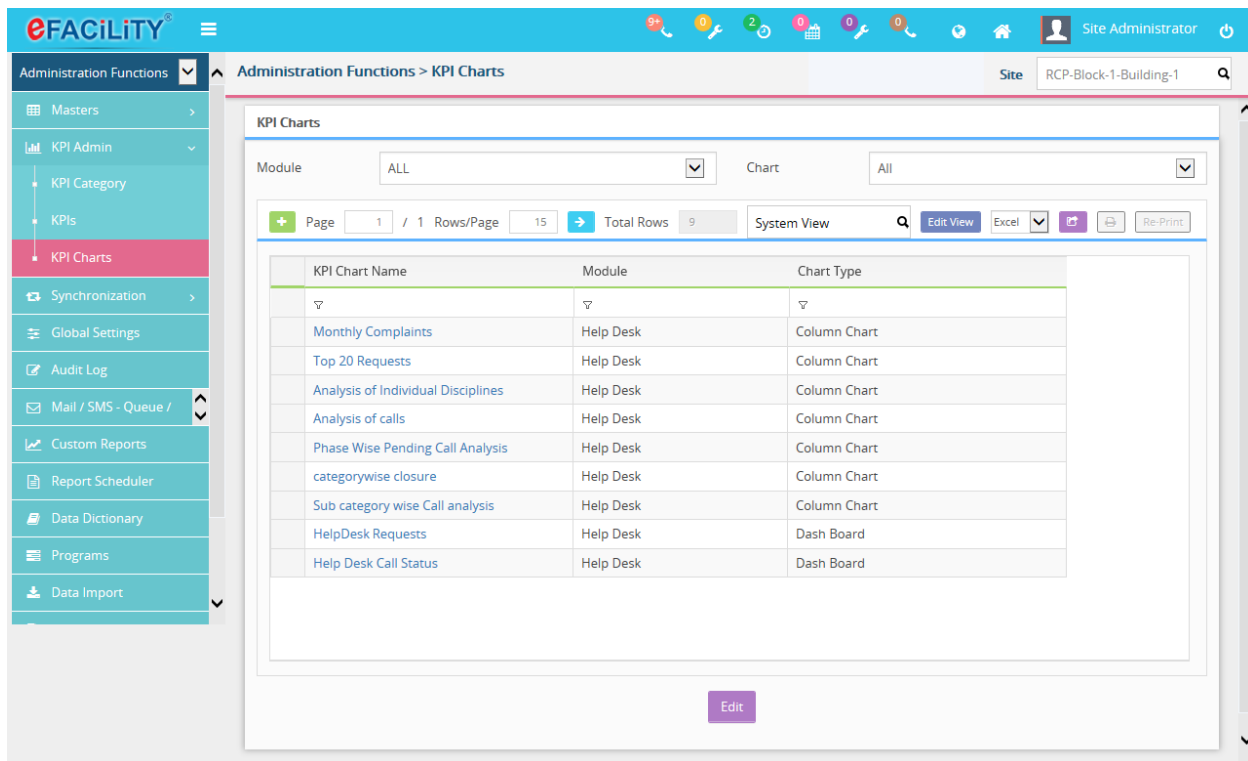

2.3 Admin Functions

2.3.1 Staff Profile

- ✓ Captures basic information of Employees or users.
- ✓ Set user group and site wise privileges

2.3.2 Data Dictionary

- ✓ Provides entire table structure of database.
- ✓ Field wise definition available
- ✓ Captures which field to be audited

2.3.3 Audit Trail Configurator

The SIERRA eFACiLiTY FMS Suite has a powerful Audit Trail Configurator tool using which the administrator of the application can enable, disable audit trails and set up a meaningful and less resource hungry tracking and audit features in the system. The selective table level and field level enabling / disabling of the tracking shall enable more efficient data storage, tracking and performance of the system unlike conventional systems that would either enable / disable audit trails at the module level.

