

eFACiLiTY® | Enterprise Facility Management System/Integrated Workplace Management Software

“End-to-End Facility Management (CAFM) & Integrated Workplace Management System (IWMS) that simplifies complex operations, aids cost reduction and improves efficiencies”

Facility Management
& Integrated
Workplace
Management

Environmental
Sustainability

Smart
Buildings

Health &
Well-Being

- Most comprehensive Integrated Workplace Management/Computer-aided Facility Management Software (IWMS/CAFM)
- Extremely easy single or multi-site/tenant implementations for facilities of any size
- Integrated Workplace Management with seamless integration with most BAS/BMS, IoT Devices
- Artificial Intelligence/Machine Learning (AI/ML) integration support for predictive maintenance, space utilization predictions etc.
- Cloud-based, On-premise - rental & perpetual models supporting web/mobile/tablet platforms
- Integrates various process and procedures onto a single, intelligent network-based software solution

Asset Equipment Register / Work Order

The screenshot displays a web-based application for asset management. The interface is divided into several sections:

- Left Sidebar:** A vertical menu with options: Maintenance Management, Equipment, Asset-Equipment Reg., Schedule Maintenance, Inspection, Equipment Reading, Energy Consumption, Job Request, Work Order, History, Invoice, Time Card, Downtime, Contracts, Job Card, Equipment Physical, and Submit Service.
- Top Header:** Shows the current path: Maintenance Management > Asset-Equipment Reg. and a location filter set to TEXAS.
- Asset-Equipment Reg. Section:** Includes a tree view on the left showing a hierarchy of assets (e.g., A Block, Basement, Diesel Generator 01-05, Cabin-A Table 001-005, etc.). A search bar is located above the main table.
- Main Table:** A table with columns: Property, Asset Management, Extended, Asset/People, AMC/Contracts, and GPS Location. The 'Details' tab is selected, showing a list of assets.
- Asset Level Selection:** A section with radio buttons for 'Equipment' (selected) and 'Location'. Below are checkboxes for 'List in Facility Master' and 'List in Space Master'. A table lists levels and their parents: Level (Site, Building, Floor, Area, 5th Level Component, 6th Level Component) and Parent (Texas, TexasA-Blk, TexasBMNT, --Select--).
- Asset Details:** A section with fields for: Description (Diesel Generator 02), Equipment Assigned To (BalaChandar), Organization* (SIERRA INFOSYS), Department (Mech), Equipment Type (Diesel Generator), Account Code (AC-1852), Manufacturer (ABB), Model No., Customer, and Asset Category (Tangible Assets).

The screenshot displays a software interface for 'Maintenance Management > Asset-Equipment Reg.' with a sidebar menu on the left and a main content area on the right. The sidebar menu includes options like Equipment, Asset-Equipment Reg., Schedule Maintenance, Inspection, Equipment Reading, Energy Consumption, Job Request, Work Order, Downtime, Contracts, Job Card, Equipment Physical, Submit Service, and Stores. The main content area shows a tree view of assets under 'TEXAS' and 'A Block', with 'Diesel Generator 02' selected. A search bar is present above a table of asset details. The table has columns for Property, Asset Management, Extended, Asset/People, AMC/Contracts, and GPS Location. The 'Details' tab is active, showing 'Asset Level Selection' and 'Asset Details' sections. The 'Asset Level Selection' section includes radio buttons for 'Equipment' (selected) and 'Location', checkboxes for 'List in Facility Master' and 'List in Space Master', and a table for 'Level' and 'Parent' with options like Site, Building, Floor, Area, 5th Level Component, and 6th Level Component. The 'Asset Details' section includes fields for Description, Equipment Assigned To, Organization, Department, Equipment Type, Account Code, Manufacturer, Model No., Customer, and Asset Category.

Asset Category	Tangible Assets

EQUIPMENT/ASSET REGISTER

- Maintains complete detail of each equipment/asset
- Maintains asset-specific purchase cost, current value and depreciation cost
- Maintains supplier and warranty information of the equipment
- Tree structure allows parent child relation between equipment
- No limitations in the number of equipment
- Asset type-wise templates to capture asset details
- Capture and maintain physical characteristics of every equipment including height, width, depth and color
- Maintain equipment registration and certificate number
- Track asset movement
- Automated equipment numbering
- Purchase cost and depreciation calculation

FEATURES

- Work on any preventive maintenance or routine job is planned integrating all resources. Scheduled maintenance based on hours, weeks, years, kilometers etc.
- Two types of policies
 - 1) Calendar based - e.g. days, weeks, months, and years
 - 2) Usage based - e.g. hour meter for hours, odometer for kilometers, weight meter for tones
- Generate work orders for the created policies when due. By running the activator, MMS will select the maintenance policies that are overdue or due in the near future and turn them into work orders for each equipment
- Labor resource and spare part requirement planning
- Provides an area where you can store all your standard jobs. A standard job can be turned into a work order when required.

Equipment Using Standard Job Activator Scheduler Print

Records all information - the nature of the job, the equipment it applies to, frequency of the job done and the resources required to complete the job

Allows users to manage all repetitive and routine jobs done on any equipment

CORRECTIVE & PREVENTIVE MAINTENANCE MANAGEMENT

- Monitor maintenance and repair job requests
- Storage of equipment data
- Scheduling work orders to perform maintenance jobs (routine/preventive maintenance)
- Provides flexible working methods like managing work through instant work orders, on-demand work orders and preventive maintenance work orders
- Generate periodic reports and queries that include charts, database tables, drawings and images

STANDARD MAINTENANCE SERVICES

- Customizable templates for recurring maintenance activities
- Manual & Automated

MAINTENANCE JOB REQUESTS

- In the event of equipment failure
- Escalation of job request

WORK ORDERS

- Create work orders for every maintenance task
- Create work orders against purchase orders
- Create work orders from standard jobs
- Create work orders from customer job requests
- Work order auto-assignment based on round-robin, nearest contractor/technician (GPS), etc.
- Estimated and actual costs for each work order
- Estimated actual Labour and spare parts required
- Add history at any time during a job
- Add safety notes and instructions to each work order
- E-mail escalation on work orders that are yet to start after due date
- Resource schedule - Scheduling the work for any day/week/month of any year for any equipment to any trade/tradesperson
- Link external files to print work orders - MS Word, MS Excel, & other file formats

WORK ORDER

The screenshot shows the eFACILITY web application interface on a laptop. The top navigation bar includes the eFACILITY logo, a hamburger menu, the last login date/time (13-03-2020 / 7:38PM), and the user role (Site Administrator). The left sidebar lists various maintenance management options, with 'Work Order' highlighted in pink. The main content area is titled 'Maintenance Management > Work Order' and features a search bar for 'Sierra India'. Below the title, there are checkboxes for 'Trade Alert' (Email and SMS), 'Alert Tenant' (Email and SMS), and 'Fixed Date/Time of execution'. A tabbed interface at the top of the form includes 'Details', 'Costs', 'Docs', 'Spares', 'Tools', 'Tasks', 'Trades', 'Contractor', 'Customer', 'Status', 'Pics', and 'Drawings'. The 'Details' tab is active, displaying a form with various fields for account codes, expense codes, activity codes, priority, status, and dates. The 'Status Remarks' field contains the text 'currently work order is in entered status'. The 'Job Type' is set to 'Electrical', and the 'Department' is 'EL'. The 'SLA' is 'SierraINDS'. The 'Problem Type' is 'AC issue'. At the bottom right, there are buttons for 'Resend Email to Contractor', 'Save', and 'Cancel'.

SERVICE LEVEL AGREEMENT (SLA)

- SLA can be defined for any job type and priority combination
- Analysis and escalation can be set against “Status” codes
- SLA breaches & nearing breaches can be tracked against pending work orders
- Define escalation time and responsible person to escalate
- SLAs can be linked to a contract/maintenance policy/facility/work order directly
- An interactive screen with icons displaying SLAs that are nearing expiry
- SLA analysis and escalation for internal work orders

Note: The Abbreviation for aging columns is as follows 'Min' - Minutes , 'H' - Hour, 'D' - Days.

SLA Normal

SLA Nearing Breach

SLA Expired

HISTORY

- Failure analysis
- Downtime and repair time reporting
- Full description of each job done
- Add history with/without work orders

READINGS

- Store equipment readings (e.g. hours, kpa, amps)
- Use readings to trigger maintenance policies
- Calculate average usage rates for all equipment

DOWNTIME

- Register downtime of all equipment/plant
- Instantly generate downtime reports (daily/weekly)

INVOICING

- Generate invoice for a work order, or for ad-hoc invoicing
- MMS quotes cost directly from the work order or the quoted price in the invoice
- Maintain discounts for each supplier, the discounts will be shown in all the invoices of that particular customer
- Trade labor costs can be charged differently to each customer

KEY MANAGEMENT

- End-user key request
- Key issue/return
- Track keys with barcode/QR code scanning
- Track keys/lost keys

CONTRACT MANAGEMENT

- Contracts storage/retrieval with attachments
- Scheduled and corrective maintenance of service, procurement & projects
- Capture & maintain vendor details, contract details/warranty period, terms of payment, insurance details, etc.
- Define SLAs for contracts
- Pre-defined contractor payment schedule & auto-generated mails as reminders
- Three levels of auto reminders for contracts and warranty expiry

AMC

Warranty

Vendor contracts

Customer contracts

PROCUREMENT

- Vendor management
- Contract management
- SLA management
- Rate contracts
- Purchase requisition with approval process
- Alerts on rate contracts nearing expiry
- RFQs & Quotations
- Quotation analysis and order placement
- Quotation comparison and analysis
- Quotation approval workflow for order placement
- Quotation re-initialization workflow

RATE SCHEDULES

- Rate schedules can be linked to contracts
- Rate cancellations & revisions
- Work order picks up trade wise rates for supplier
- Purchase order picks up item wise rates for supplier
- Report to list rate schedules nearing expiry

STORES & INVENTORY MANAGEMENT

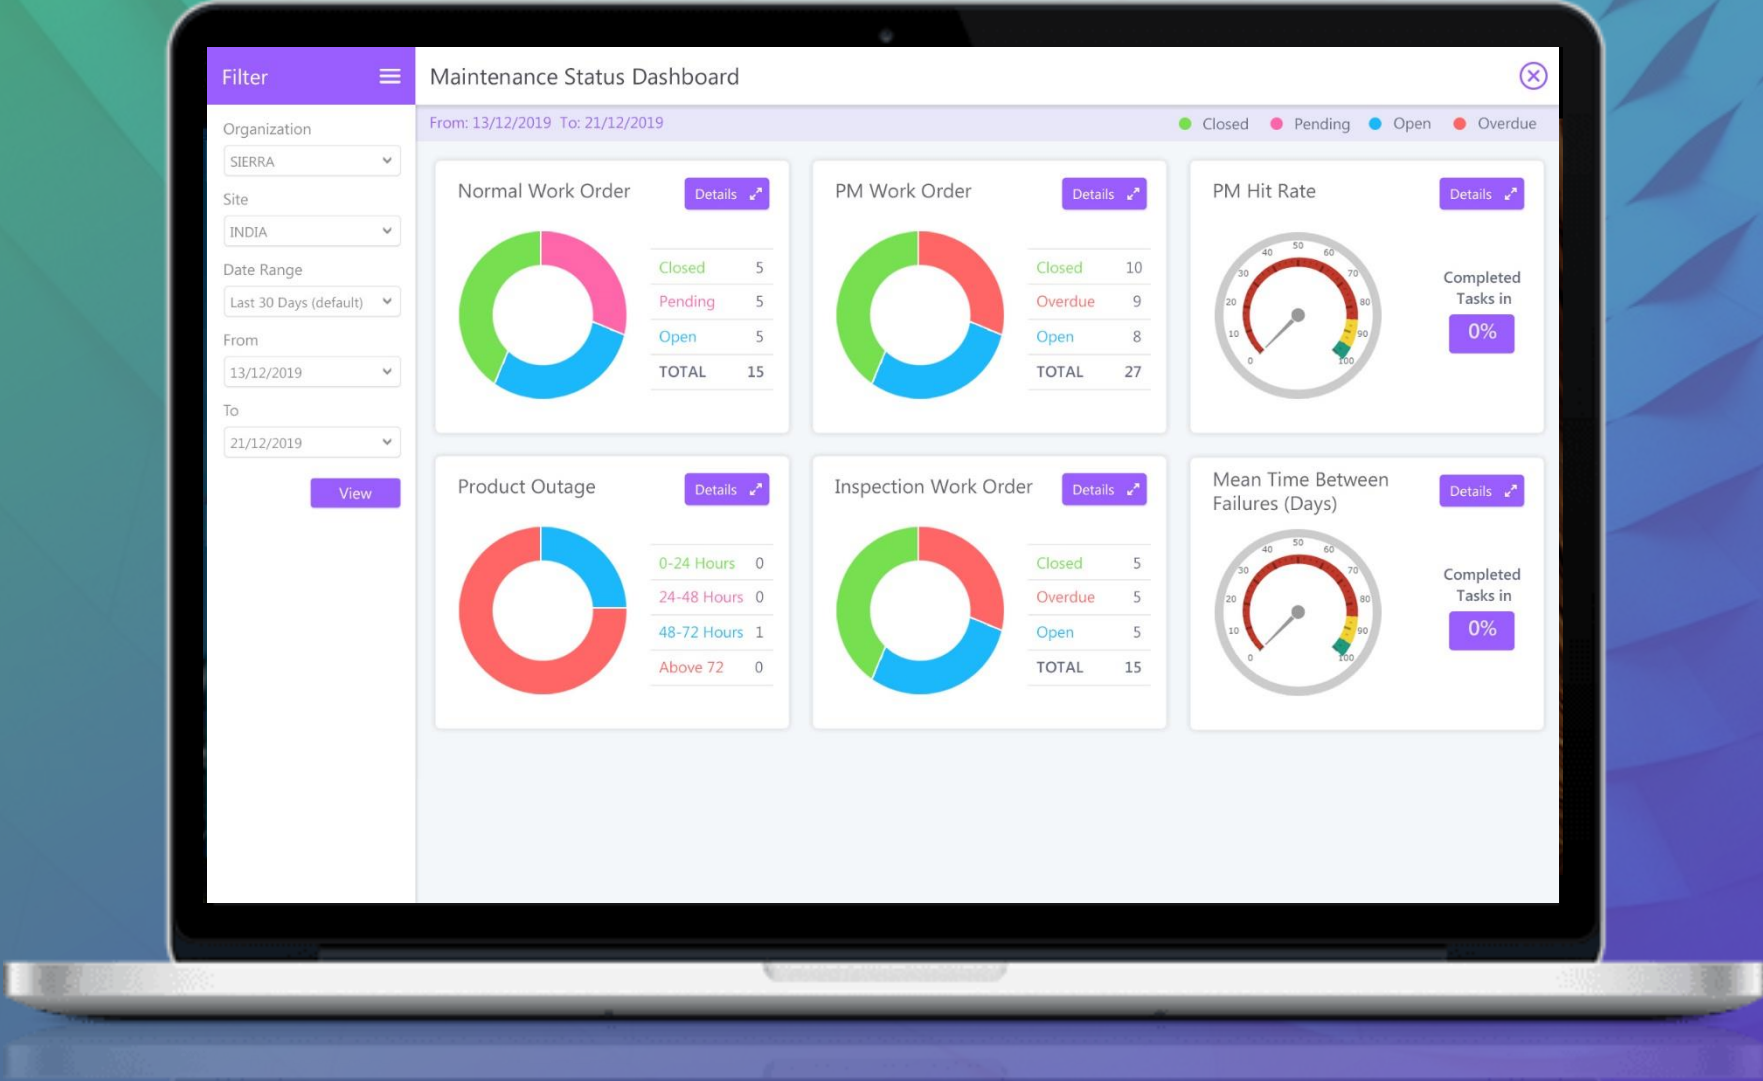

STORES

- Records all the spare parts required for maintenance/repair
- Charge out spare parts to customers
- Create purchase orders for store purchase
- Manage all suppliers and contract rates for spares
- Analyze the usage of all spare parts
- Item re-order alert

STORES INVENTORY MANAGEMENT

- Quality inspection during item receipt
- FIFO policy to manage perishable and non-perishable items
- Track goods in-transit between sites
- Approval based material request
- Material request and transfer within site & other sites
- Fuel management
- Printing & stationery management
- Stock variance approval workflow
- Write in/off entry for stock adjustment

More than 200+ standard reports & dashboards on all maintenance activities helping your FM team make better and informed decisions

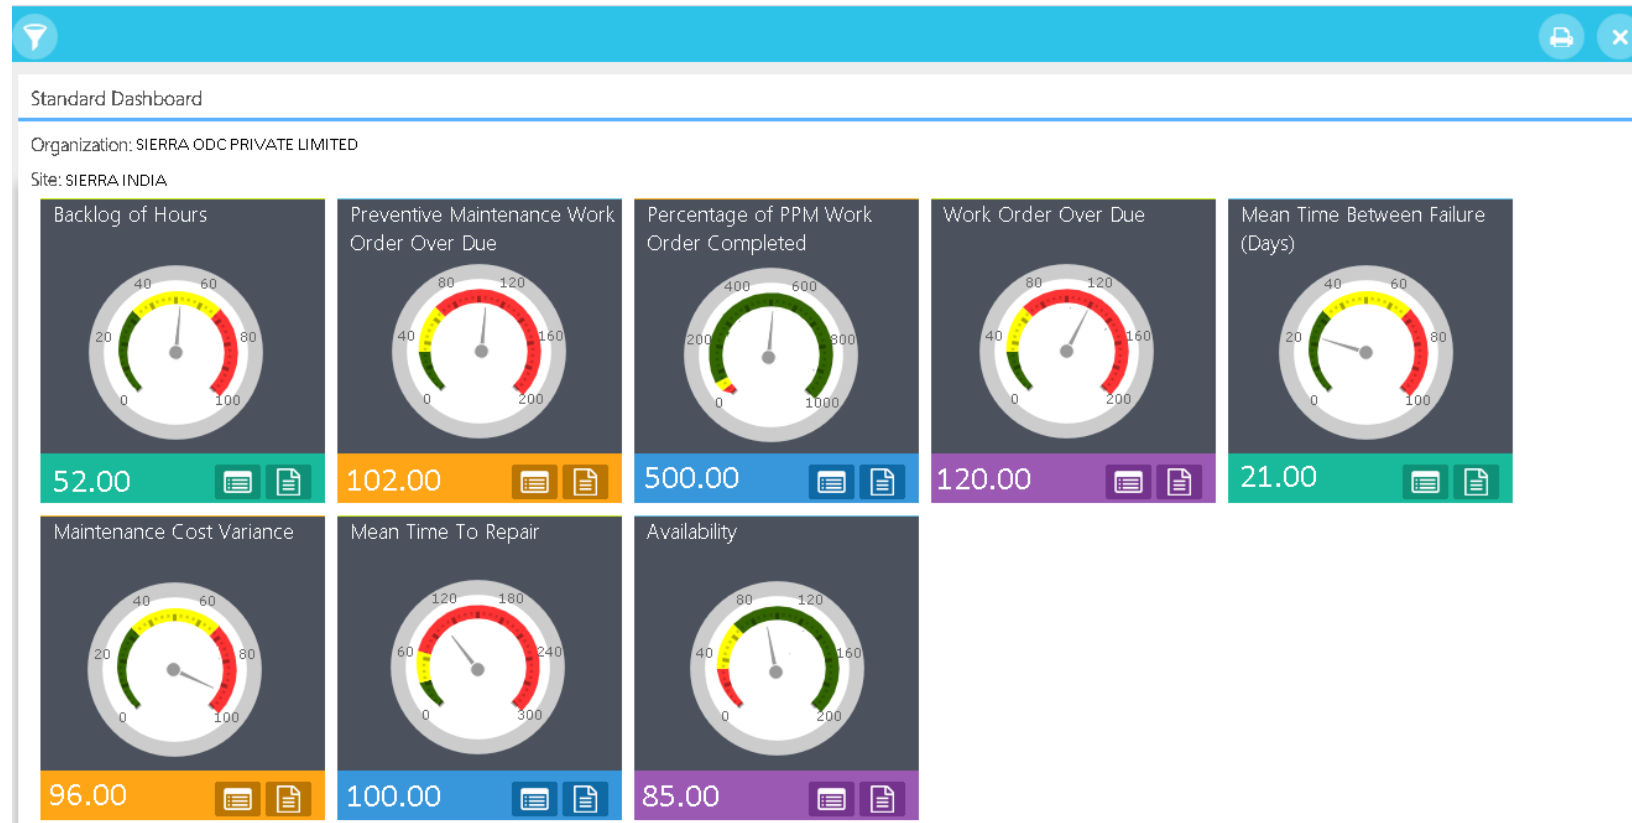

KEY PERFORMANCE INDICATORS (KPIs)

- Standard KPIs - Preventive Maintenance Backlog, MTBF (Mean Time Between Failures), Overdue PM work orders, Maintenance Cost variance, etc.
- Provision to drill-down and view detailed report
- Create Custom KPIs, KPI Charts and associated detailed drill-down reports
- Site wise KPIs
- Custom KPIs can be linked to menus and privileges can be defined
- Auto-refresh to show latest data with gauges, bar charts, pie-charts, etc.

KEY PERFORMANCE INDICATORS (KPIs)

- eFACiLiTY® provides 150+ pre-configured reports, graphs and a maintenance dashboard that shows a standard set of Key Performance Indicators (KPI)
- The system has other tools like the KPI Builder, Custom Report Builder, Pivot Grid Builder for the business users to generate a plethora of custom reports based on requirements using their own simple wizards

BIM integration with eFACiLiTY® will put things in perspective for your facilities managers & technicians in a 3D model visual format with hidden assets that will enable them to make clear decisions in areas such as maintenance, space use, floor planning, job planning during modification/building renovations, etc., throughout the building's lifecycle.

Integration of eFACiLiTY® with BIM offers

- Integrating facility maintenance and design
- Synchronizing real time data including additional asset information & access to up-to-date asset profiles
- Facilitating interdisciplinary collaboration across the facility maintenance managers and their teams
- Bridging technical and operational aspects of the built assets in the facility
- Better visibility into use of space thereby improving space management
- Efficient maintenance schedules through automation
- Smart view techniques to get a clear and instant overview of the BIM information
- Streamlines change management as BIM helps identifies conflict when space requirements change

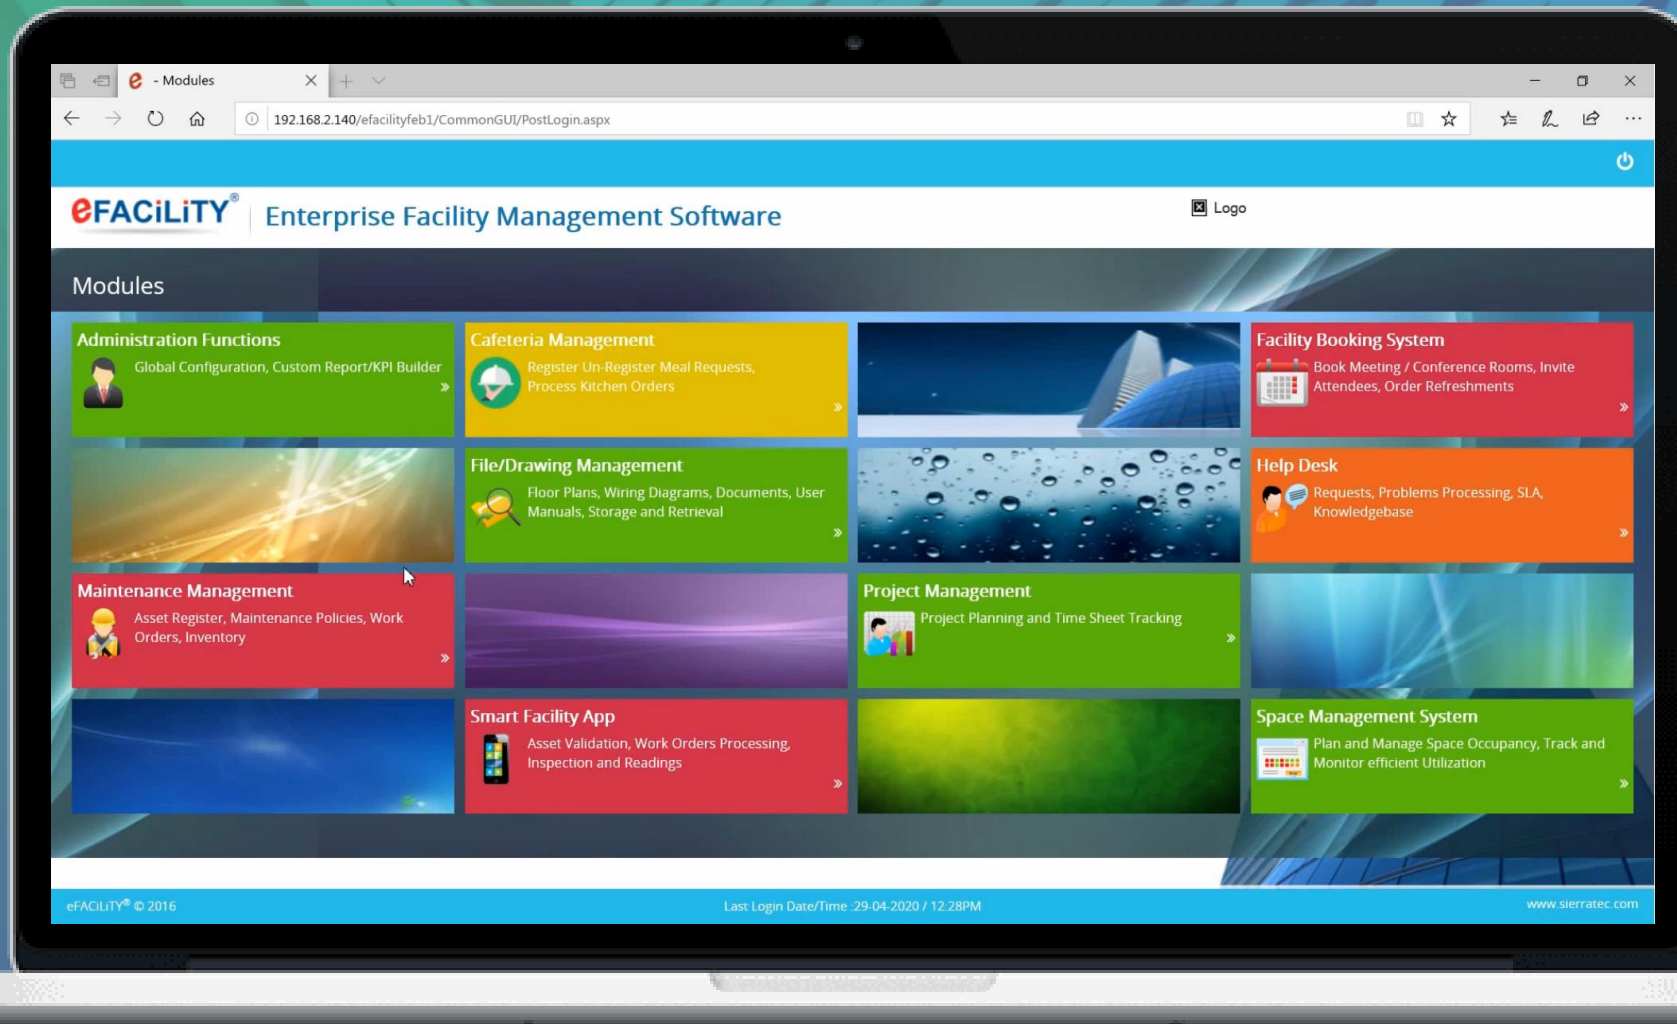

BIM INTEGRATION

The integration of eFACiLiTY® Maintenance Management System with BIM will have following benefits

- Asset movement can be tracked from updated versions of BIM drawings through eFACiLiTY®
- Ability to view the entire asset information like the latest service history, breakdown history, warranty information, etc., alongside the 3D model
- Spot any potential issues before performing a maintenance job, as you can float on-screen, the 3D model of your building with the view showing the exact asset location along with the other hidden assets, its proximity to other assets and how they are connected. Thus preventive maintenance tasks can be managed effectively.
- Space management is simplified by utilizing 3D BIM drawings for constructions/renovations. It allows the facility managers to track their assets through renovations or space re-allocations.
- Any physical entity of your building, say a wall can be moved to a different location and this change automatically ripples through the model and synchronizes it back with the changes revealing opportunities for a more efficient layout, or highlighting the conflicts for improved space optimization and planning
- Building Automation Systems (BAS) data can be retrieved and displayed in BIM and operations can be called for execution by integrating with eFACiLiTY® Maintenance Management System

BIM INTEGRATION

On clicking any asset the maintenance data can be pulled from eFACiLiTY® and work orders can be raised from BIM

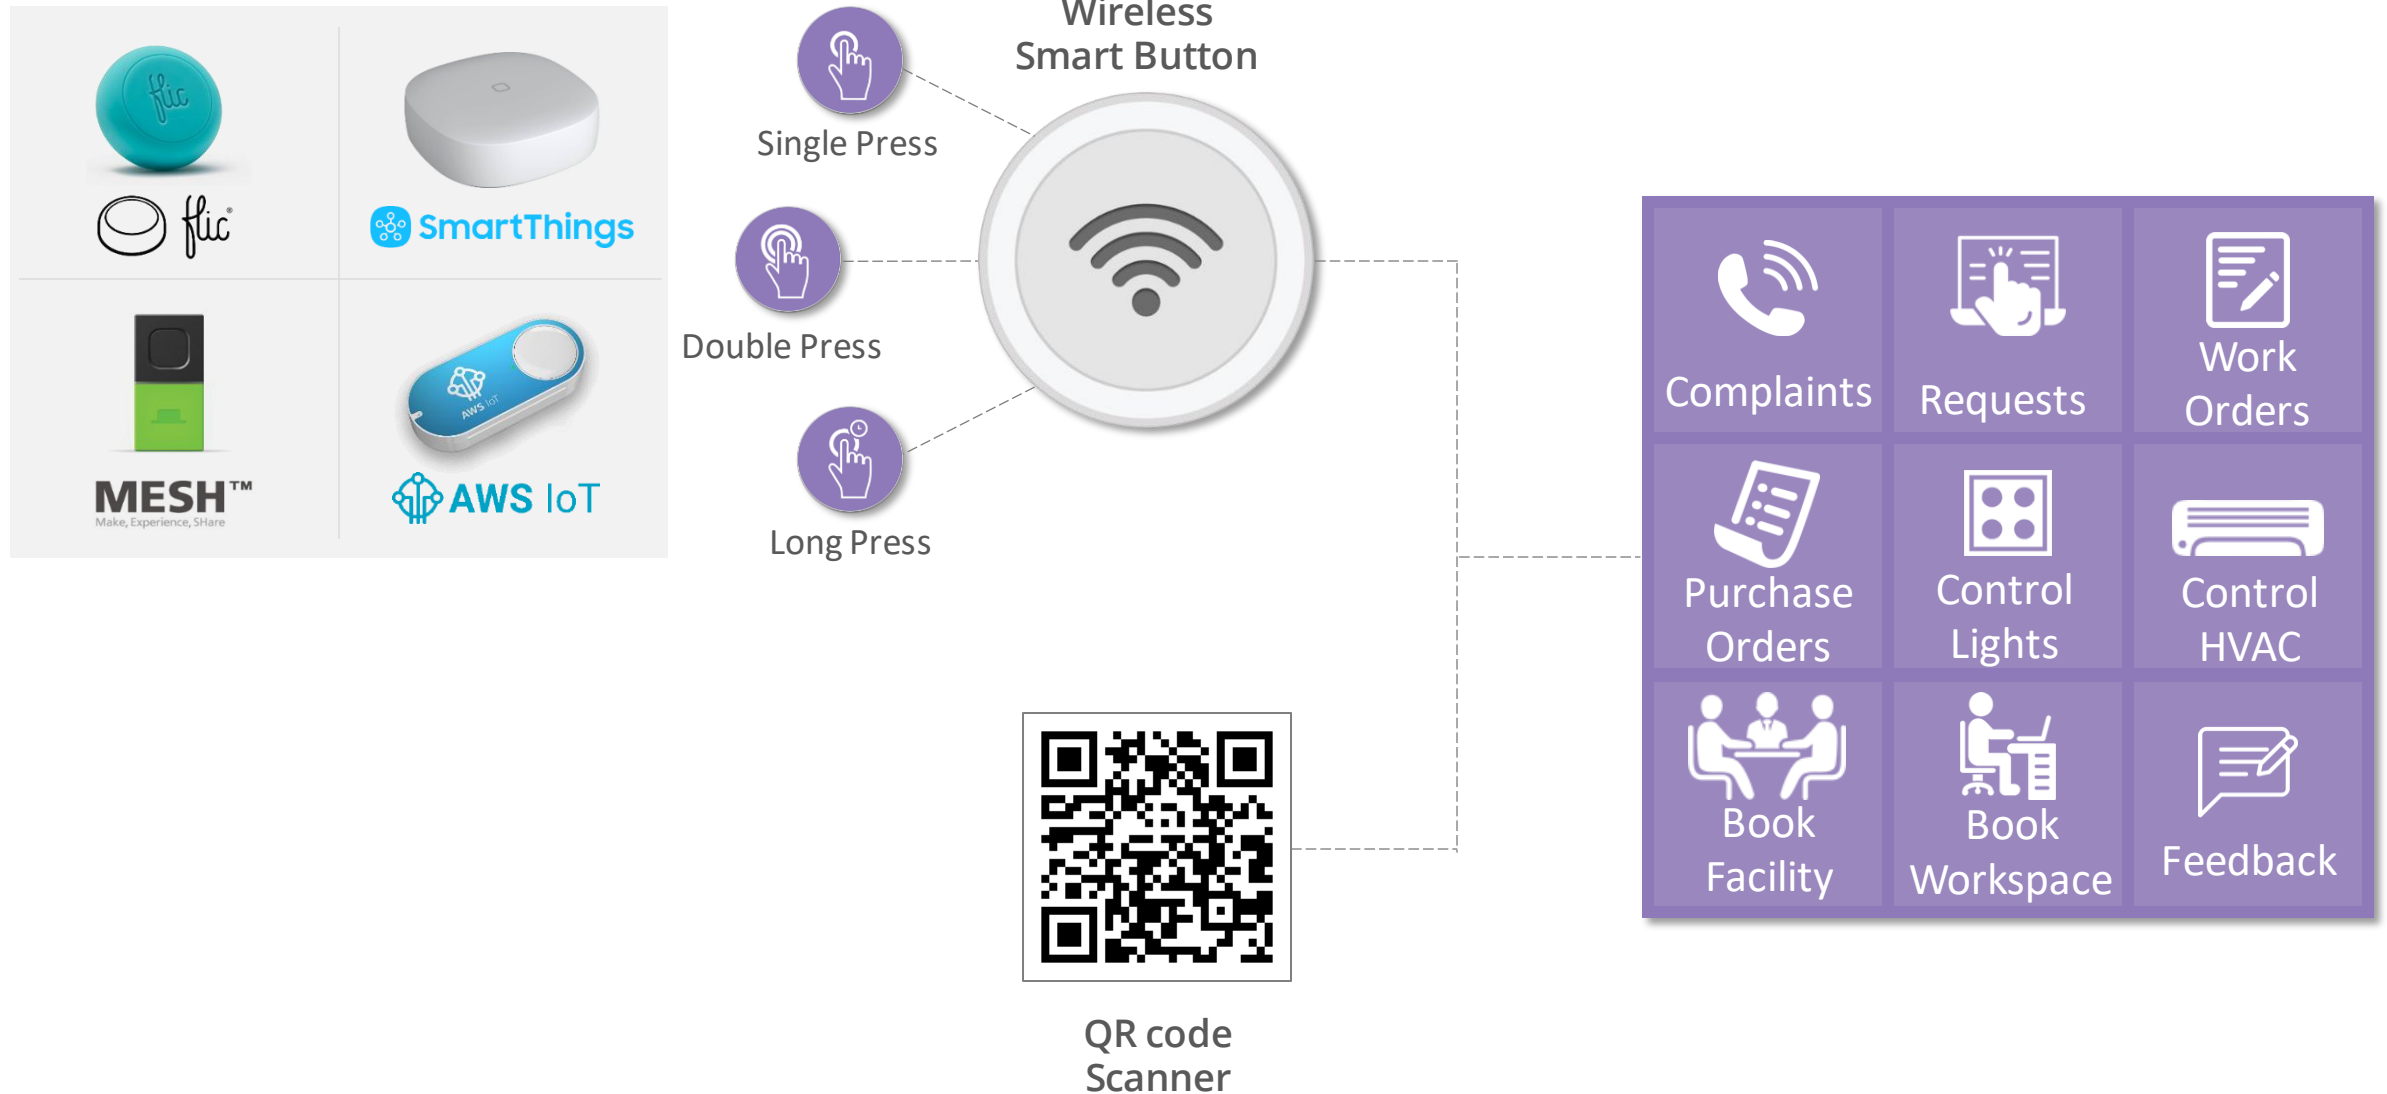

IoT DRIVEN ONE-TOUCH SMART FACILITY MANAGEMENT

- eFACiLiTY® Maintenance Management System can be integrated with Smart IoT (Internet of things) buttons for One-touch Smart Facility Management
- New IoT devices like leak detectors, gas sensors, etc. can be easily integrated with eFACiLiTY® for detecting problems, and to generate automatic high priority breakdown work orders that gets assigned to the technicians instantly
- IoT buttons can be configured for creating one-touch helpdesk requests, generating maintenance work orders, report problems and to provide feedback

POWERFUL & FLEXIBLE HELPDESK SOFTWARE

Comprehensive service desk management solution that supports helpdesk ticketing, custom service request management, incident management, change management, request management, problem management, and much more...