The below are the features of the Audit Trial Configurator,

- ✓ Stores creation, edit, delete logs
- ✓ The logs are stored table level and field level
- ✓ The creation, edit, delete logs can be enabled disabled at Table Level and individual Field Level
- ✓ The reports can be viewed user wise, date wise, module wise, table wise, field wise as required
- ✓ The logs can be analyzed based on the values also

2.4 Summary

- ✓ Web based and Simple to use, Easy to access
- ✓ Performance Analysis – All information that you need to analyze performance
- ✓ Just a Click Away

3. HOSTING CONFIGURATIONS

3.1 Microsoft Azure

3.1.1 Proposed Solution (VM + SQL PaaS Model)

3.1.1.1 App VM

Application server will be installed in Azure Virtual machine (VM) which can be accessed through regular RDP with Static IP Address. Any kind of application can be deployed inside this VM including Application server and Web Server.

3.1.1.2 SQL Paas

MS SQL server will be taken as a Platform as a Service (PaaS). MS-SQL PaaS can scale on its own and is Highly Available. The Sizing can be increased or decreased based on the regular monitoring of the SQL over a period of time. Usually takes 1 to 2 months to monitor the load and arrive at optimal sizing.

3.1.2 Microsoft Azure – Specification

Service type	Description
Azure SQL Database	Single Database, DTU Purchase Model, Standard Tier, S2: 50 DTUs, 250 GB included storage per DB, 1 Database(s) x 730 Hours, 5 GB Retention ; Weekly backup retention : 5 Number of weeks
Bandwidth	Internet egress, 15 GB outbound data transfer from Central India routed via Microsoft Global Network
Virtual Machines	1 D2s v3 (2 vCPUs, 8 GB RAM) (1 year reserved), Windows (AHB), OS Only; 1 managed disk – S10, 1,000 transaction units; Internet egress, 5 GB outbound data transfer from Central India routed via Microsoft Global Network
IP Addresses	0 Dynamic IP Addresses, 1 Static IP Addresses
Backup	Azure VMs, 1 Instance(s) x 128 GB, LRS Redundancy, Moderate Average Daily Churn, 155 GB Average monthly backup data, 4 GB Average monthly snapshot usage data ; Backup Policy : Retain daily backups for 7 Days : Retain weekly backups for : 5 Weeks
SSL Certificate	Included
Domain Name	Included

Please Note:

- ✓ **Azure SQL Database:** Azure DTUs are based on a blended measure of CPU, memory, reads, and writes. As DTUs increase, the power offered by the performance level increases. So, SIERRA is unable to provide accurate DTU suggestion as it involves several performance metrics on your Database Server usage in your live environment. And based on your usage proposed DTU suggestion will be changed and additional cost may be involved.
- ✓ **Bandwidth:** Based on the data flow and process bandwidth will be changed and additional cost may be involved.

- ✓ **Virtual Machine: VCPU(s) and RAM** based on the performance and application usage proposed configuration will be changed and additional cost may be involved
- ✓ **IP Addresses:** For additional **Static IP address** cost may be involved
- ✓ **Backup:** Last **7 days' backup** will be maintained. And if additional days increased cost may be involved
- ✓ **SIERRA is not an expert in doing the server sizing and the recommendations are provided based on past experience with our other clients. However, depending on the type of usage and volume of data to be handled the hardware requirements can vary between installations. The above can be taken as guidance and some changes may be needed on practical usage in case the users feel any slowness or if the CPU/Memory utilization hits the maximum.**

3.1.3 Assumptions for Azure Estimation

- ✓ App Server - 1 D2s v3 (2 vCPUs, 8 GB RAM) (1 year reserved), Windows (AHB) is considered. Windows OS is taken and 64 GB Premium Disk (for OS Installation & Application Server)
- ✓ MS SQL PaaS – Single Database, 50 DTU, 250 GB is considered. SQL PaaS can scale on its own (horizontal scaling) and is highly available. Vertical scaling can be done on needed basis which would involve additional cost.
- ✓ Static IP – 1 Static IP is taken to map the DNS for Application VM
- ✓ Download Bandwidth - First 5 GB download is free and additional 5 GB is considered for data download. This cost may vary based on the usage
- ✓ VM Backup – VM will be configured to be backed up on daily basis with 7 days' retention period. 155 GB size is considered and may vary based on the actual VM size and retention period. MS-SQL will not be backed up as it is in PaaS model which provides high available SLA. It is still advisable to take database dump as backup in local system which should be taken care by SIERRA.