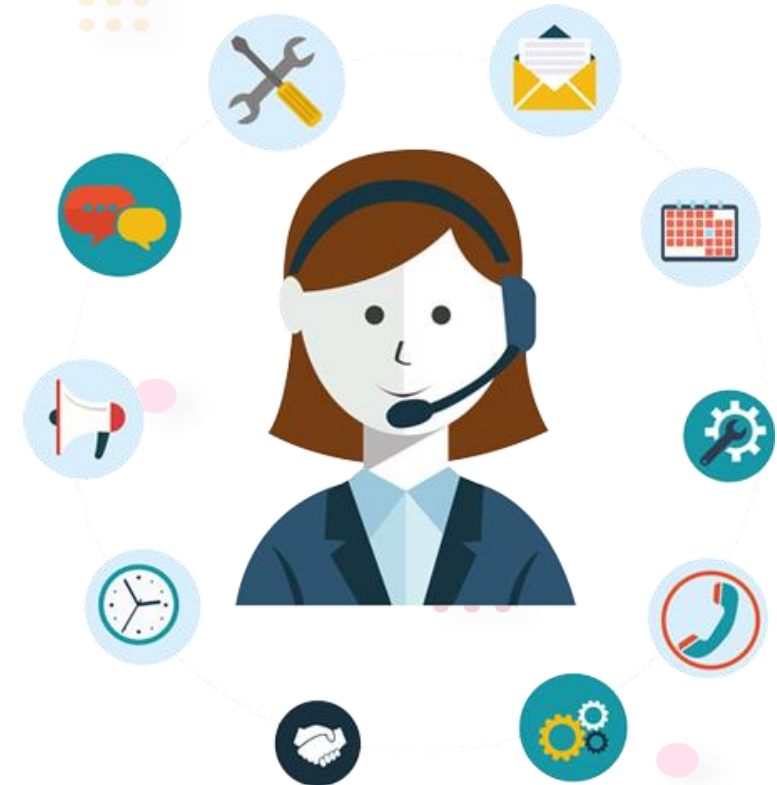

HELPDESK AND KNOWLEDGEBASE

Record and manage calls received via online, phone, email and BMS / BAS alarms

Assign, distribute and monitor problems reported

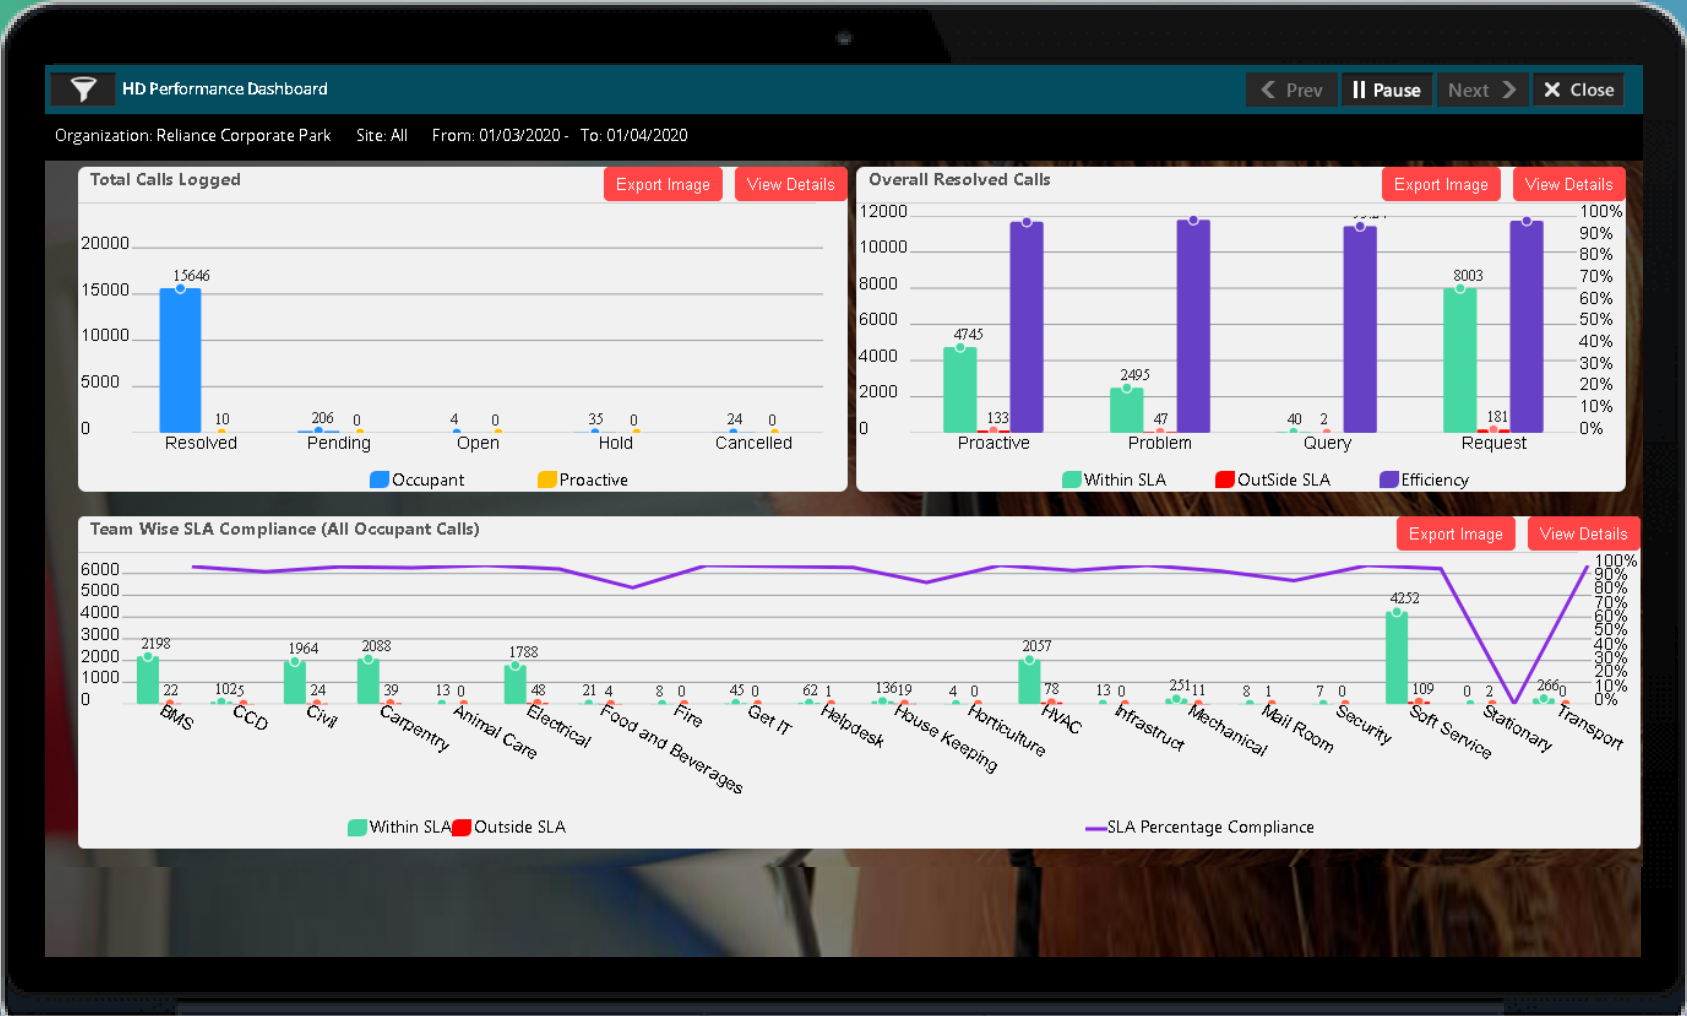

Aligns with ITIL compliance for problem, change and incident management

KEY FEATURES

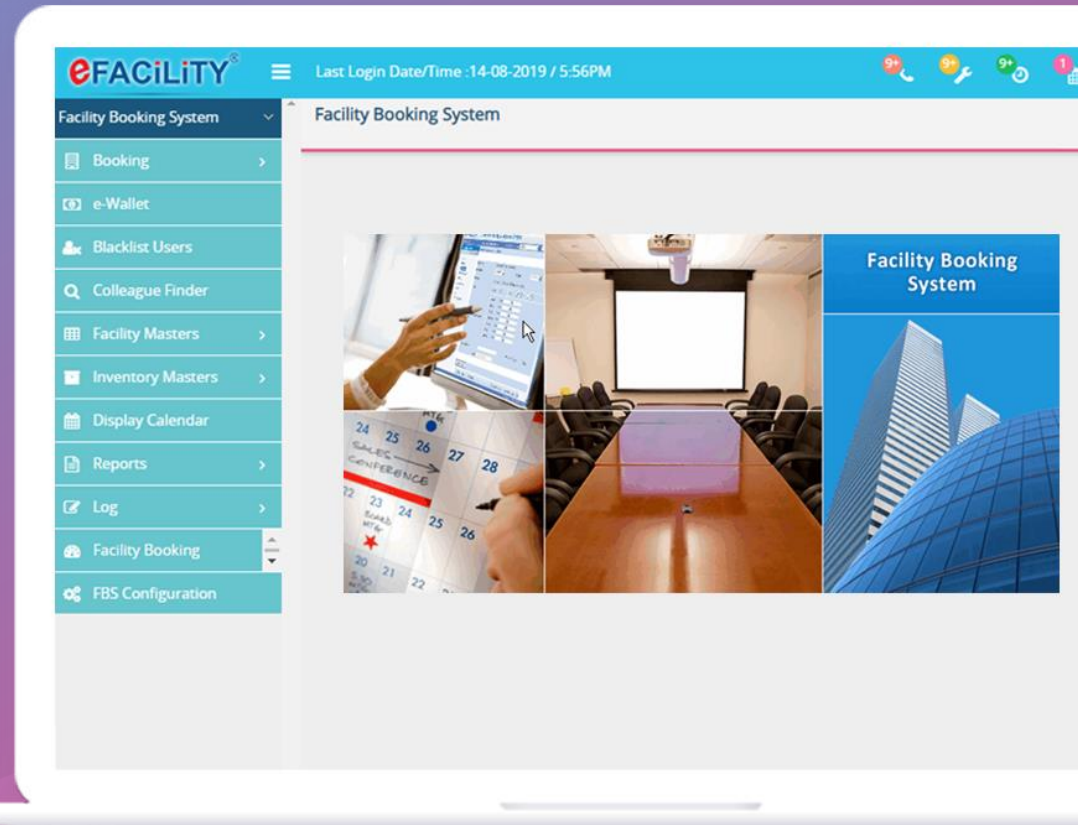

- Register problems, service requests, etc.
- Priority assignment based on nature of the faults
- Escalation based on SLAs defined
- Events & follow-ups
- Exchange of information between job requestor and operator via message option
- Raise, track and close work orders
- Record solutions and post in knowledgebase
- Call response analysis with minimum TAT
- SLA elapsed and closure time nearing SLA alerts
- FAQs, links, faults and solution history
- Provides vital information on standard solutions, past solutions history, approved solutions
- Helpdesk call status dashboard
- Incident / Problem / Change Management

HELPDESK DASHBOARD

COMPLETE FACILITY RESERVATION SOFTWARE FOR ORGANIZATIONS OF ANY SIZE

A web-based platform to manage common/individual facilities with provision to invite internal & external attendees for meetings, schedule refreshments to catering and reserve car parking spaces

FACILITY BOOKING SYSTEM

Web enabled facility reservation

Invite internal & external attendees for meetings

Managing of inventories for booked facilities

Schedule refreshment orders to catering

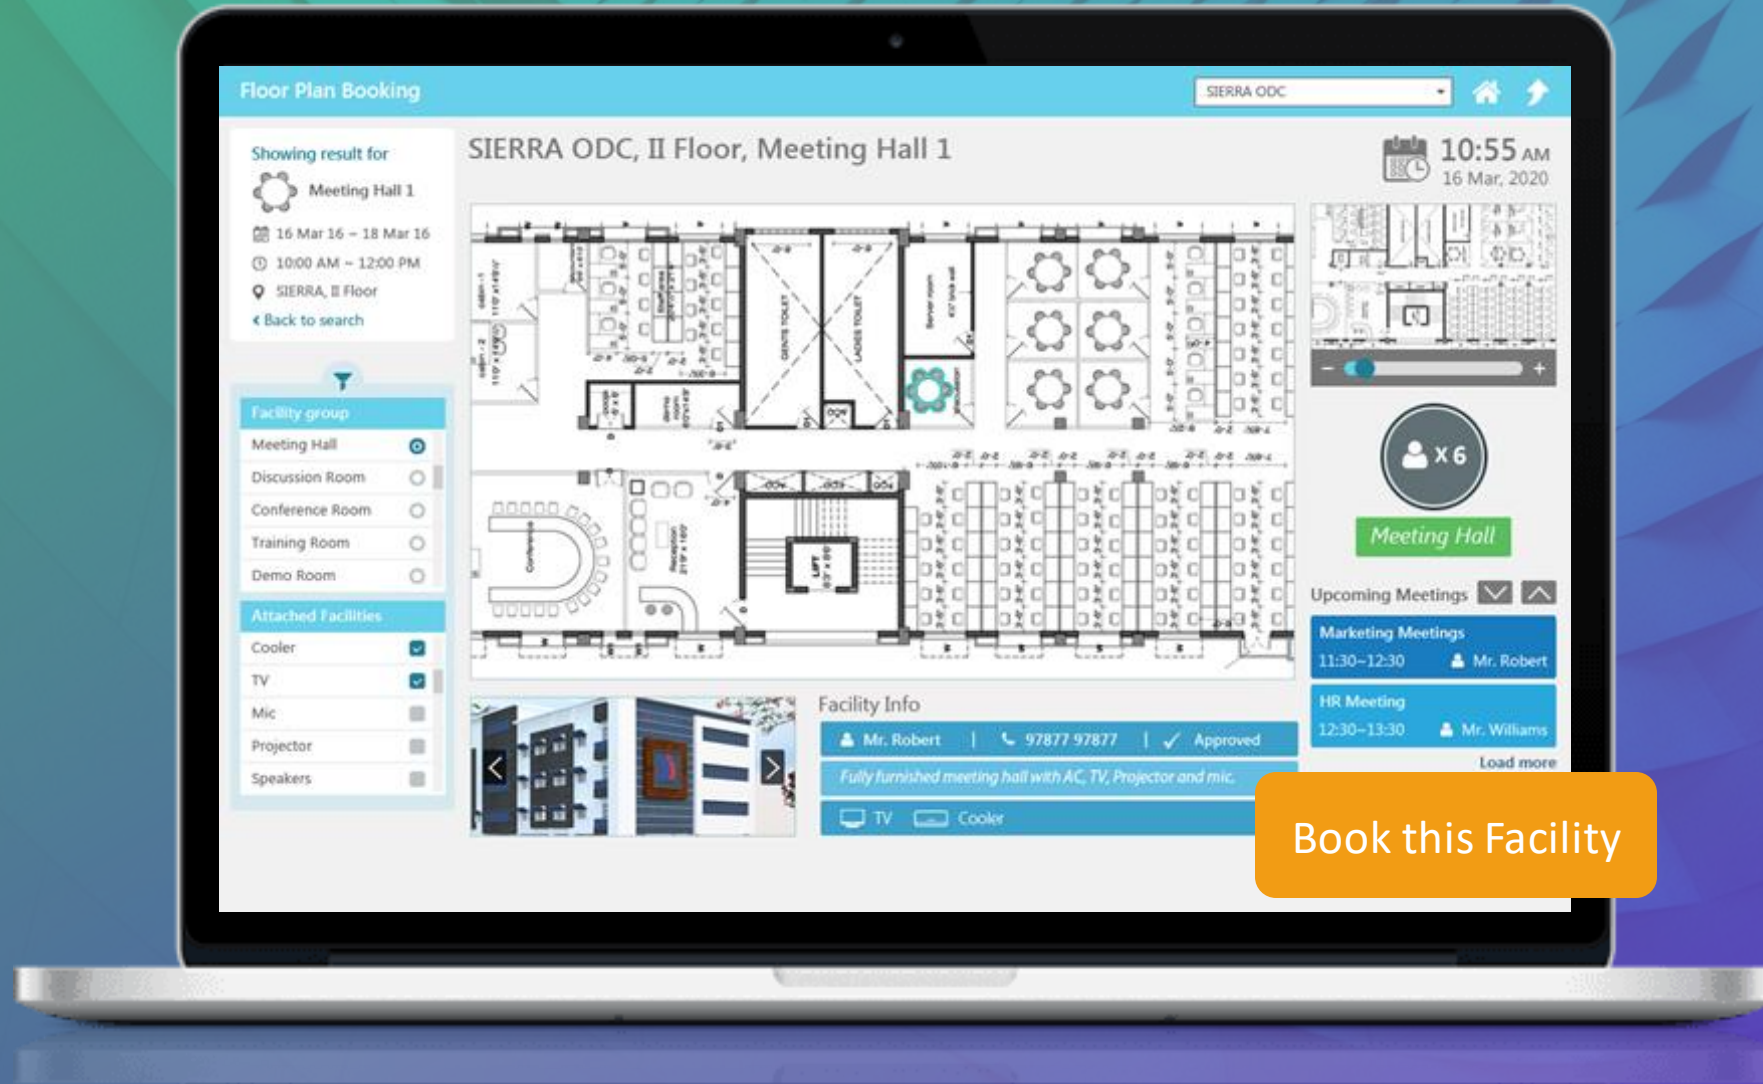

KEY FEATURES

- Facilities directory
- Online / Offline booking requests
- Visual booking using graphical interface
- Confirmation, rejection, suggestion of alternative facilities
- Re-allocation, cancellation, and block / extend booking
- Booking via Kiosks / Touch displays
- Billing with payment gateway integration
- Inviting internal and external attendees for meetings
- Pre-registration for meeting attendees with visitor management
- Reserve car parking spaces
- Integration with Access Control System, NFC, Active Directory and MS Exchange / MS

Projection Mode

SPACE PLANNING, OCCUPANCY MAPPING AND ANALYSIS

Integrated platform to automate & manage co-working spaces, optimize workspace planning and space utilization, allocate space, view utilization, book space via visual booking/hot-desking, floor plan integrations

SPACE MANAGEMENT SYSTEM

Tracks occupancy for utilization analysis and reporting

Configurable space allocation that is specific to defined time-slots and shifts

Optimize space utilization

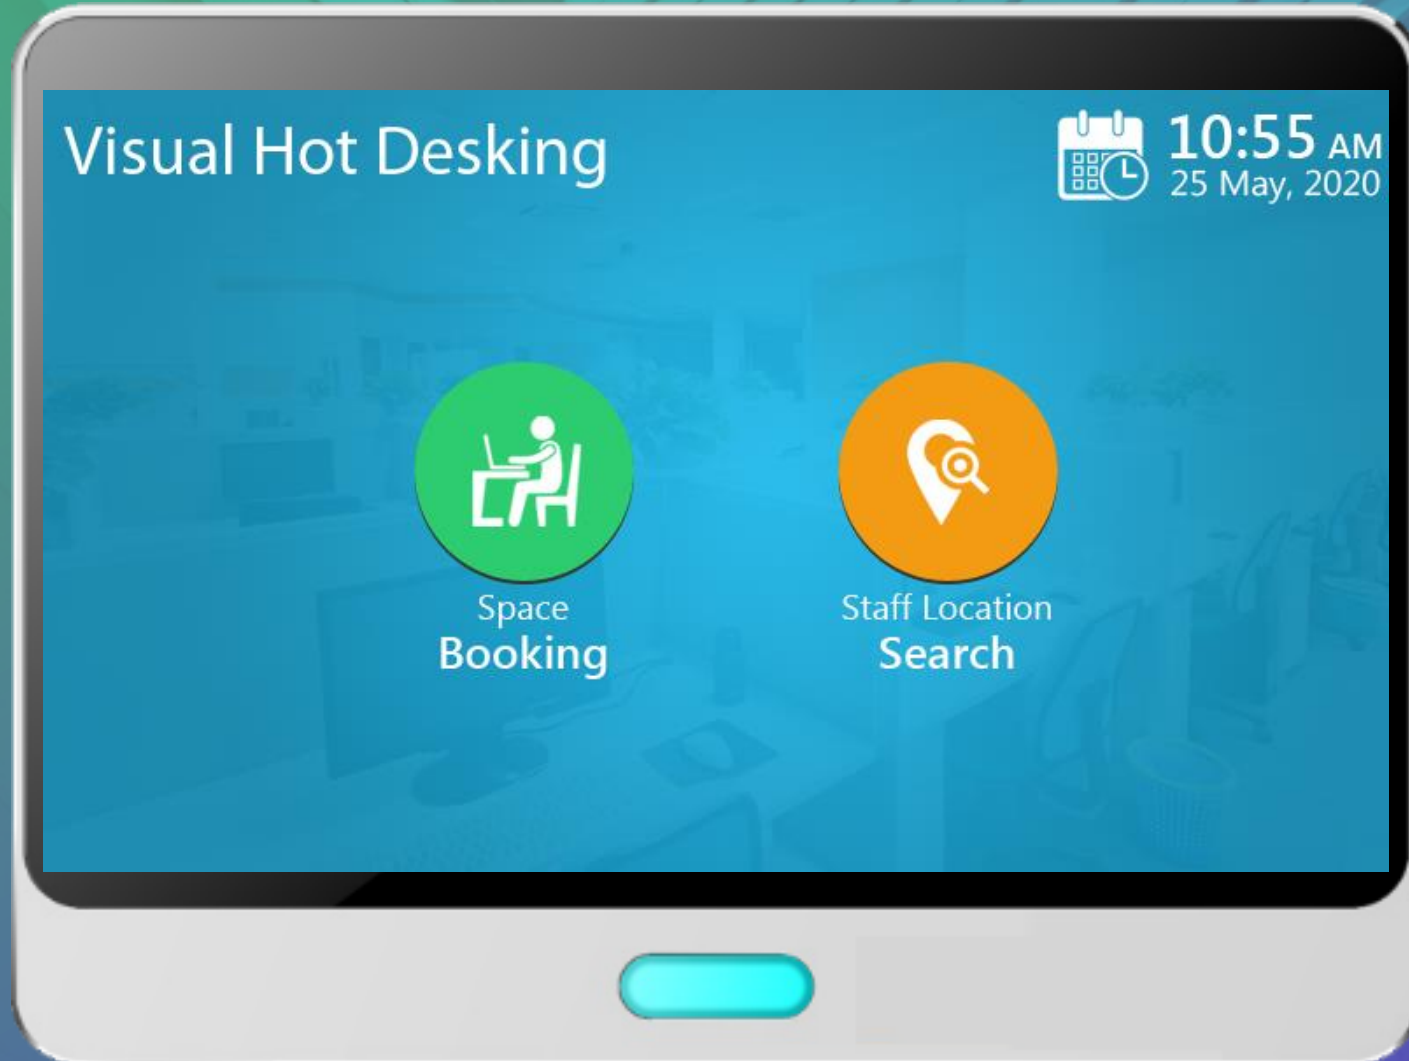

Department / project wise occupancy analysis, charge backs

KEY FEATURES

- Space assignment and allocation based on departments / Cost Centres / Projects
- Cross utilization billing between departments / Cost Centres / Projects
- Visual occupancy dashboards for space utilization analysis and optimization
- View occupancy / allocation / availability for the selected period
- Extensive reporting capabilities with occupancy charts, dashboards, plethora of reports
- Smart Facility App features
 - ✓ Instant booking of workspaces in a hot-desking environment
 - ✓ View space allocated for the day
 - ✓ Extend or cancel a booking
 - ✓ Dynamic My QR Code: Use as Entry Badge/Pass for entry gate security checks
 - ✓ Auto-Reminders for check-ins based on booking slots
 - ✓ Instant booking by simply scanning the QR code displayed at any shared workspace

SPACE BOOKING USING KIOSK

Fully Allocated

VISITOR REGISTRATION AND TRACKING MADE SIMPLE & SECURE

Futuristic Visitor Management System to screen visitors, quickly register, print badge passes and grant them time-bound access, highly configurable and designed to suit your custom workflows and enterprise needs.