3.1.4 Azure SLA

- ✓ <https://azure.microsoft.com/en-in/support/legal/sla/>

3.2 CLIENT MACHINE REQUIREMENTS

Description	Supported	Preferred
Client OS	Windows 10, Windows 8.1, Windows 8 and Windows 7	Windows 10/ 8/ 7
Client Browser Versions	IE 11, 10 Google Chrome 43 and above	IE 11 Google Chrome 50.0.2661.94
Other Components	.NET Framework 4.0	
Display Unit Color Depth	32-bit (True Color), 24-bit	32-bit (True Color)
Mobile/KIOSK/Tab Compatibility	Google Android 4.1* & higher iOS 8.0 & higher * App notifications may not function properly on Google Android versions less than 5.0	Google Android 5.0 & higher. iOS 8.0 & higher
Mobile Device Specification	Minimum Requirements for eFACiLiTY® Mobile application: - 1 GB RAM - Dual Core Processor Camera specification required for scanning Barcode/QR code: (i) Camera 8.0 Mega Pixel and Above (ii) Camera with digital zooming capacity (Auto Focus) (iii) Camera with flash light Note: • High density barcodes/QR codes are not normally properly scanned in all mobile devices and so High density barcodes/QR codes is to be avoided. • Barcode / QR Code Scanning area should not be in low or dark lighting. • While scanning the Barcode / QR Code mobile angles to the tag should be straight and not more than 5°-10° angle.	
KIOSK Device Specification	Minimum Requirements of KIOSK Device for eFACiLiTY application: ✓ Programming: API HTML5/ SMIL/ Android SDK ✓ CPU: ARM Quad-Core 1.6 GHz and above ✓ Memory: 2 GB and above ✓ Storage: 8 GB and above ✓ Image Codecs: JPEG/PNG ✓ Orientation Display: Landscape ✓ Size: 10" and above ✓ Resolution: 1280 x 800 ✓ IO Interface: Ethernet/ USB/ WLAN ✓ Camera: 5 MP and above with Autofocus feature. Operating System: Android version 5.0 and above	

	iOS 8.0 & higher* *For iPad, if NFC enabled then iOS 11.0 & higher required. ✓ NFC Enabled: If NFC Authentication is required
--	---

4. SYSTEM REQUIREMENTS

System Requirements	Supported	Preferred
Operating System	Windows Server 2016 (Standard, Datacenter & R2 Editions), Windows Server 2012 (Standard, Datacenter & R2 Editions), Windows Server 2008 (Standard, Enterprise & R2 Editions) and Windows Server 2003 (Standard & Enterprise Edition)	Windows Server 2016 Standard & R2 Editions), Windows Server 2012/ 2008 (Standard & R2 Editions)
Database	SQL Server 2016, SQL Server 2012(Enterprise, Standard, Web, Express Editions) SQL Server 2012 Express Edition Limitations: http://msdn.microsoft.com/en-us/library/cc645993(v=SQL.110).aspx	SQL Server 2016/2012 (Standard and Web Editions) Note: Standard Edition (Server + CAL) is preferred for On-Premise hosting. Web Edition is preferred for Cloud hosting. Reference: https://www.microsoft.com/en-in/sql-server/sql-server-2017-pricing
Web Server	IIS 10.x, IIS 8.x, IIS 7.x, IIS 6.x, IIS 5.1, IIS 5.0 versions	IIS Version which comes along with the Operating System.
Client OS	Windows 10, Windows 8.1, Windows 8 and Windows 7	Windows 10/ 8/ 7
Browser Versions	IE 11, 10 Google Chrome 43 and above	IE 11 Google Chrome 50.0.2661.94
Other Components	.NET Framework 4.0	
Display Unit Color Depth	32-bit (True Color), 24-bit	32-bit (True Color)
Mobile/KIOSK/Tab Compatibility	Google Android 4.1* & higher iOS 8.0 & higher * App notifications may not function properly on Google Android versions less than 5.0	Google Android 5.0 & higher. iOS 8.0 & higher