VISITOR MANAGEMENT SYSTEM

Online requests for appointments

Pre-registration of groups / individual visitors

Blacklisted visitor / watch list verification

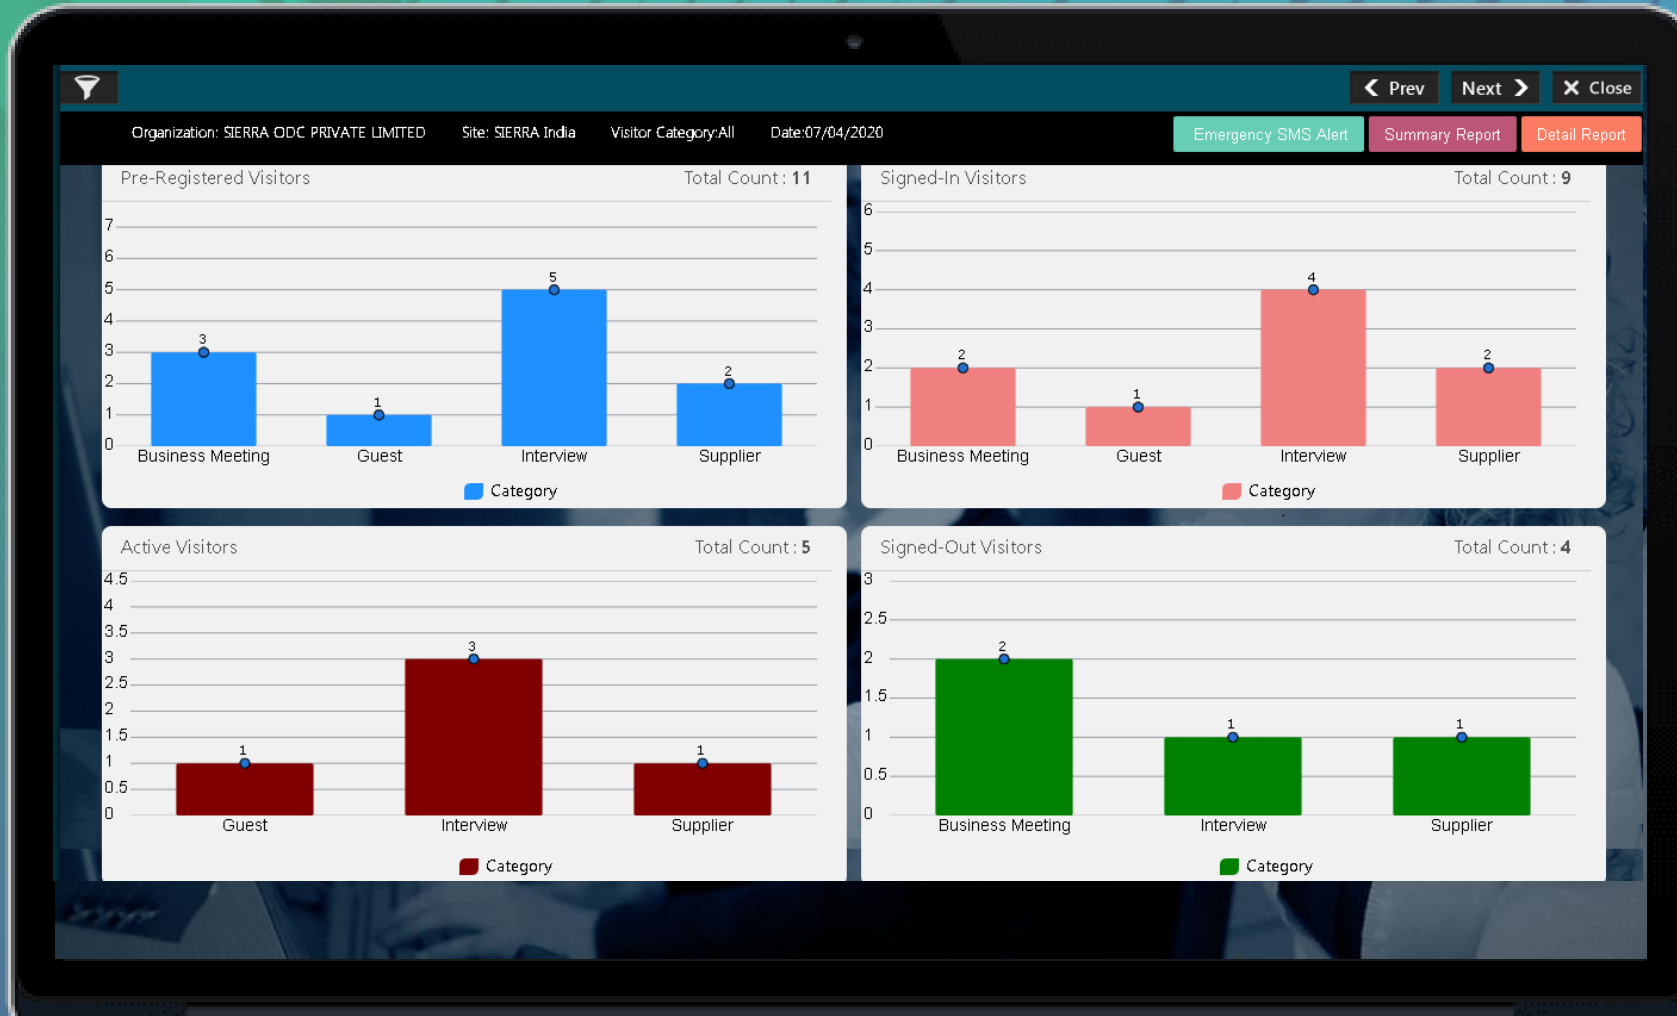

Customizable badge pass printing with facility visitor
regulations / disclaimers

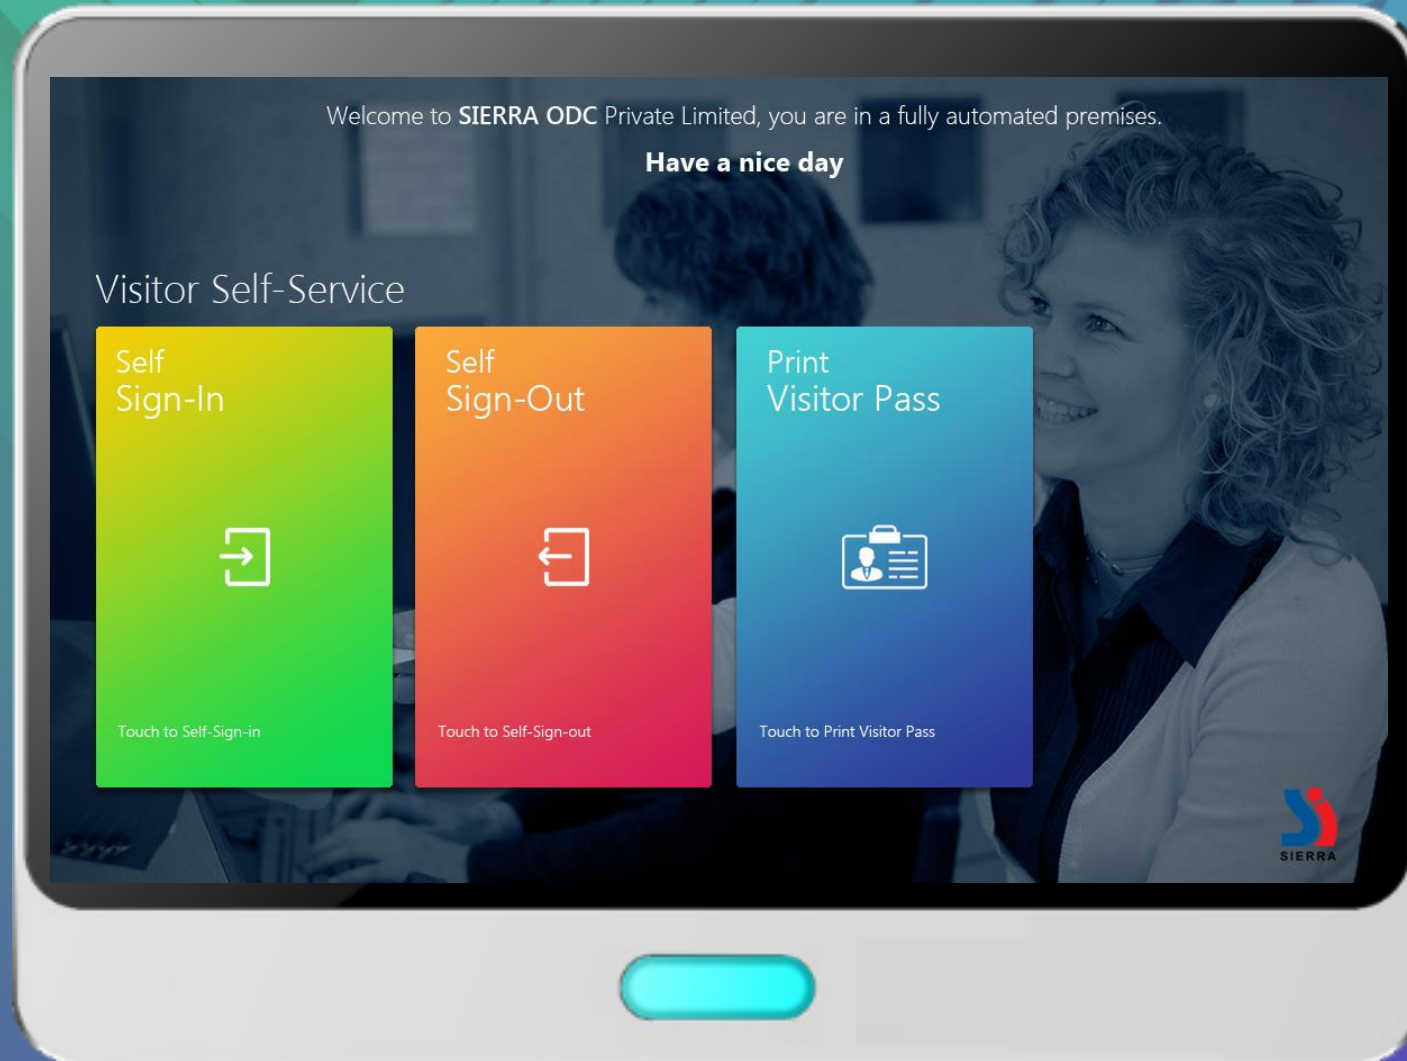

KEY FEATURES

- Appointment approvals and rejections
- Visitor self sign-in & sign-out using kiosks
- Email / SMS / App notifications on appointment requests, approvals, and rejections
- Enhanced visitor history tracking with visitor badges
- Visitor photo and signature capture, items carried in/out & returnable items tracking
- Time-bound & location-specific access validity management through Barcode / QR Code / NFC / RFID integration
- User-definable badge / gate pass designing with Barcode / QR Code
- Customizable badge pass printing with facility visitor regulations/disclaimers
- Visitor overstay alert to security and host
- Access Control System / turnstile gates integration
- Multi-level gate pass visitor's approval workflow
- Visitor movement dashboards, statistics and reports
- MS Exchange / MS Outlook integration for appointments calendar
- Aligns with ISMS, HSE, & GDPR compliance requirements

VISITOR DASHBOARD

VISITOR SELF-SERVICE KIOSK

ROSTERING, ATTENDANCE TRACKING AND LEAVE PROCESSING AT EASE

A comprehensive solution to increase employee productivity & business efficiency with employee attendance tracking, roster generation & leave management, seamless integrations with access control systems & HRMS / Payroll systems

TIME AND ATTENDANCE SYSTEM

Employee profile, shift management & rostering

Leave approval workflow

Track time-in and time-out of personnel

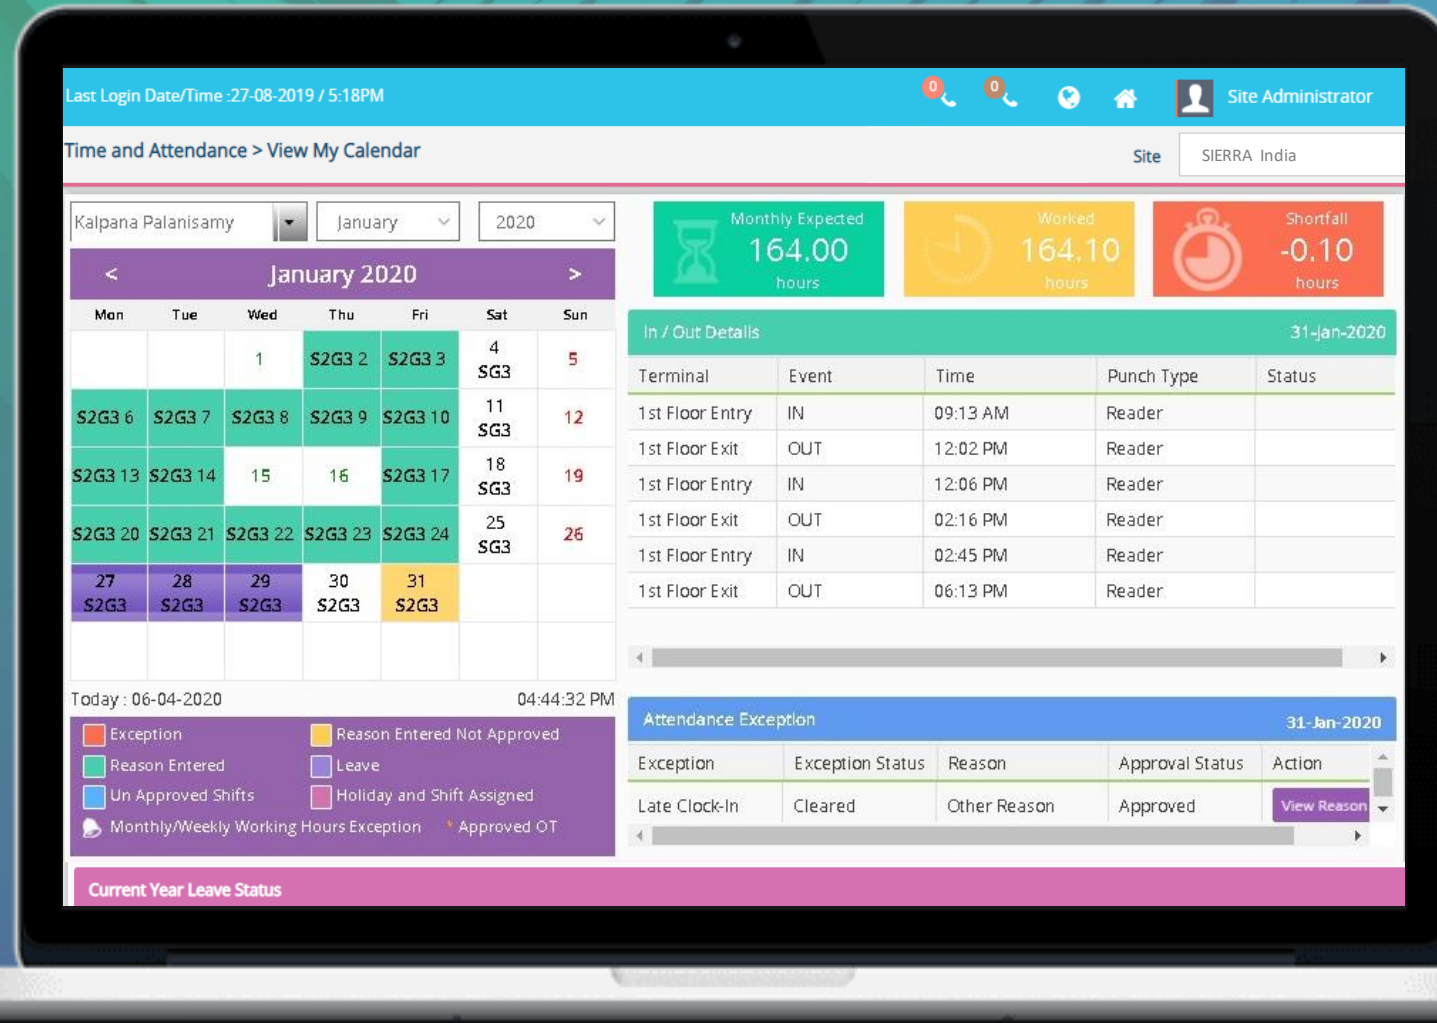

Overtime calculation and reporting

KEY FEATURES

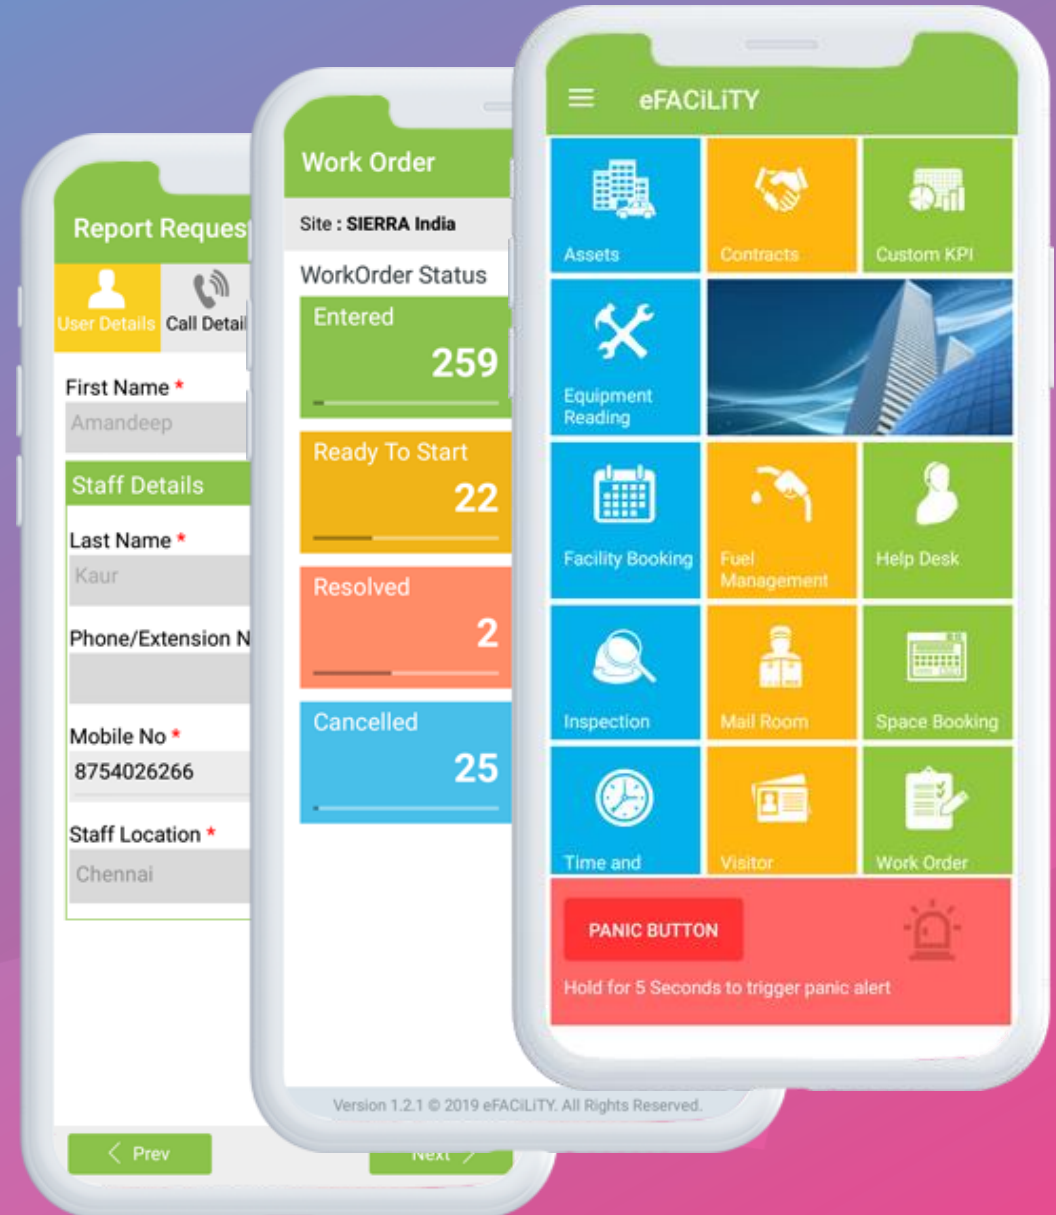

- Roster approval and re-assignment
- Employee / Department shift calendar
- Enhanced reminder email configuration for late clock-in, early clock-out & other exceptions
- Leaves / Permissions / On-duty requests, approval & allowances
- Integrates with multiple access control systems & HR / Payroll Systems
- Mobile SMS based clock-in / out and leave requests
- Configurable comp-off expiry definition
- Improved report filters & optimized data binding methods for faster reporting
- Preference / Priority based leave deduction for less hours worked exception

TIME AND ATTENDANCE SYSTEM - CALENDAR

SMART FACILITY MANAGEMENT USING MOBILE DEVICES

A smart application designed with high-end technologies that extends the web-based operations of eFACiLiTY® IWMS/CAFM to your mobile phones facilitating your workforce/facility managers/technicians to have a world-class experience in workplace management

SMART FACILITY APP

Optimized for use on iOS & Android tablet and smartphone devices, the app allows you to improve the efficiency of your workforce and increase the level of services delivered

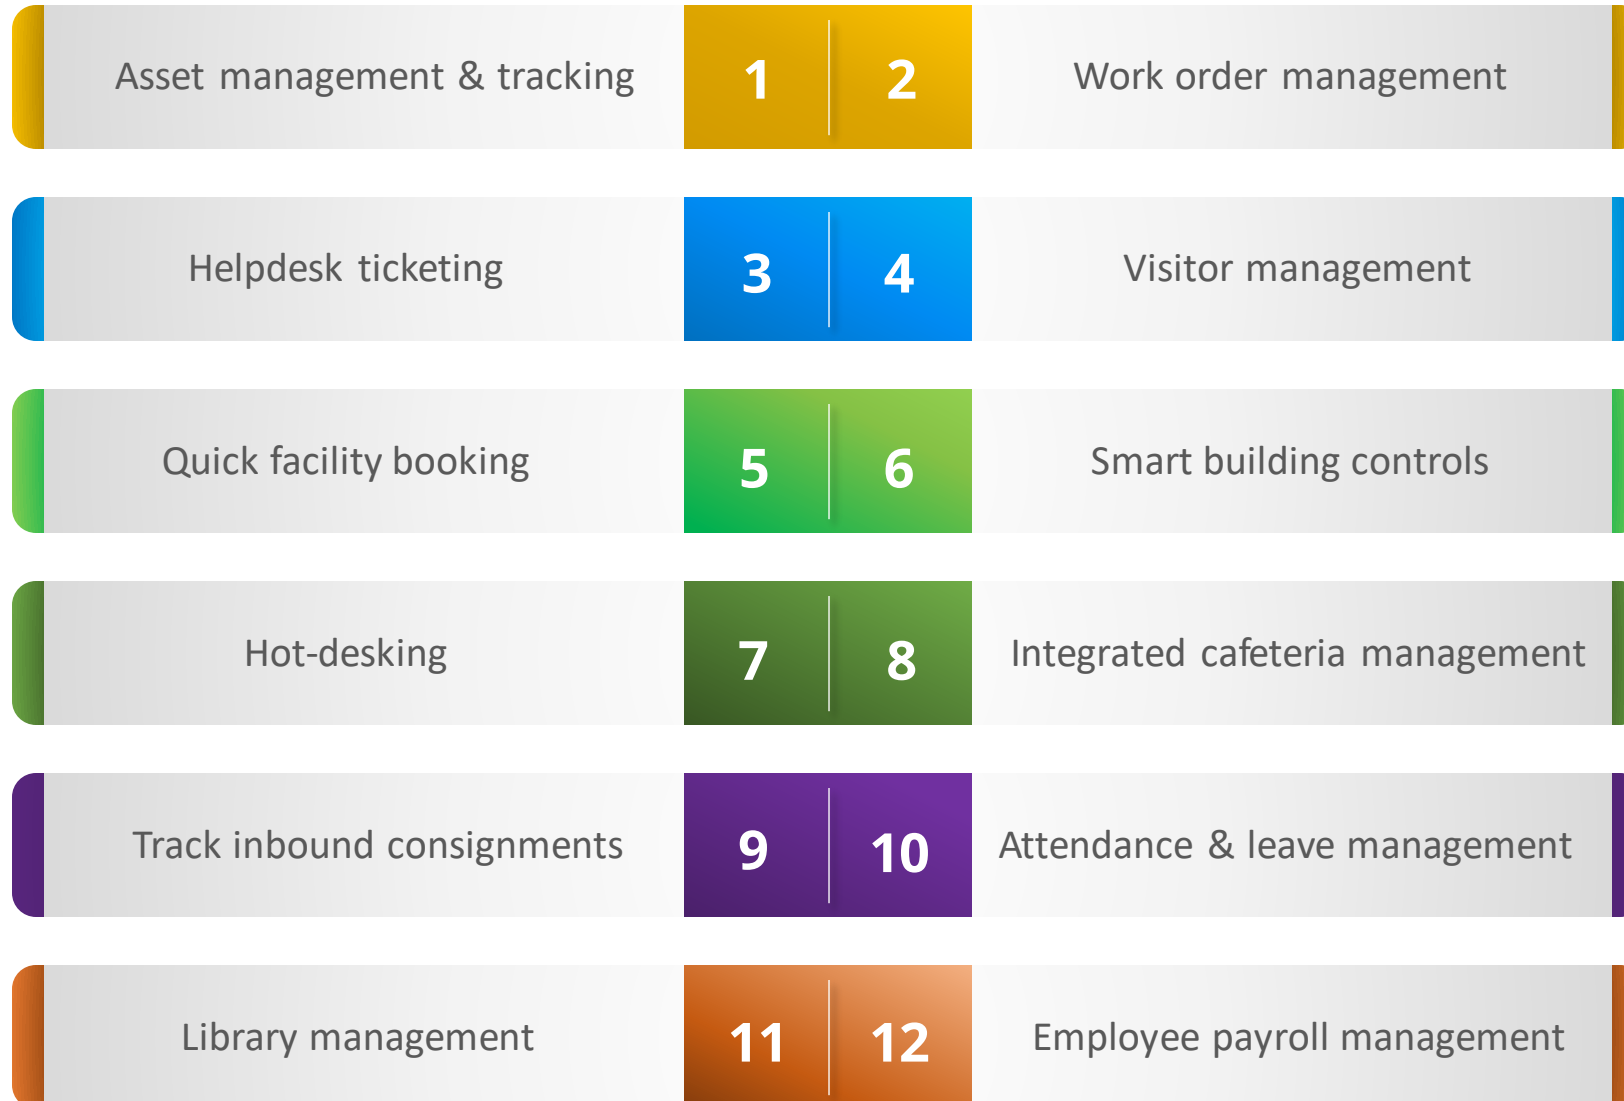

Instant alerts to the user's mobile device where they can view, follow instructions and complete their work

GPRS / Wi-Fi enabled devices and connects to the eFACiLiTY® server application to perform live operations

Offline work order management

Smart Facility App Comprises

ASSET MANAGEMENT

Significantly improves the pace and efficiency of the maintenance team, as it triggers instant alerts directly to the technician's mobile device to view & close the work order

Asset lifecycle management

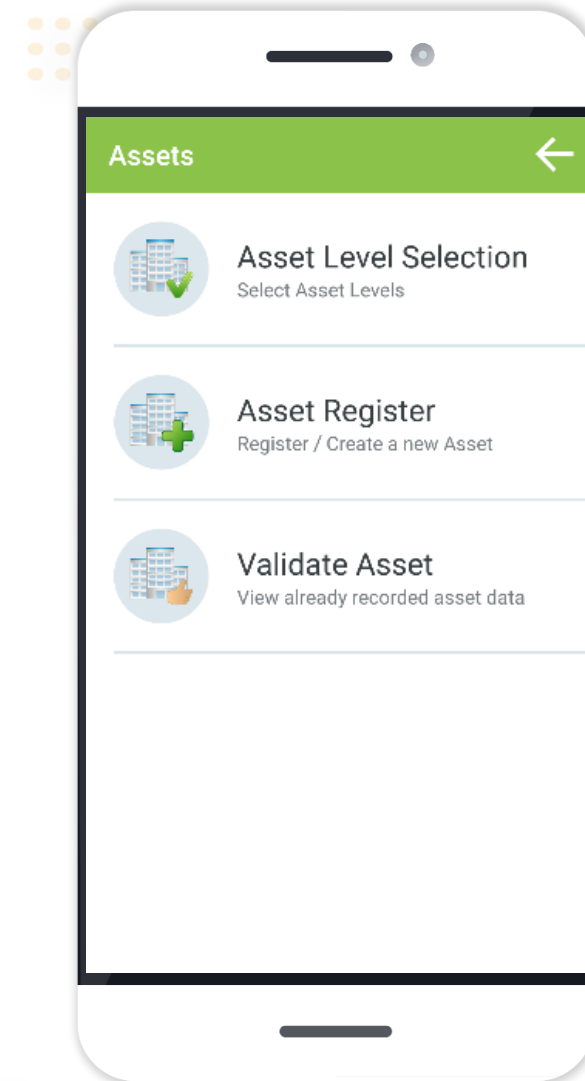

Asset creation by capturing basic equipment details

Periodic asset validation by comparing the data captured in the mobile device against the asset register

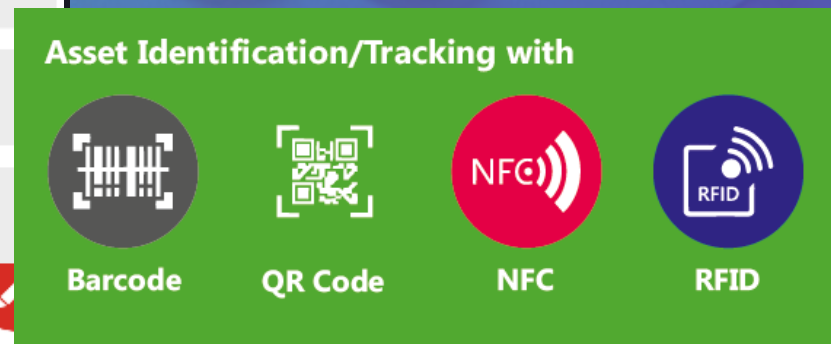

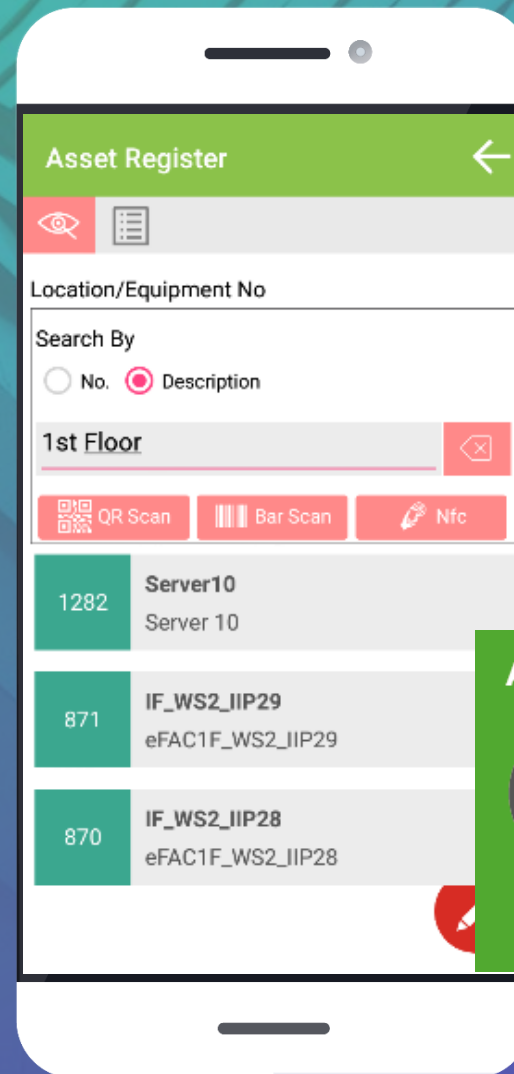

Integration with BIM for enhanced asset view

Asset validation & movements

Access to select the asset level for creating and tracking new asset equipment

ASSET REGISTER

WORK ORDER MANAGEMENT

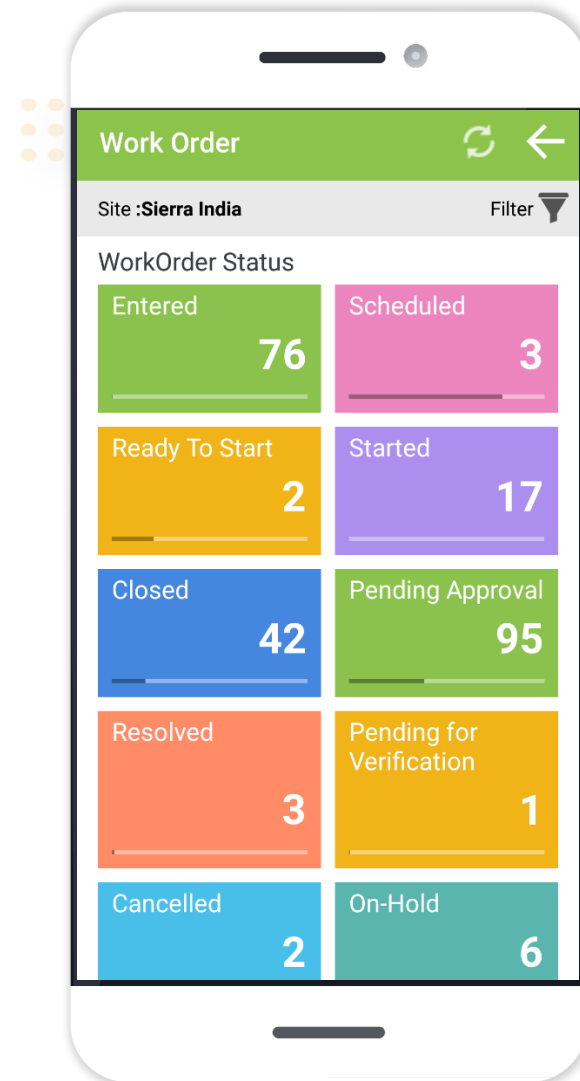

Quick & interactive view on work order status

Easy and effective maintenance scheduling

GPS based work order scheduling

The users/technicians can view & update assigned work orders

- Update completed work order details
- Update time spent against the work order (Timecard)
- Update Consumables utilized against the work order

eFACiLiTY® Smart Facility App - Notifications

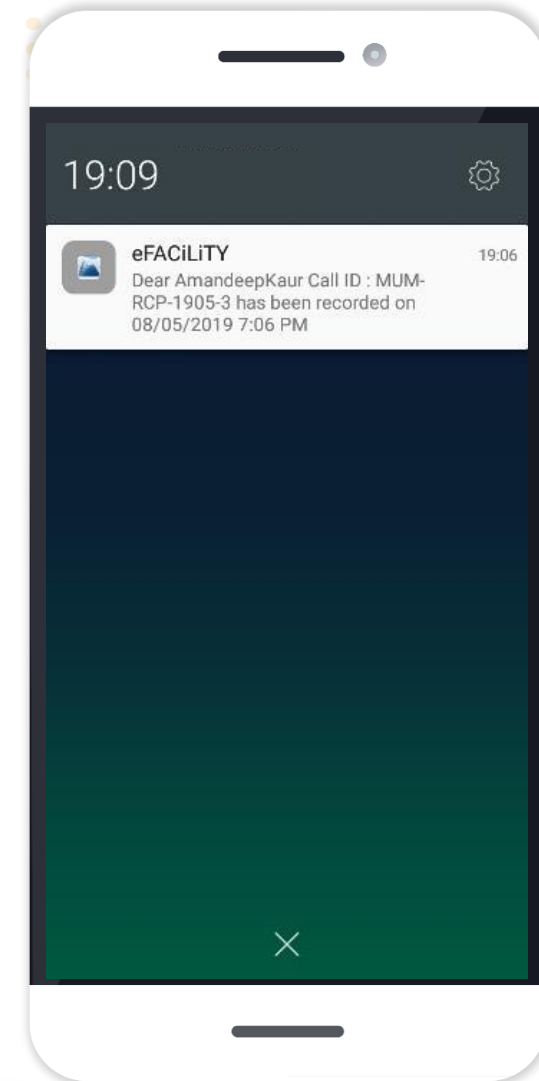

Easy to manage app notifications that are functionality targeted, user friendly and relevant to the user

Interactive notification feature enhances better user engagement and real-time communication

- For Android - FCM Firebase Cloud Messaging
- For iOS – Apple Push Notification Service

Prompts email notifications, SMS alerts, app notifications and WhatsApp notifications

eFACiLiTY® works on the Google Android 4.0+ and Apple iOS 6+ operating systems

Requirements to Launch the App

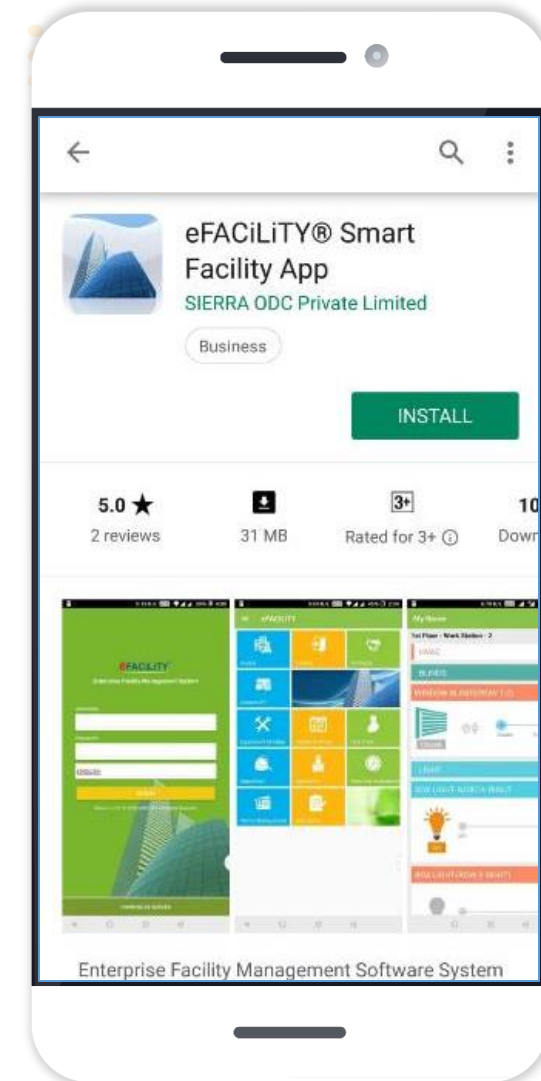

eFACiLiTY® Smart Facility App aims at working with environment specific mobile device management approach

Android device users can directly download eFACiLiTY® Smart Facility App from Google Play Store and launch the application in their mobile devices

Incase of iPhone devices, B2B approach is adopted (Business to Business approach)

The requirements to launch the eFACiLiTY® Smart Facility App in client own store for apple devices includes:

- A dedicated Apple Device
- Organizational Mail ID : An organizational email address that hasn't been used as an Apple ID for any Apple service or website

Security Standards

- Enabled Data Validation & Integrity Checks
- Disabled Debug Code
- Enabled Jailbreak / Rooted devices detection
- Tested for Vulnerabilities
- Enabled SHA 2 Password Encryption
- Secured & Encrypted Service Requests with Authentication
- Disabled Clipboard Options
- Sanitized Background Image
- Disabled Normal Screenshot Capture
- Citrix Support

AUTOMATE YOUR TENANT UTILITIES BILLING

Utilities billing software to manage property/tenant/lease/owner information, tenant subscriptions & their history, capture and generate invoices based on the consumption of services/utilities