Mobile Device Specification	Minimum Requirements for eFACiLiTY® Mobile application: - 1 GB RAM - Dual Core Processor * 5 MP and above Rear Camera * It is required for Barcode Scanning and Rear Camera less than 5 MP may cause difficulties while scanning the barcode through Mobile application. <u>Camera specification required for scanning Barcode/QR code:</u> (i) Camera 8.0 Mega Pixel and Above (ii) Camera with digital zooming capacity (Auto Focus) (iii) Camera with flash light Note: • High density barcodes/QR codes are not normally properly scanned in all mobile devices and so High density barcodes/QR codes is to be avoided. • Barcode / QR Code Scanning area should not be in low or dark lighting. • While scanning the Barcode / QR Code mobile angles to the tag should be straight and not more than 5°-10° angle.
KIOSK Device Specification	Minimum Requirements of KIOSK Device for eFACiLiTY application: - Programming: API HTML5/ SMIL/ Android SDK - CPU: ARM Quad-Core 1.6 GHz and above - Memory: 2 GB and above - Storage: 8 GB and above - Image Codecs: JPEG/PNG - Orientation Display: Landscape - Size: 10" and above - Resolution: 1280 x 800 - IO Interface: Ethernet/ USB/ WLAN - Camera: 5 MP and above with Autofocus feature. - Operating System: Android version 5.0 and above iOS 8.0 & higher* - NFC Enabled : If NFC Authentication is required

UAT Server Configuration (Maximum 10 Con-current Users)		
System Requirements	Supported	Preferred
Single Server (App & DB in same Server)	Server Configuration: Minimum configuration is 4 GB RAM vCPUs: 2	Server Configuration: Minimum configuration is 8 GB RAM vCPUs: 2
* Note: SIERRA is not an expert in doing the server sizing and the recommendations are provided based on past experience with our other clients. However, will not able to perform Load testing in this environment but all the functionalities will be provided. If the same has to be performed, system configurations needs to be upgraded.		

Production Server Configuration (Maximum 100 con-current Users)		
System Requirements	Supported	Preferred
Option 1: (Single Server)		
Physical App & DB Server 1	Server Configuration: Minimum configuration is 16 GB RAM. vCPUs: 4, VM1, SSD/HDD	Server Configuration: Recommended configuration is 32 GB RAM. vCPUs: 8, VM1, SSD
Option 2: (Dual Servers)		
Physical App Server 1	Application Server Configuration: Minimum configuration is 8 GB RAM. vCPUs: 2, VM1, SSD/HDD	Application Server Configuration: Recommended configuration is 16 GB RAM. vCPUs: 4, VM1, SSD
Physical DB Server 1	Database Server Configuration: Minimum configuration is 8 GB RAM. vCPUs: 2, VM2, SSD/HDD	Database Server Configuration: Recommended configuration is 16 GB RAM. vCPUs: 4, VM2, SSD
Option 3: (Failsafe setup with 2 Physical Servers)		
Physical App & DB Server 1	Server Configuration: Minimum configuration is 16 GB RAM. vCPUs: 4, VM1, SSD/HDD	Server Configuration: Recommended configuration is 32 GB RAM. vCPUs: 8, VM1, SSD
Physical App & DB Server 2	Server Configuration: Minimum configuration is 16 GB RAM. vCPUs: 4, VM2, SSD/HDD	Server Configuration: Recommended configuration is 32 GB RAM. vCPUs: 8, VM2, SSD
Option 4: (Failsafe setup with 4 Physical Servers)		
Physical App Server 1	Application Server Configuration: Minimum configuration is 8 GB RAM. vCPUs: 2, VM1, SSD/HDD	Application Server Configuration: Recommended configuration is 16 GB RAM. vCPUs: 4, VM1, SSD
Physical DB Server 1	Database Server Configuration: Minimum configuration is 8 GB RAM. vCPUs: 2, VM2, SSD/HDD	Database Server Configuration: Recommended configuration is 16 GB RAM. vCPUs: 4, VM2, SSD

Physical App Server 2	Application Server Configuration: Minimum configuration is 8 GB RAM. vCPUs: 2, VM3, SSD/HDD	Application Server Configuration: Recommended configuration is 16 GB RAM. vCPUs: 4, VM3, SSD
Physical DB Server 2	Database Server Configuration: Minimum configuration is 8 GB RAM. vCPUs: 2, VM4, SSD/HDD	Database Server Configuration: Recommended configuration is 16 GB RAM. vCPUs: 4, VM4, SSD
* Note: Above preferred configuration is considering at least 4 modules of eFACiLiTY is getting implemented. If the number of modules are lesser, then the vcpu requirement can be reduced		
* Note: SIERRA is not an expert in doing the server sizing and the recommendations are provided based on past experience with our other clients. However, depending on the type of usage and volume of data to be handled the hardware requirements can vary between installations. The above can be taken as guidance and some changes may be needed on practical usage in case the users feel any slowness or if the CPU/Memory utilization hits the maximum.		