TENANT BILLING SYSTEM

Manage property, tenant / owner, lease and contract information

Zone wise & slab wise utility charges

Automated meter readings via BMS / BAS systems

Automated bill generation

KEY FEATURES

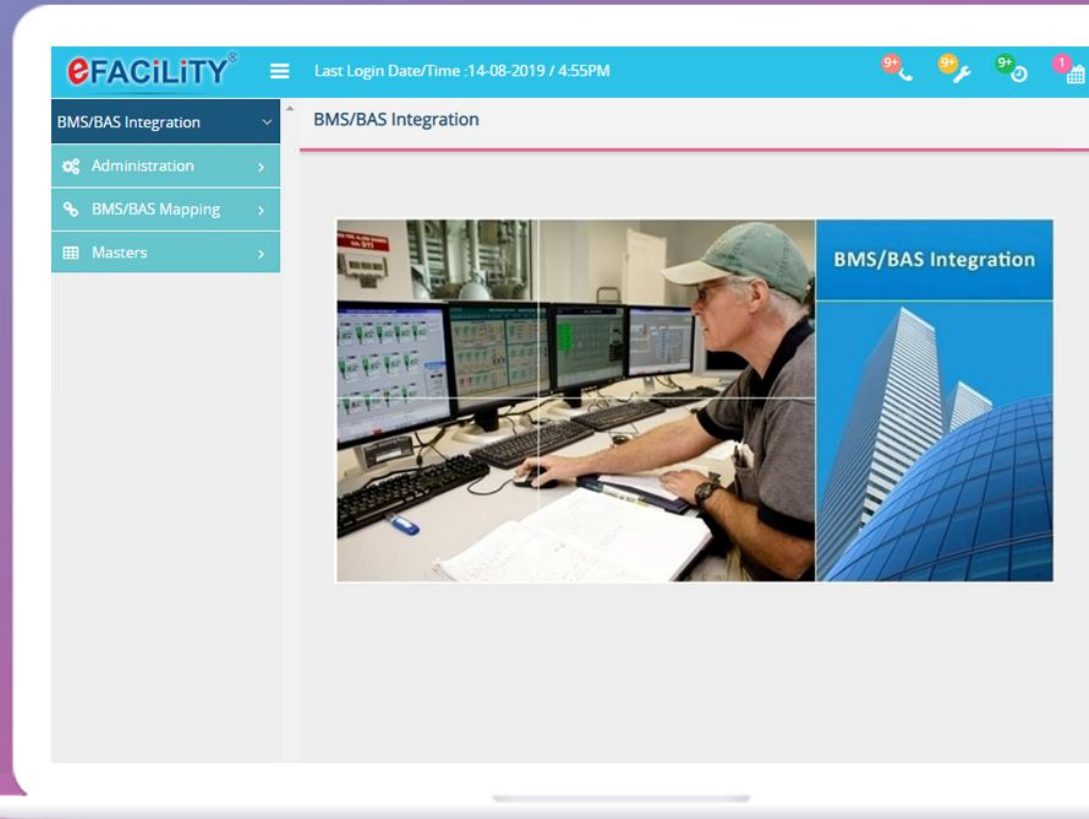

- Tenant move-in, move out & subscriptions
- Setting up of rate card with respect to service, slab, property, group for various timeline
- Import of meter readings or manual input
- Bill generation and mass emailing / printing
- Multiple in-built consumption logic and ad-hoc services billing
- Tenant payments, expenses and credit notes tracking
- Bill registers, tenant ledgers, receivables statement
- Occupancy / Vacancy & payment status analysis
- Reminders for lease contracts nearing expiry
- Integrates with other financial applications
- Invoice template designer with consumption pattern and carbon footprint
- Management of concessionaire charges

DASHBOARD

Integrate readily with popular Building Management System/Building Automation System (BMS / BAS)

Automatic work order triggering, switching HVAC/ Lighting, automated tenant billing, Email/SMS/App Notifications

BMS / BAS INTEGRATION

BMS Alarm based automatic work order generation

Automated meter reading and tenant billing

Trigger usage based preventive maintenance work orders

BMS / BAS INTEGRATION

eFACiLiTY® tightly integrates with popular Building Management Systems (BMS) and Building Automation Systems (BAS)

FEATURES

Alarm based work orders

Usage based preventive maintenance
work order generation

BMS/BAS Integration

Integrates with devices supporting
BACnet, Modbus, KNX

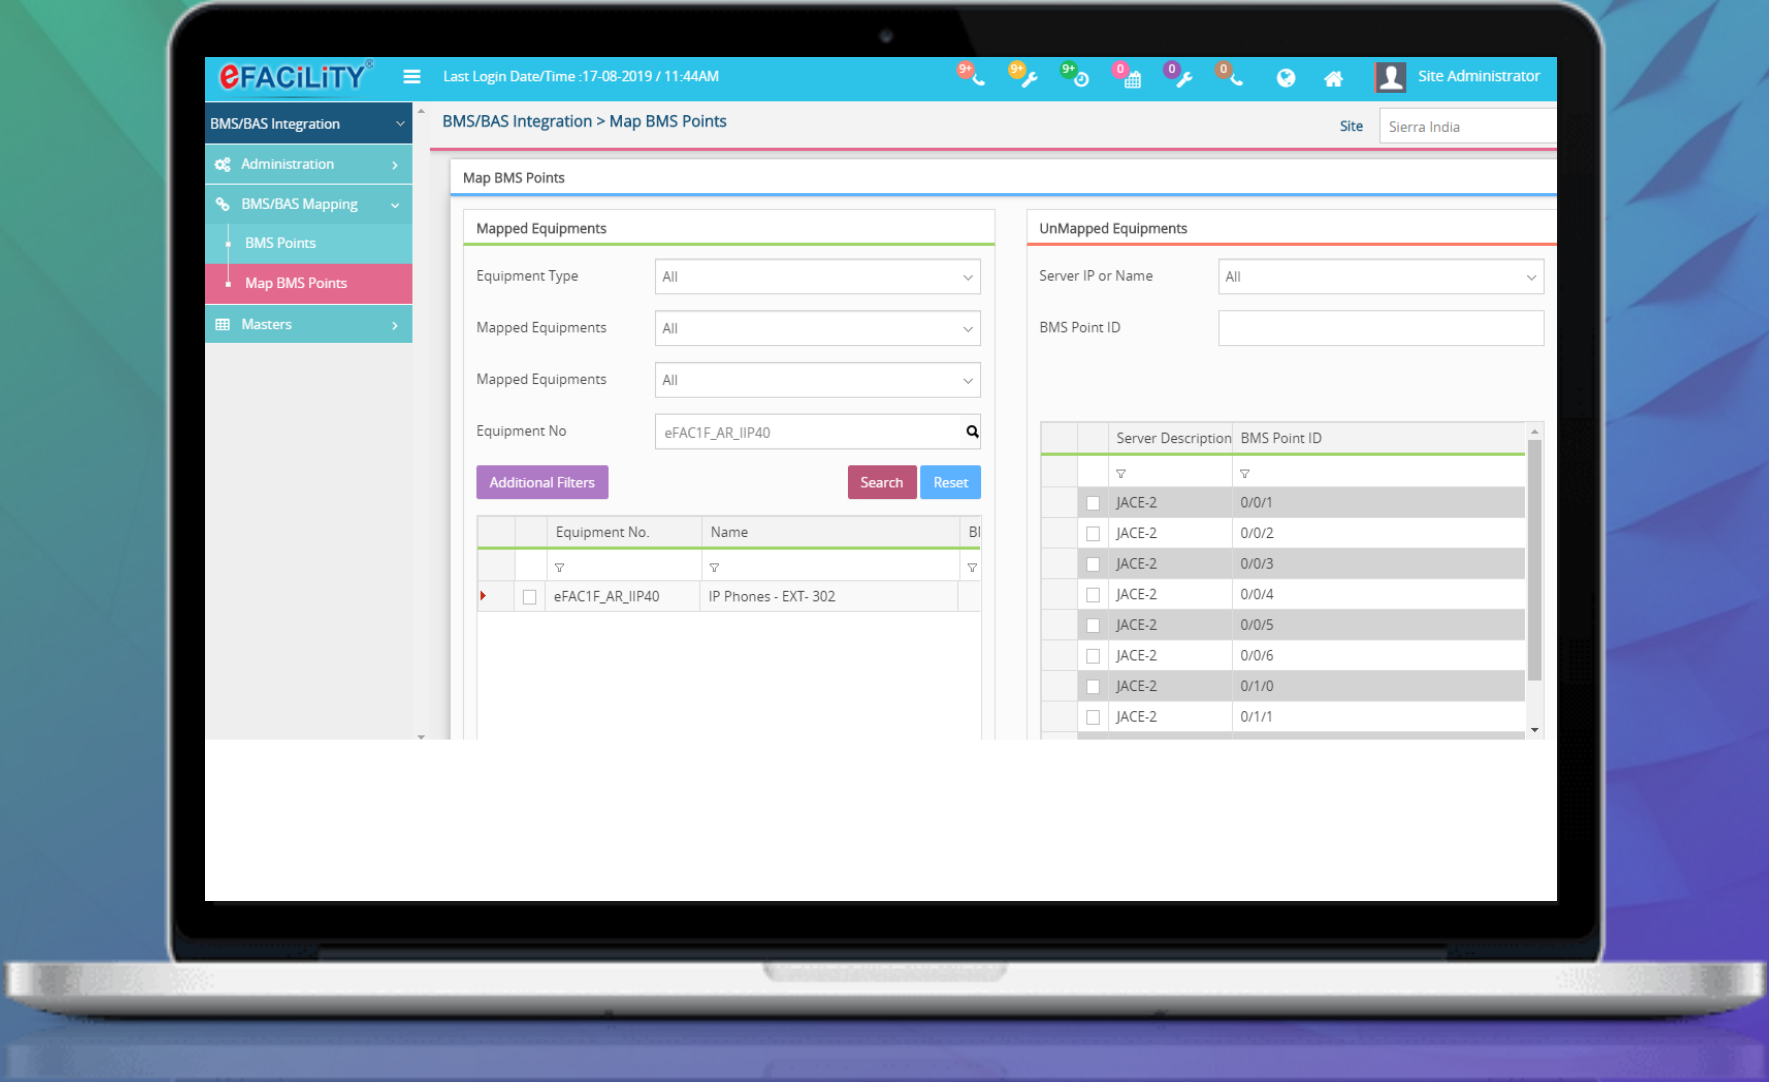

ALARM BASED WORK ORDER TRIGGERING

- The alarms triggered by the functional building/facility systems (building control systems, M&E services, fire protection, CCTV system, access control, security systems, etc.) can be captured by eFACiLiTY® Maintenance Management module via BMS/BAS systems
- The work order is automatically generated and emailed to the contractor or technician responsible to fix the same along with an SMS alert

USAGE BASED PREVENTIVE MAINTENANCE WORK ORDER GENERATION

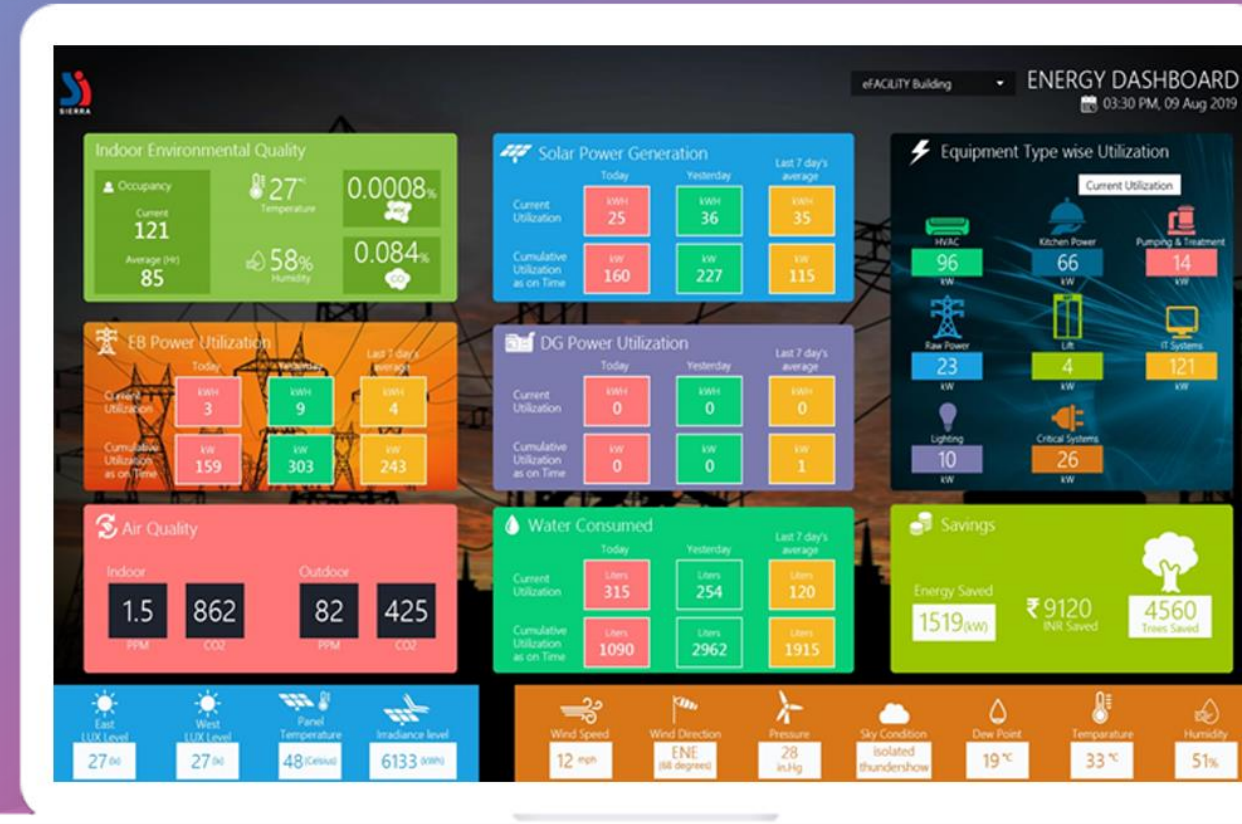

- All critical equipment that needs maintenance based on its usage can be frequently monitored. If the recorded readings exceed the pre-defined threshold, an automatic work order will be triggered and assigned to a technician automatically
- Automatic work order schedules will be sent to the technician/contractors through email/SMS/push notification along with work order details (Spares, Tools, Tasks, etc.,)

BMS / BAS INTEGRATION

INTUITIVE ENERGY UTILIZATION DASHBOARDS FOR EASY MONITORING

A high-level view of the energy utilization, water consumption, indoor environmental quality, outdoor parameters, green power generation and monetary savings with drill-downs for more detailed analysis

ENERGY DASHBOARDS

Resource wise consumption trends

Alerts on excess utilization

Green building certification related reports and Monetary Savings Reports

KEY FEATURES

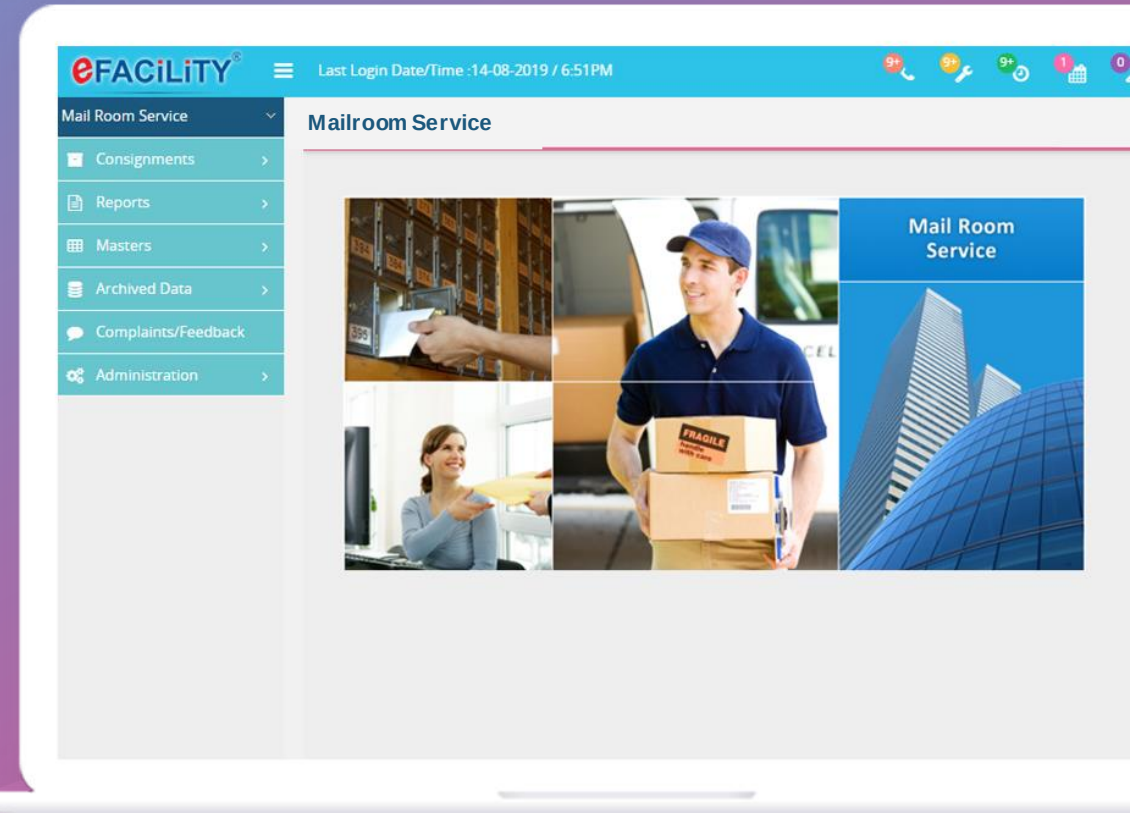

- Alerts on consumption beyond pre-set limits, excess utilization
- Bar / Trend / Pie charts for easy data analysis
- Comparison on various data on Water Consumption, Solar Power Generation, Air Quality Levels, Occupancy Levels etc.
- Concise and credible details on carbon footprint for Enterprise Carbon Accounting
- Records history for increase or decrease in consumption for future analysis
- Integration with IoT based sensors/devices to display the Air Quality - VOC, CO₂, PM₁₀, etc.

COMPARISON SUMMARY REPORT

SOFTWARE TO SUPPORT YOUR MAILROOM MANAGEMENT NEEDS

Web-based mailroom management software to automate corporate mailroom operations, track incoming / outgoing consignments, scan & print consignments with barcode / QR code and generate invoices

MAILROOM MANAGEMENT SYSTEM

Easy tracking of incoming and outgoing consignments

Provision to generate Barcode / QR code for the consignments

Triggering alerts on receipt / delivery

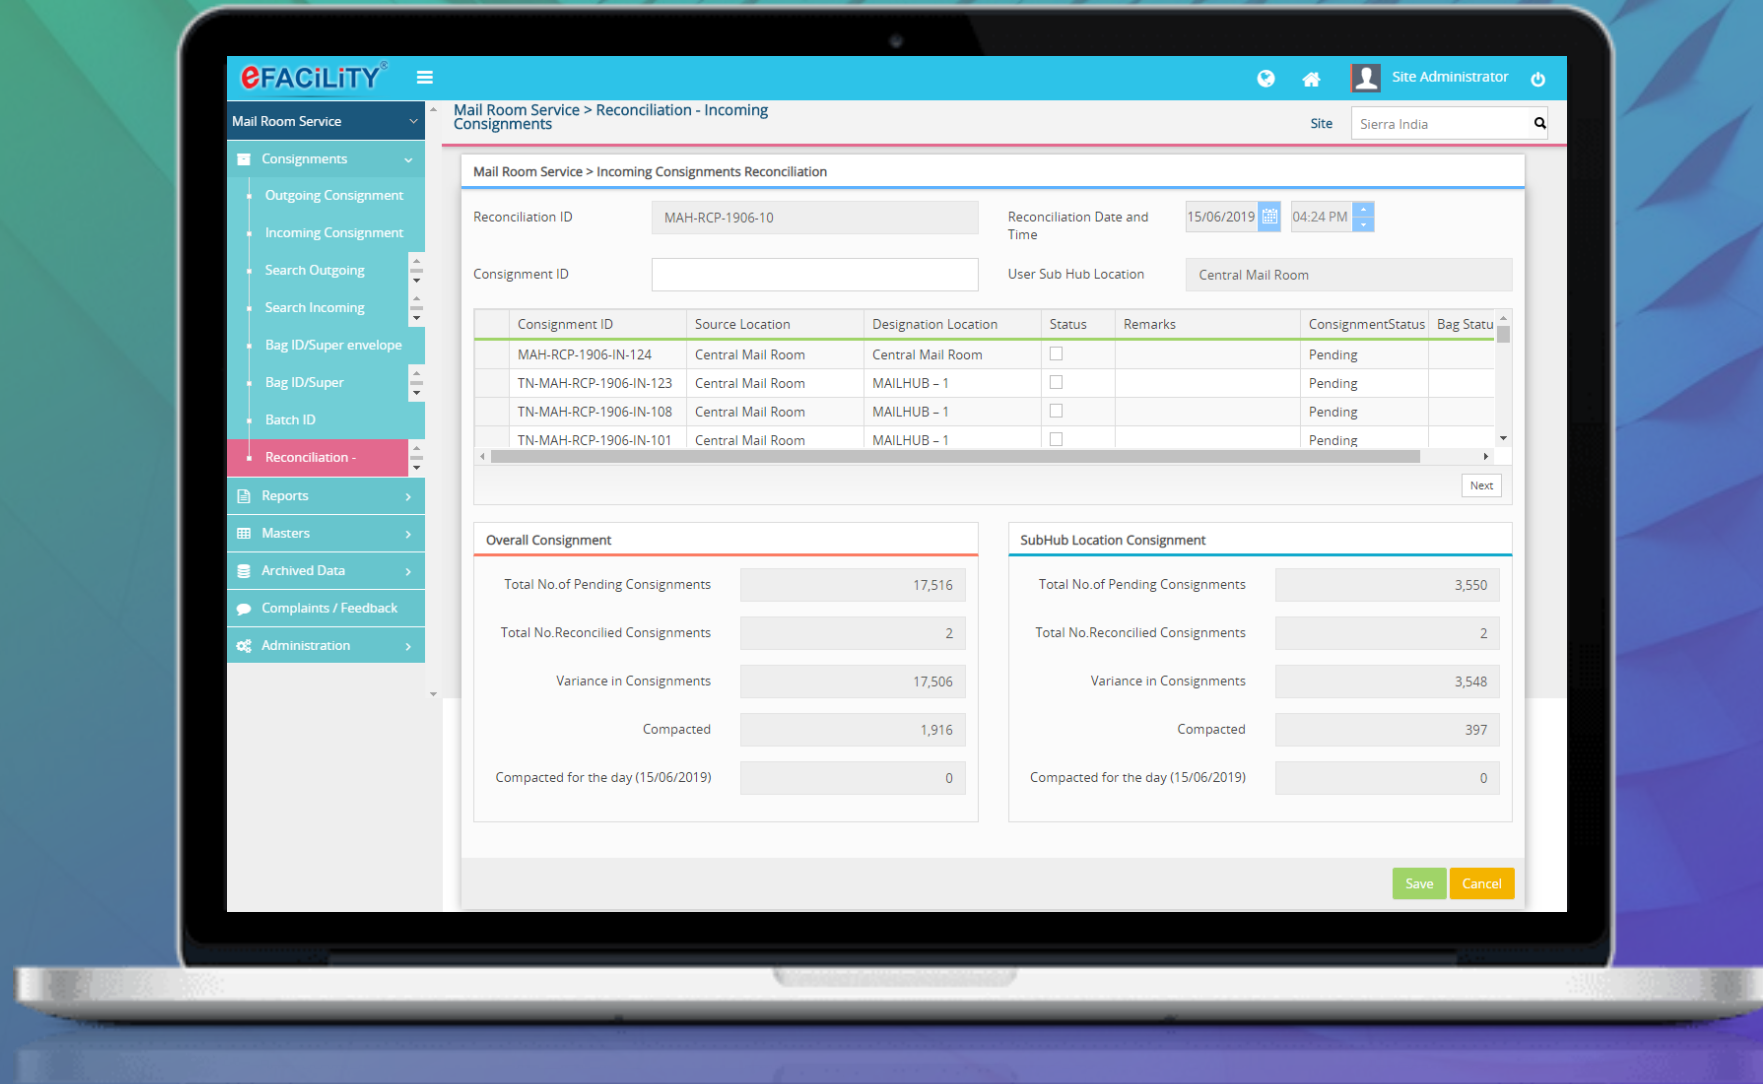

Mail Reconciliations

KEY FEATURES

- Enter / update all the consignments received for delivery
- Bulk / batch processing / delivery of consignments through bag / super envelope with recipient's signature
- Printing consignment number with respect to checklist / sender / consignment number / destination
- Printing as per the courier / postal / by hand
- Triggering of mails to the sender and receiver once the consignment is delivered from the mailroom
- User-definable consignment charges – Consignment type-wise, Courier Service Provider-wise
- View the pending consignments to be delivered
- SLA based on the type of consignments
- Performance analysis of Courier Service Provider
- Configurable reminders and consignment compacting alerts

MAILROOM MANAGEMENT SYSTEM – CONSIGNMENT RECONCILIATION

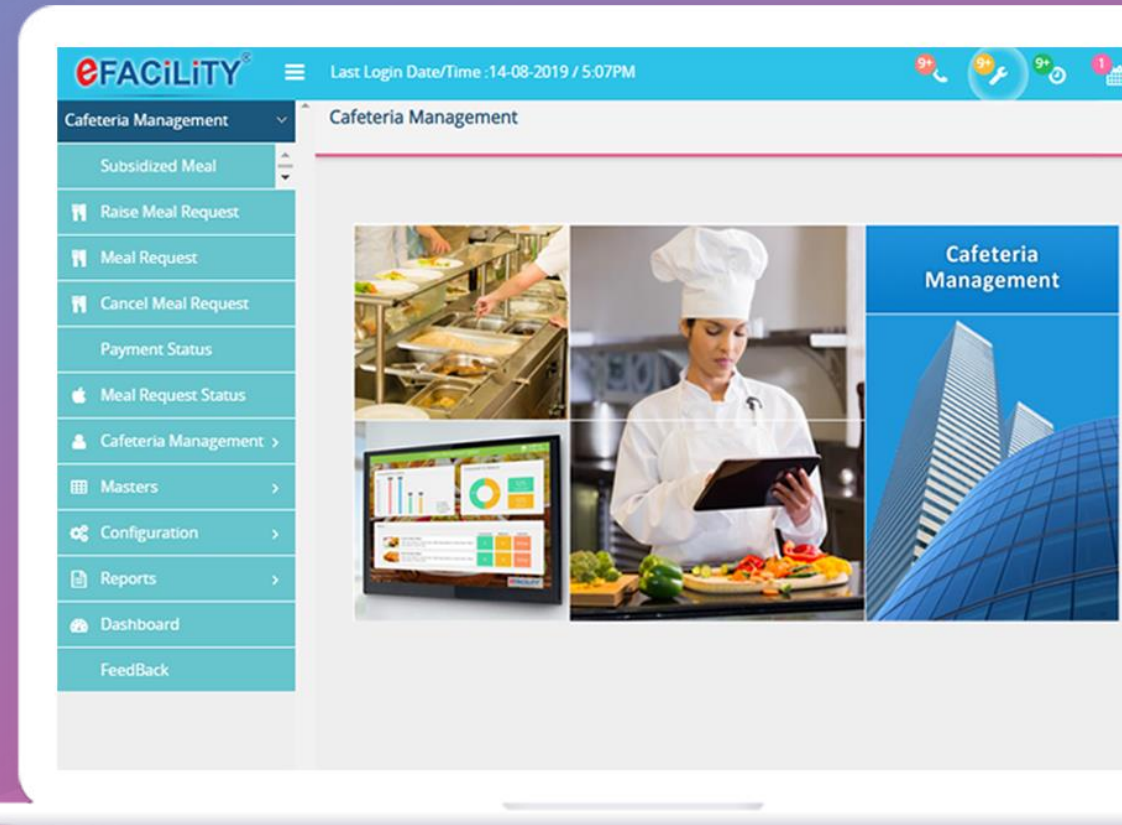

MAILROOM MANAGEMENT KIOSK

INTEGRATED CAFETERIA MANAGEMENT SYSTEM

Designed to simplify cafeteria operations in both private and vendor managed cafeterias / food courts operating in corporate offices, business parks, single & multi-tenanted complexes

CAFETERIA MANAGEMENT SYSTEM

Employee meal booking via Web, Mobile app, and Kiosks

Large screens displays with Calorific and Nutrient values with Allergen tags

Kitchen Inventory module with Bill of Materials

Food waste monitoring & reporting

Kitchen routine maintenance, inspection, and asset tracking

KEY FEATURES

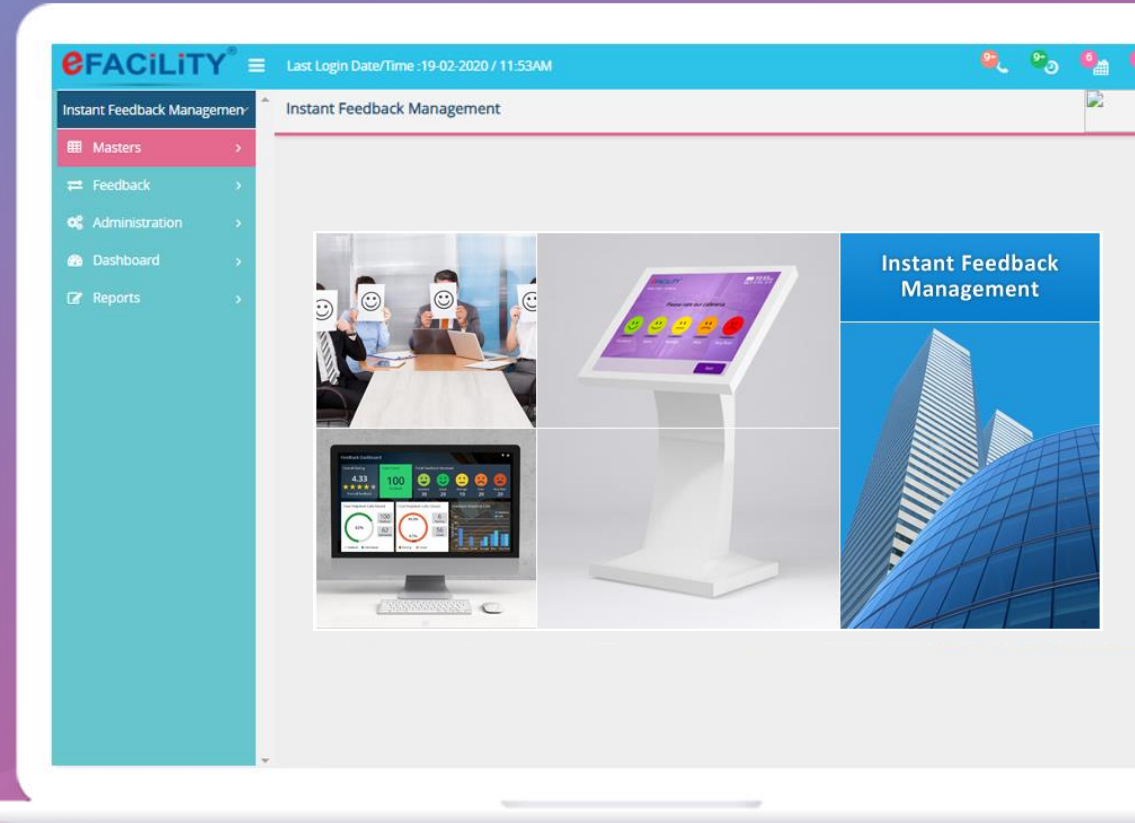

- Subsidized meal request management
- Setup & display daily menus with nutrient and calorific values
- Personalized health reports (nutrient values, time of consumption)
- Provision to track ad-hoc orders
- Real-time dashboards to track consumption, display committed, consumed & balance list
- Kitchen Inventory & Procurement Management
- Recipe management & ingredients pick list
- Feedback kiosks to collect instant feedback
- Time & Attendance integration to calculate the expected meal count and payroll integration for deduction of employee meal expenses
- Facility Booking system integration to book private dining space
- Visitor Management system integration to book meal for guests
- Payment Gateway Integration

DASHBOARD

HIGHLY CUSTOMIZABLE FEEDBACK MANAGEMENT SYSTEM

Facility owners can set up feedback questions for washrooms, work / visitor areas, cafeteria, reception, etc., to collect feedback from the end-users / occupants / guests or visitors to improve and optimize your facility experience

INSTANT FEEDBACK SYSTEM

Cross functional feedback within the facility

Dashboards for different kind of analytics and drill-down analysis reports

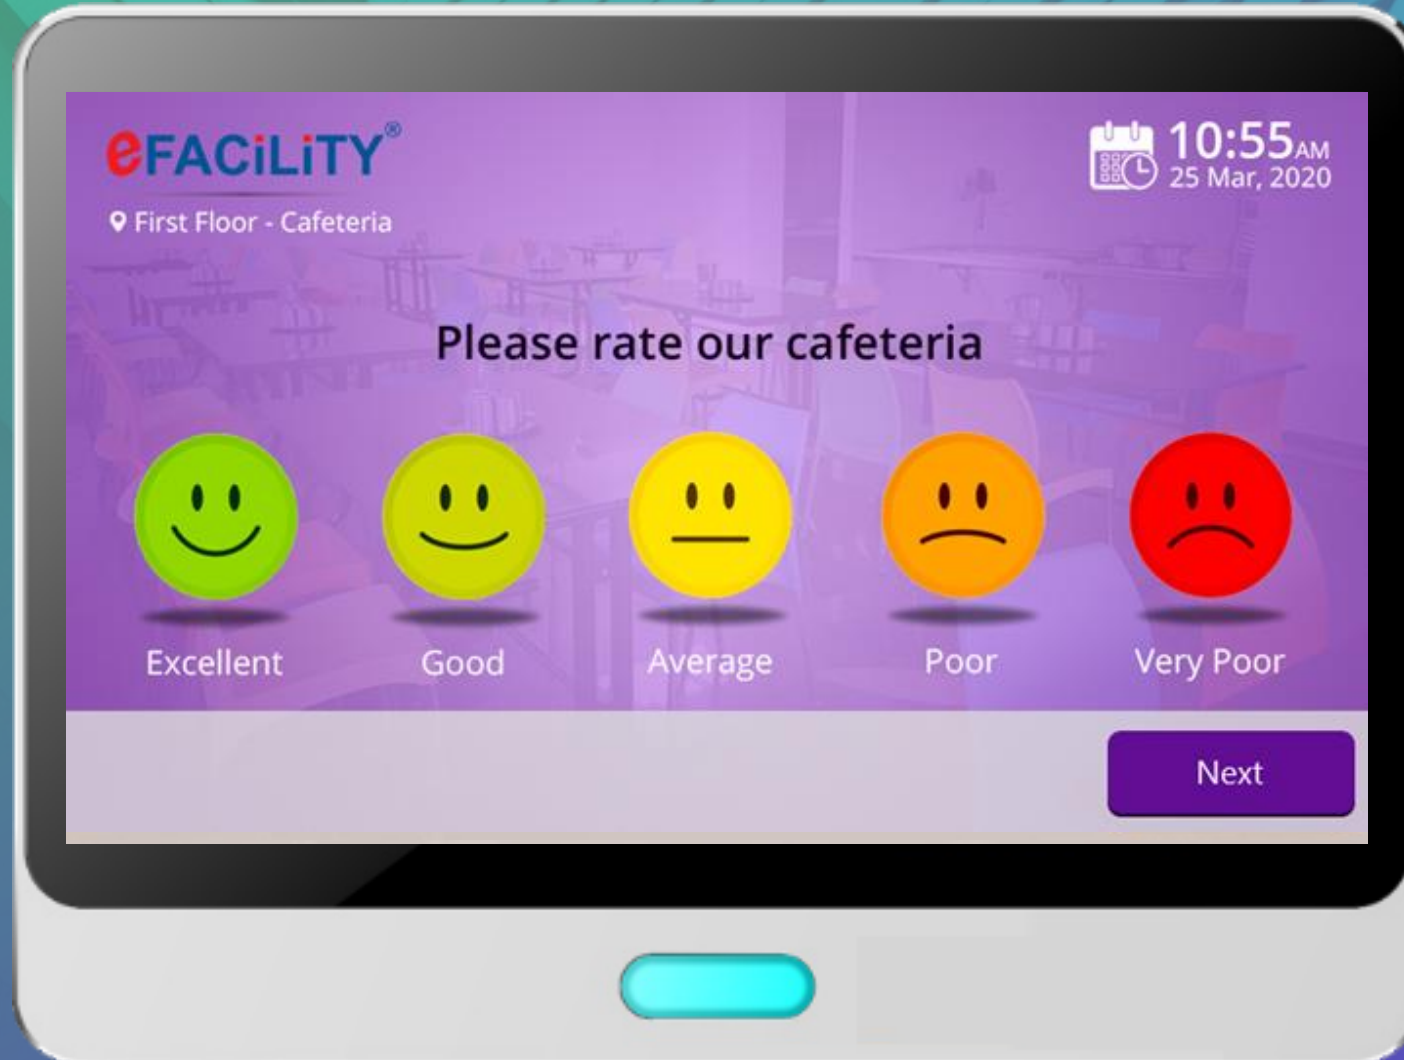

Configurable feedback ratings

KEY FEATURES

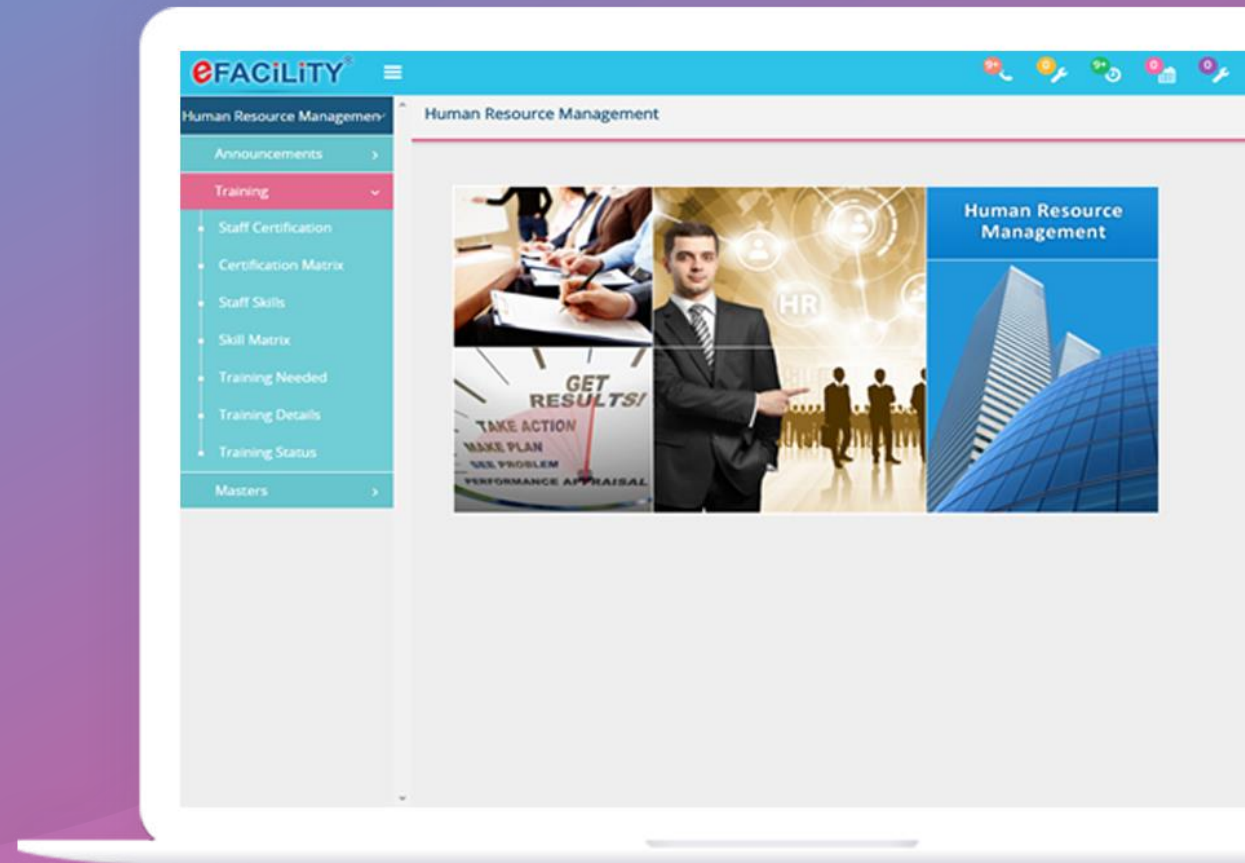

- Web / Kiosk / NFC / access card based feedback system for authenticated users
- Users without authentication can use Kiosk to register details
- Site / Location specific feedback configurations
- SLA monitoring and corrective action updates to the requestor through helpdesk integration
- Scanning of QR codes to provide feedback
- Single touch feedback enabling facility
- Mobile interface for providing quick feedback
- Templates with user definable texts, questions, ratings and background images based on location & screen type
- Configurable mail, SMS and app notification content
- Feedback analytics via custom dashboards based on the average rating of all feedbacks

INSTANT FEEDBACK KIOSK

HOLISTIC SOLUTION FOR HUMAN RESOURCES MANAGEMENT

Automate and manage all post-recruitment HR functions i.e., employee profile management & role-wise skill matrix for training need assessment, performance improvement and performance development planning (PIP & PDP)

HUMAN RESOURCE MANAGEMENT SYSTEM

Maintain employee profiles and manage employee database

Provisions for skill management and certification for scheduling targeted skill development programs