eFACiLiTY – Database Sizing
Database Sizing for eFACiLiTY is determined based on the No. of Modules, User License procured and depth of the customizations and integration required in application. DB Sizing is determined considering the below parameters: We assume 500 MB database size shall be optimal for first 2 to 3 years of eFACiLiTY Implementation. Approximate DB Size will be 75 MB Per year. Proposed DB Size is considered based on approximate volume of calls along with Access log and Audit Log in application. Note: <i>The actual size and growth of the database can be determined only based on the day to day business transactions performed in eFACiLiTY application on a day to day basis.</i> <i>Application also supports Data Archive which can be performed on a regular basis for completed transactions and reports of the same can be generated from archive database as required.</i> <i>The volume of Database size can be decreased based on data archival schedule.</i> *Note: SIERRA is not an expert in doing the Server / Database sizing and the recommendations are provided based on past experience with our other clients and minimum requirement for application access. <i>However, depending on the type of usage and volume of data to be handled monthly and yearly transactions the requirements can vary between installations. The above can be taken as guidance and some changes may be needed on practical usage in case the users feel any slowness or if the CPU/Memory utilization hits the maximum.</i>

eFACiLiTY Supported Deployments	
On-Premise	SaaS
Application accessible over Internet / Intranet.	Application accessible only on Internet.
*Note: HTTPs is a mandatory requirement for accessing eFACiLiTY application over internet. SSL certificate for HTTPs configuration to be procured and configured by the customer. SIERRA shall provide required Guidance and Support to complete the configuration. The major benefits of a HTTPS certificate are: ✓ Customer critical information is encrypted and cannot be intercepted during the transit over the network. ✓ SSL Certification verify the application URL and its access is under your owned domain. ✓ Google Chrome browsers are flagging HTTP sites as unsecure and restricting the accessibility of external devices like web camera through HTTP URLs.	

4.1 Suggested Hardware Accessories for Visitor Management System

Sn.	Description of the Hardware	Picture
1.	Dymo Label Writer 450	
2.	Epson Plain Paper Printer	
3.	Microsoft Web Camera	
4.	CardScan Business Card Scanner	
5.	Honeywell Barcode Scanner	
6.	Topaz Digital Signature Pad TS460 Siglite 1x5	
7.	Qbic Kiosk Device	

5. ROLE OF SIERRA

- ✓ SIERRA will provide information and co-ordinate with customer's project team to ensure smooth implementation.
- ✓ SIERRA will develop and supply the above-mentioned components to the customer.
- ✓ SIERRA will ensure successful working of the above features during the period of trial run and hand-over the system in fully operational condition to the customer.
- ✓ SIERRA will take all steps to complete its role in the proposed time frame.
- ✓ SIERRA will provide information and co-ordinate with customer's implementation team to ensure smooth implementation.
- ✓ SIERRA will provide the User Manual and Installation Document for future reference and re-installation of the software
- ✓ SIERRA will provide Email / Telephonic support for operation and use of the software

6. ROLE OF IFSS

- ✓ The Client will acknowledge the successful completion of the development of the software by SIERRA after ensuring that the features mentioned are operational.
- ✓ The Client will adhere to its part of the time schedule given for completion of its role in user testing and implementation
- ✓ The Client shall ensure that the hardware / software resources for installation of software for User Acceptance Testing are made available to the project team
- ✓ If the software is to be installed in the Client premises or Client provided cloud/hosting environment, the Client shall ensure that the hardware/software resources for installation of software for User Acceptance Testing and Production (Live) environment are made available to the project team as per mutually agreed timelines.
- ✓ The Client agrees to provide all inputs needed by SIERRA for the implementation, development of the customization requirements (if any) and all inputs needed for the successful implementation of the software.

7. TRAINING METHODOLOGY

7.1 Detailed Slide Decks

- ✓ Extensive materials for take-away and future training
- ✓ Explains eFACiLiTY's process overview, risks and controls
- ✓ Demonstrates screenshots to assist in explanations
- ✓ Quick Reference Guides
- ✓ Useful reports and transactions
- ✓ Key learning points in one place
- ✓ We will create tailored exercises for the participants to get real time experience on the system.

7.2 Quick Reference Guides

- ✓ Useful reports, user manuals & transactions
- ✓ Key learning points in one place

7.3 Delivery of Training

- ✓ SIERRA will provide a comprehensive user training agenda to the client with complete information on the areas covered.
- ✓ The user training method shall be class room and train the trainer training.
- ✓ User feedback on the trainer, application coverage, communication, etc., is recorded.
- ✓ Trainer's feedback on the user's understanding and comfort level to work with the application are recorded as well.

8. PROJECT DELIVERABLES

The following are the deliverables to IFSS from SIERRA at the end of the project,

- ✓ Installation Instructions / Manual
- ✓ User Manual
- ✓ Application Setup Files / Database creation scripts
- ✓ eFACiLiTY® Modules as quoted in this proposal.

9. SOFTWARE COSTING

9.1 On Premise Perpetual

9.1.1 License & Implementation Support Costing

eFACiLiTY® Software and related Services Costing		Cost in INR
Sn.	Description	1 Organisation, 10 Sites & 500 Users
1	eFACiLiTY® – Software as per the standard features listed in this proposal For installation of eFACiLiTY software on one main server - Life time license for the following modules Modules eFACiLiTY - Visitor Management System	6,36,630
	eFACiLiTY - Smart Facility App-VMS	1,91,000
	eFACiLiTY - Time & Attendance System	5,78,750
	eFACiLiTY - Smart Facility App-TAS	1,73,630
	eFACiLiTY -Payroll Management System	5,78,750
	eFACiLiTY -Patrol Management System	6,13,470
	eFACiLiTY -Human Resource Management System	6,68,600
	Implementation Support & Training: 55 Person Days	6,05,000
2	Support Person Days Breakup	In Days
	Installation	1
	Demo / Training	5
	Implementation Support	49
	Total	55
	NOTE: ✓ The license cost is for installing eFACiLiTY in 1 main server ✓ Implementation & Training support quoted is for OFFSITE support. ✓ Additional OFFSITE support if required shall be charged @ INR 11,000 per man-day. ✓ Onsite Support if required, in addition to the above charges, the IFSS should reimburse the travel, accommodation, food, local conveyance and other incidental charges at actual.	
3	Email & Telephonic Support – From the date of Installation	Free for 12 Months
Grand Total		40,45,830
Special Discount @10% on the Software License Cost applicable only for this order		3,44,080
FINAL TOTAL: INR THIRTY SEVEN LAKHS ONE THOUSAND SEVEN HUNDRED FIFTY ONLY		37,01,750

Please Note:

- ✓ We have worked out a special discounted pricing for IFSS as we want IFSS under our Clientele
- ✓ IGST @18% will be charged extra as applicable.

- ✓ Customization cost would be **INR. 11,000/- per person-day**. If there are any additional customization during the system study then the scope and estimation will be updated and revised proposal will be submitted.
- ✓ If the Client opts for onsite visit then, the Travel, Stay, and other costs incurred for the onsite visit will be borne by Client.
- ✓ Hardware/Hosting charges are not inclusive and Client would take care of the same
- ✓ This proposal is valid for 30 days from the proposal date.

Disclaimer:

- ✓ Any other features/changes apart from what is mentioned in this proposal arising post-approval of the proposal, will be chargeable additionally. The same will be evaluated for the feasibility and efforts involved and for the feasible change requests, a separate commercial proposal shall be submitted and will be taken up, on receipt of an additional Purchase Order.

9.1.2 Payment Schedule

The said sum may be payable as follows:

Advance

- ✓ 50% of Base Software cost on Confirmed Order
- ✓ 50% of Services cost on Confirmed Order

Balance

- ✓ 50% of Base Software cost on **Delivery of the eFACiLiTY Software**.
- ✓ 50% of Services cost on completion of **55 days of Implementation support & Training**

9.1.3 Support Charges & Payment Schedule

Yearly Support Cost @ 20% of the Software Cost per year		Cost in INR
Sn.	Description	1 Organisation, 10 Sites & 500 Users
1	Yearly Support Cost: 20% of the Software Cost per year Note: • Support Contract will start on completion of 12 months of free support (Telephonic & E-mail) from the date of installation • Please refer to the Support Contract - Terms and Conditions • This will cover 1 year of maintenance support and will have to be renewed on completion of the same	6,88,170
FINAL TOTAL: INR SIX LAKHS EIGHTY EIGHT THOUSAND ONE HUNDRED SEVENTY ONLY		6,88,170

**IGST @18% will be charged extra as applicable.*

Payment Schedule

- ✓ 100% of the total support charges shall be payable at the start of the support period (on completion of 12 months of free support period from the date of installation) and subsequently every year in advance.

Terms & Conditions

- ✓ This agreement is initially for the contracted duration commencing from the date of the expiry of the previous AMC period or warranty period
- ✓ Any increase in taxes, duties and market changes will affect the AMC rates during the subsequent period of AMC.
- ✓ Non-renewal of the annual maintenance contract before expiry would lead to automatic termination of support and release of critical security updates

9.2 On Premise Rental and Cloud-Hosted Rental

9.2.1 License Cost/ Yearly

eFACiLiTY® Software and related Services Costing		Cost in INR / 1 Year
Sn.	Description	1 Organisation, 10 Sites & 500 Users For 1 Year
1	eFACiLiTY® – Software as per the standard features listed in this proposal	
	For License Cost / 1 Year	
	Modules	
	eFACiLiTY - Visitor Management System	2,54,650
	eFACiLiTY - Smart Facility App-VMS	76,400
	eFACiLiTY - Time & Attendance System	2,31,500
	eFACiLiTY - Smart Facility App-TAS	69,450
	eFACiLiTY -Payroll Management System	2,31,500
2	eFACiLiTY -Patrol Management System	2,45,390
	eFACiLiTY -Human Resource Management System	2,67,440
	Implementation Support & Training: 55 Person Days	6,05,000
	Support Person Days Breakup	In Days
	Installation	1
	Demo / Training	5
	Implementation Support	49
	Total	55
	NOTE: ✓ The license cost is for installing eFACiLiTY in 1 main server ✓ Implementation & Training support quoted is for OFFSITE support. ✓ Additional OFFSITE support if required shall be charged @ INR 11,000 per man-day. ✓ Onsite Support if required, in addition to the above charges, the IFSS should reimburse the travel, accommodation, food, local conveyance and other incidental charges at actual.	
Grand Total		19,81,330
Special Discount @10% on the Software License Cost applicable only for this order		1,37,630
Pricing for 1st Year inclusive of one year support		18,43,700
Pricing for 2nd Year Onwards per year inclusive of support		13,76,330

Please Note:

- ✓ **We have worked out a special discounted pricing for IFSS as we want IFSS under our Clientele**
- ✓ IGST @18% will be charged extra as applicable.

- ✓ Customization cost would be **INR. 11,000/- per person-day**. If there are any additional customization during the system study then the scope and estimation will be updated and revised proposal will be submitted.
- ✓ If the Client opts for onsite visit then, the Travel, Stay, and other costs incurred for the onsite visit will be borne by Client.
- ✓ Hardware/Hosting charges are not inclusive and Client would take care of the same
- ✓ This proposal is valid for 30 days from the proposal date.

Disclaimer:

- ✓ Any other features/changes apart from what is mentioned in this proposal arising post-approval of the proposal, will be chargeable additionally. The same will be evaluated for the feasibility and efforts involved and for the feasible change requests, a separate commercial proposal shall be submitted and will be taken up, on receipt of an additional Purchase Order.

Payment Schedule for On Premise Rental and Cloud- Hosted Rental

The said sum may be payable as follows:

- ✓ Total 1st year cost as advance along with the Purchase Order
- ✓ Total Yearly Charges has to be paid every year as advance

9.2.2 Microsoft Azure Hosting Charges

	Concurrent User Load	60
	Hosting Region & Location	Central India
Service type	Description	Est. Cost in ₹
Monthly Costs		
Azure SQL Database	Single Database, DTU Purchase Model, Standard Tier, S2: 50 DTUs, 250 GB included storage per DB, 1 Database(s) x 730 Hours, 5 GB Retention ; Weekly backup retention : 5 Number of weeks	6,588
Bandwidth	Internet egress, 15 GB outbound data transfer from Central India routed via Microsoft Global Network	0
Virtual Machines	1 D2s v3 (2 vCPUs, 8 GB RAM) (1 year reserved), Windows (AHB), OS Only; 1 managed disk – S10, 1,000 transaction units; Internet egress, 5 GB outbound data transfer from Central India routed via Microsoft Global Network	4,000
IP Addresses	0 Dynamic IP Addresses, 1 Static IP Addresses	204
Azure Backup	Azure VMs, 1 Instance(s) x 128 GB, LRS Redundancy, Moderate Average Daily Churn, 155 GB Average monthly backup data, 4 GB Average monthly snapshot usage data ; Backup Policy : Retain daily backups for 7 Days : Retain weekly backups for : 5 Weeks	1,158
Azure Log Storage & USD to INR Conversion (10%)		1,195

The said sum may be payable as follows:

- ✓ 100% Advance along with Purchase Order

11. SUPPORT CONTRACT - TERMS AND CONDITIONS

- ✓ **SIERRA Product Updates and Upgrades:** From time-to-time SIERRA may develop permanent fixes for known problems in the Software and incorporate them into a formal “Update” to the Software, or may add new functions or capabilities to the Software (“Upgrade”). If buyer is receiving Maintenance Support from SIERRA on the general release date for an Update or Upgrade, SIERRA will provide the buyer with the Update and related Documentation (the standard user documentation, manuals and other printed and online reference materials, delivered to Buyer by SIERRA which relate to the Software), both at no additional charge to the Buyer.
- ✓ **SIERRA Product Bug Fixes:** Any identified product bugs from the client environment will be resolved and delivered to the client with a valid Warranty/Annual Maintenance Contract.
- ✓ **Technical Support via Telephone and Electronic Mail:** The Client authorized system personnel will be entitled to contact the SIERRA support line during the normal business hours Mon-Fri (10.00AM - IST and 7:00PM - IST) on regular business days, excluding SIERRA holidays, to consult with SIERRA technical analysts concerning problem resolution, bug reporting, documentation clarification, and general technical guidance. The Client authorized system personnel may also contact SIERRA through electronic mail or fax. Requests for technical assistance may come only from the designated System personnel from Client
- ✓ **Other Software:** SIERRA shall have no support obligations with respect to any hardware or software product other than the eFACiLiTy Software.
- ✓ All Maintenance Support fees are payable in full, in advance of the relevant annual renewal term.

12. STANDARD TERMS AND CONDITIONS

- ✓ Price mentioned above is for the features quoted in this proposal. Any additional work will entail additional charges which will be dealt with separately on a case-to-case basis.
- ✓ SIERRA will utilize its best efforts to maintain acceptable performance of services contracted for the various software modules, but SIERRA makes absolutely no warranties whatsoever express or implied, including warranty of merchantability or fitness for purposes not committed by SIERRA by way of documentation submitted
- ✓ Source Code will not be given and it is the property of SIERRA ODC Private Limited
- ✓ Duration for project completion can vary because of the unpredictable nature of design/programming work involved.
- ✓ All payments are to be made in the form of Demand Drafts or at par cheque payable at Coimbatore in favor of **SIERRA ODC Private Limited**, Coimbatore or **NEFT** (National Electronic Funds Transfer)
- ✓ All payments made are non-refundable.
- ✓ All taxes as applicable to be borne by the Customer.
- ✓ The Client authorizes SIERRA to use the Client’s name, logo and project summary in SIERRA’s promotional materials like websites, brochures, digital presentations etc. if the project is awarded to SIERRA
- ✓ The Client agrees that, the Client will not directly or indirectly, in any manner, request, induce or influence any employee of SIERRA to leave his or her employment, or employ any such employee directly or indirectly, full time or part time for a period of Three (3) years after the agreement or order contract has expired without written approval from SIERRA.

- ✓ Any software developed and supplied is for use only to the company for the country to which it is sold to. The software cannot be used for another implementation or for a different division / group / country or a new company. A new software is to be procured for these purposes.
- ✓ If Client fails to pay the amount within 30 days from the date of invoice, late charges of one point five percent (1.5%) per month shall also become payable to SIERRA