Customized report generation options for in-depth analysis and improvements

Dashboards for displaying upcoming events, important announcements, news and other key events

Configurable and customizable workflow engine for effective organizational process compliance

KEY FEATURES

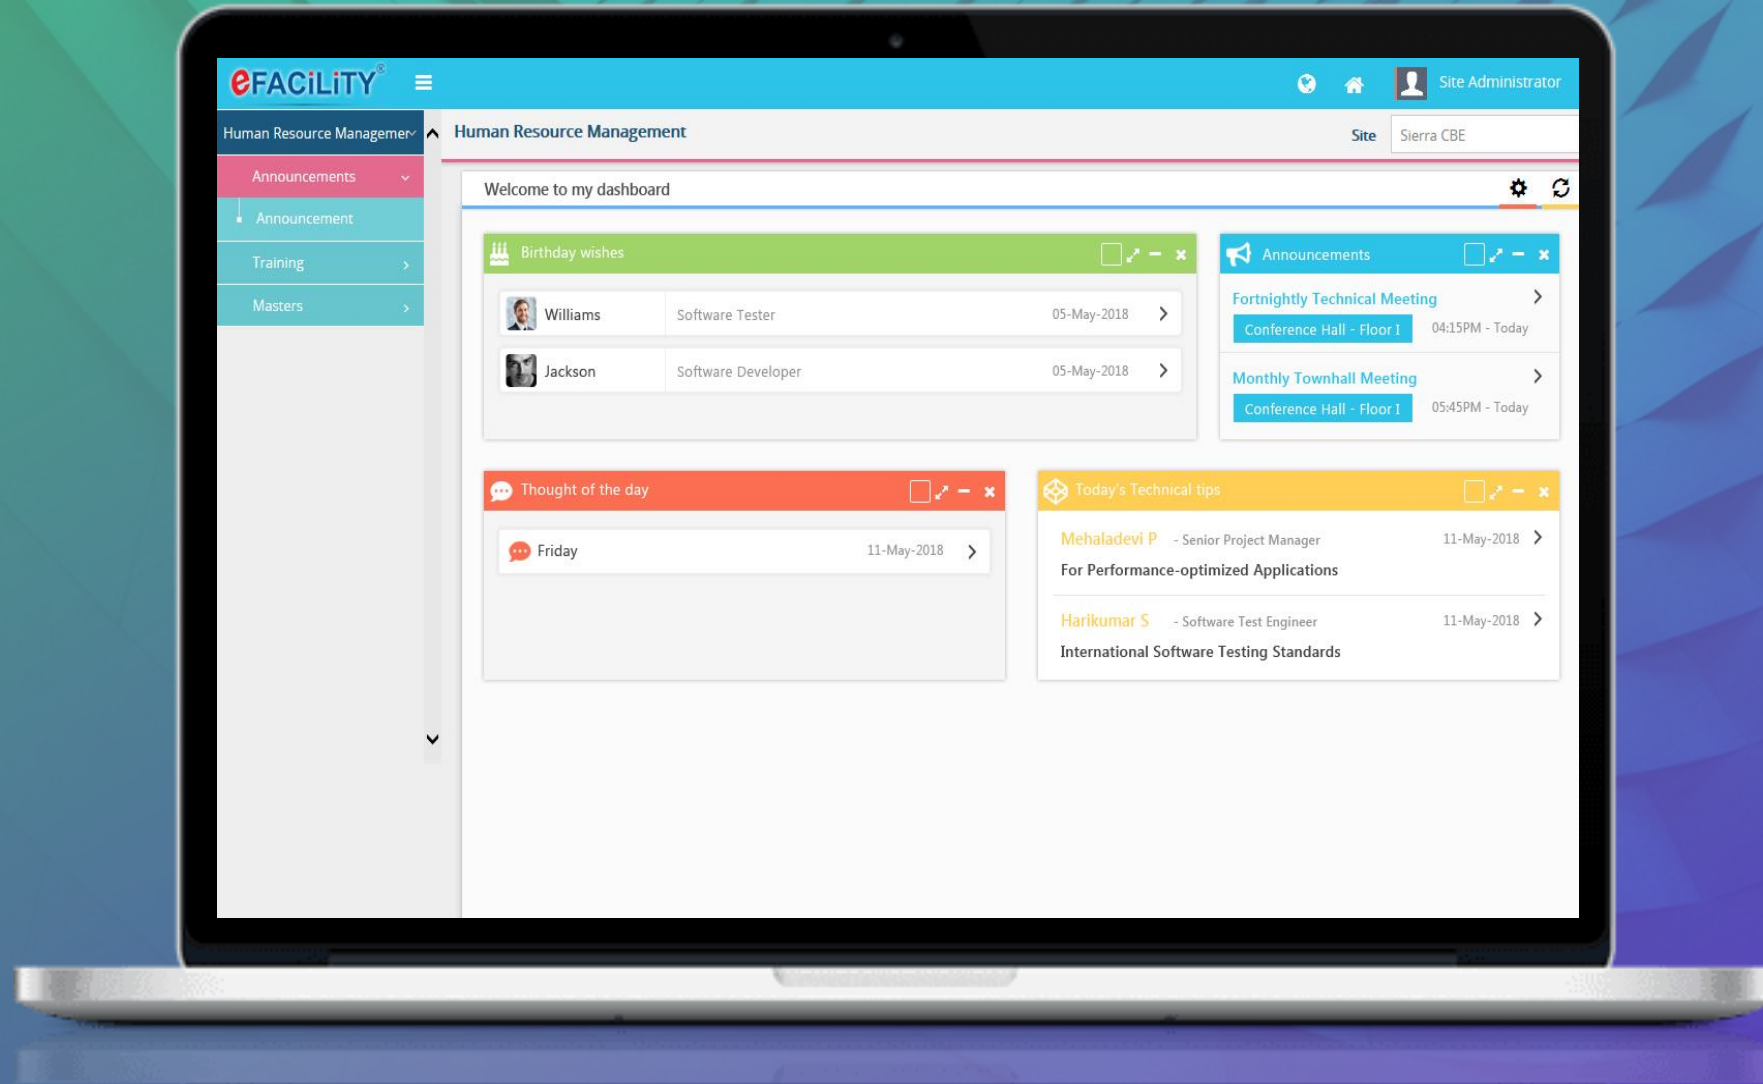

EMPLOYEE PROFILE / DATABASE CREATION

- Official details
- Family & dependent details
- Applicable roles
- Qualification
- Employment history
- Promotion history
- Transfer history
- Suspension history
- Upload certifications / Identity documents

TALENT MANAGEMENT

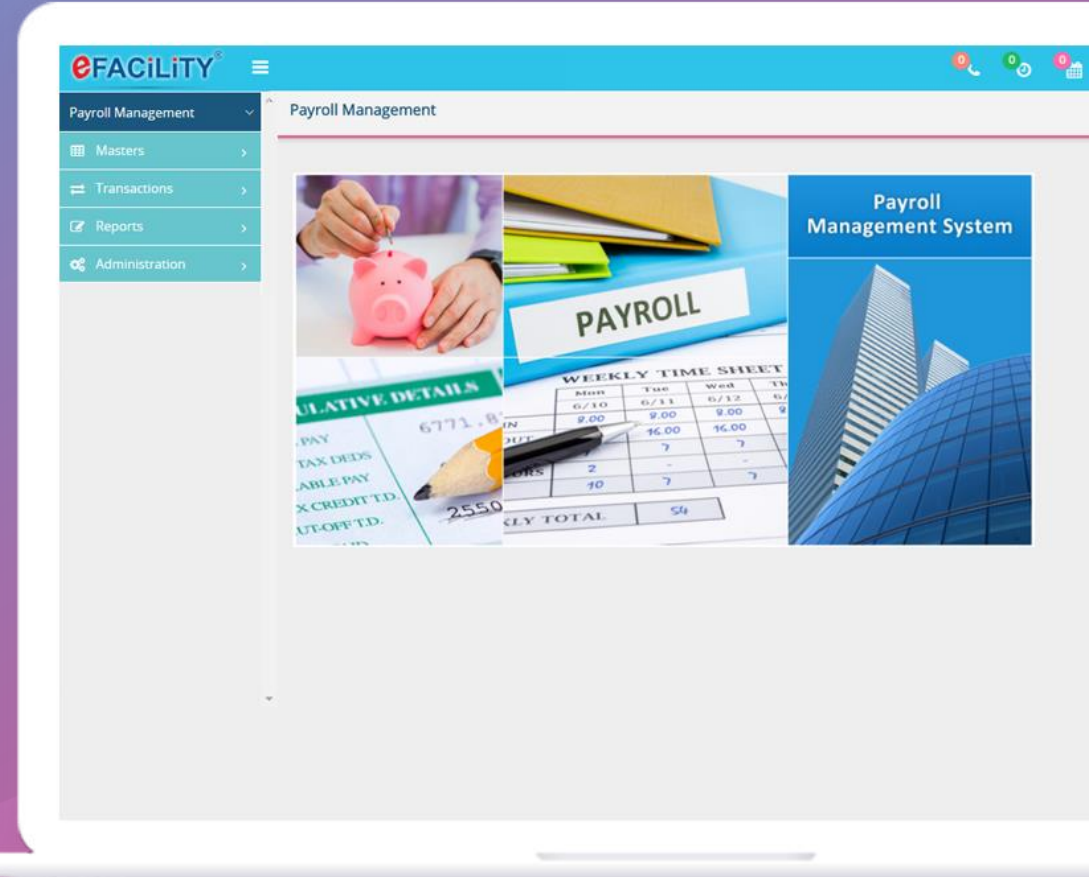

- Employee wise skill matrix
- Certificate details with expiry tracking
- Training with expert level monitoring

HUMAN RESOURCE MANAGEMENT SYSTEM

COMPREHENSIVE SOLUTION FOR PAYROLL PROCESSING

Configurable pay periods & pay structures for managing both contract & permanent employee payroll in a hassle-free, automated fashion

PAYROLL MANAGEMENT SYSTEM

Define Earnings / Deductions pay structure, formulas and calculations

Employee emoluments, Salary hold / release can be seamlessly processed

Predefined salary transfer instructions to bank

Integration with Time & Attendance Systems (TAS) & Cafeteria Management Systems (CMS)

Customized report generation options for in-depth analysis and improvements

KEY FEATURES

- Configurable pay structure for each employee & employee type
- Configurable pay periods, payment cycles
- Track Loan / Salary advances
- Handling of employee incentives
- Calculation of employee increments while maintaining increment history
- Provision for uploading documents for TDS calculation with an approval mechanism
- Automatic tax payable calculation
- Export reports like Pay Book, Bank Advice, Payslip, Loan Ledger, etc.

TRACK AND MANAGE ALL TRAVEL-RELATED REQUESTS

Simplify travel requests management in corporate travel desk, and hassle-free management of end-to-end travel booking, with cost approval workflows

TRAVEL REQUEST MANAGEMENT SYSTEM

Register Travel Requests

Booking, canceling and re-issuing options

Approval over email / mobile

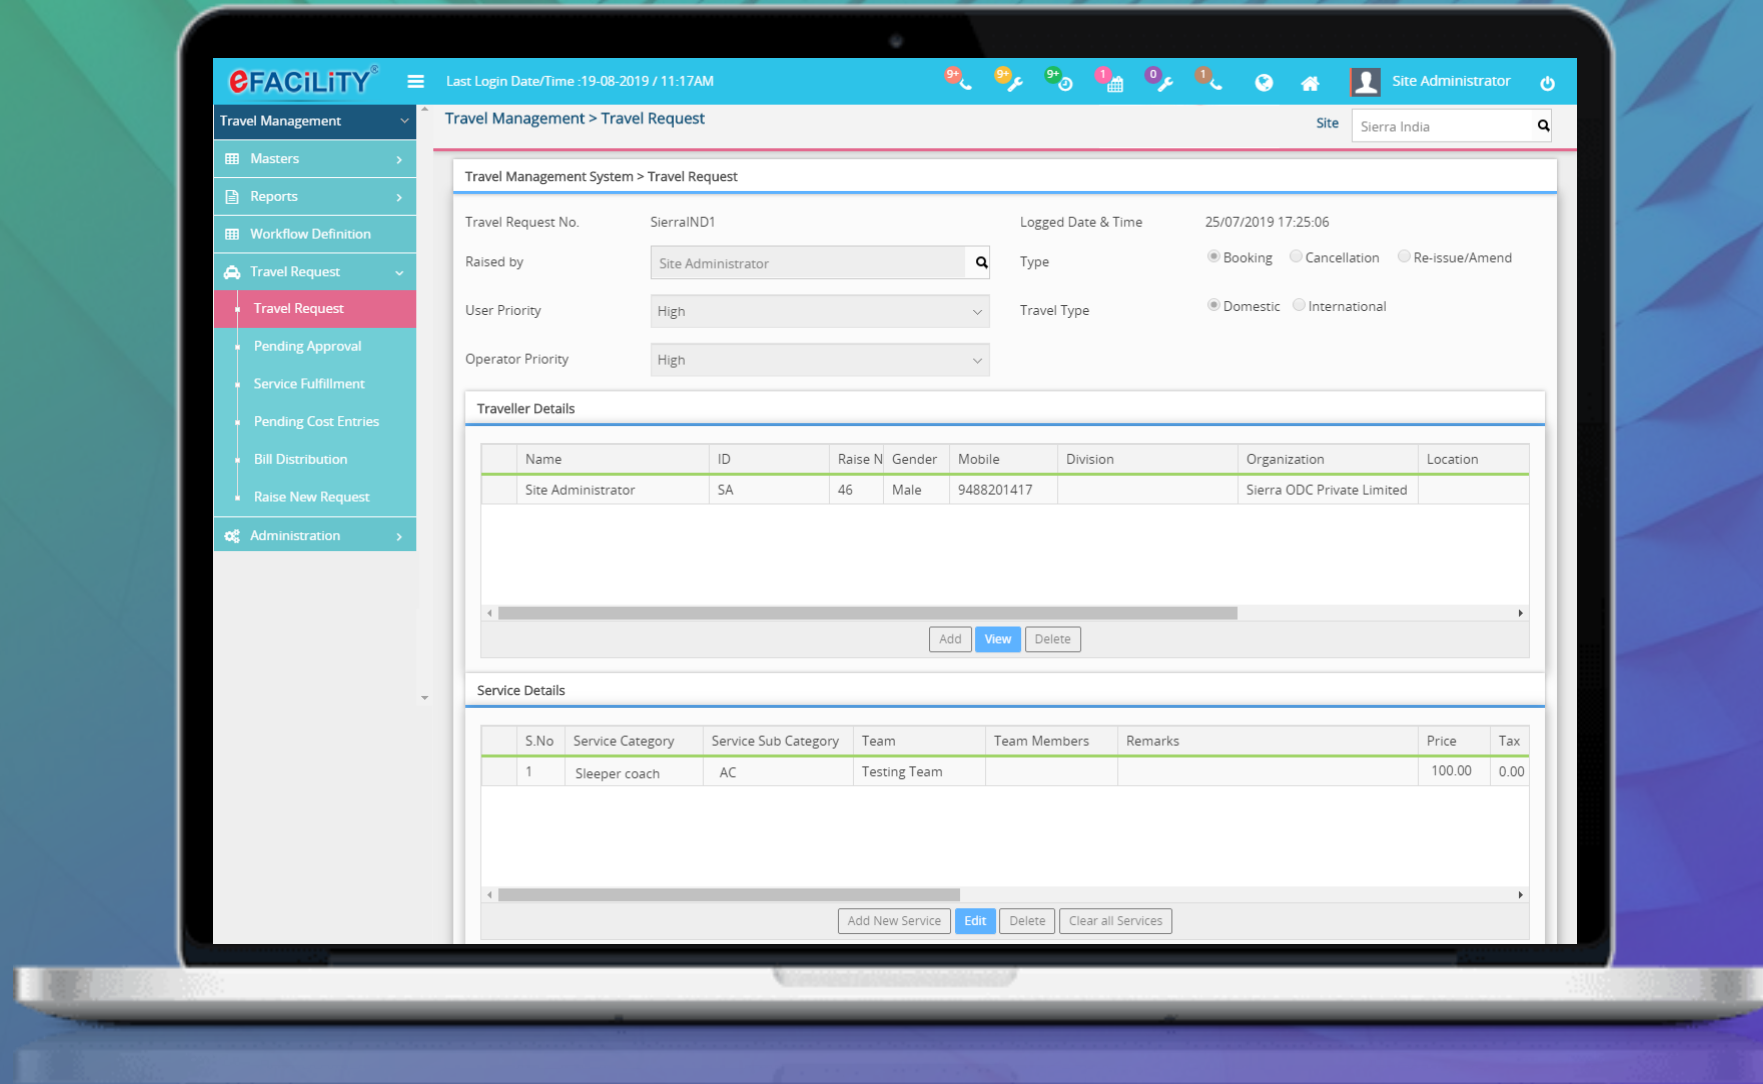

Chargeback cross-department, cross-account/project

KEY FEATURES

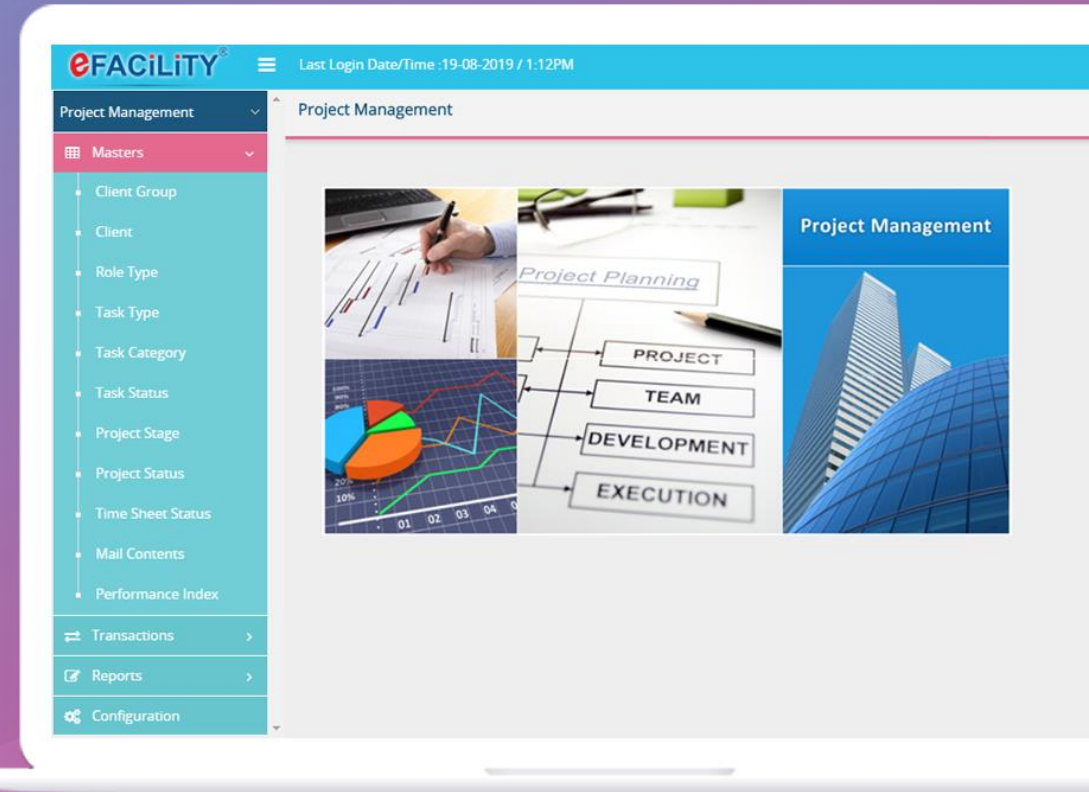

- Track travel desk operations and manage all travel-related requests
- Request, reissue / amend & cancel
- Combined requests for ticketing, visa, hotel & cab reservations, foreign currency purchase etc.
- Billing distribution across department / client / project
- Request type-wise custom fields
- Service category-wise cost estimates approval
- Configurable multi-level / multi-department approval workflow management
- Raising work orders to Vendors & Service fulfillment
- Extensive reporting capabilities and integration with financial applications

TRAVEL REQUEST MANAGEMENT SYSTEM

PLAN, TRACK & MONITOR YOUR PROJECT COSTS, TASKS AND SCHEDULES

Project planning, activity tracking, task assignment / management, timesheets reporting, track the progress of all tasks in a project, and monitor project-specific employee performance

PROJECT MANAGEMENT SYSTEM

Task identification and management

Resource allocation, schedule planning and projection

Budget, actual and projected costs

Dashboards & analytics

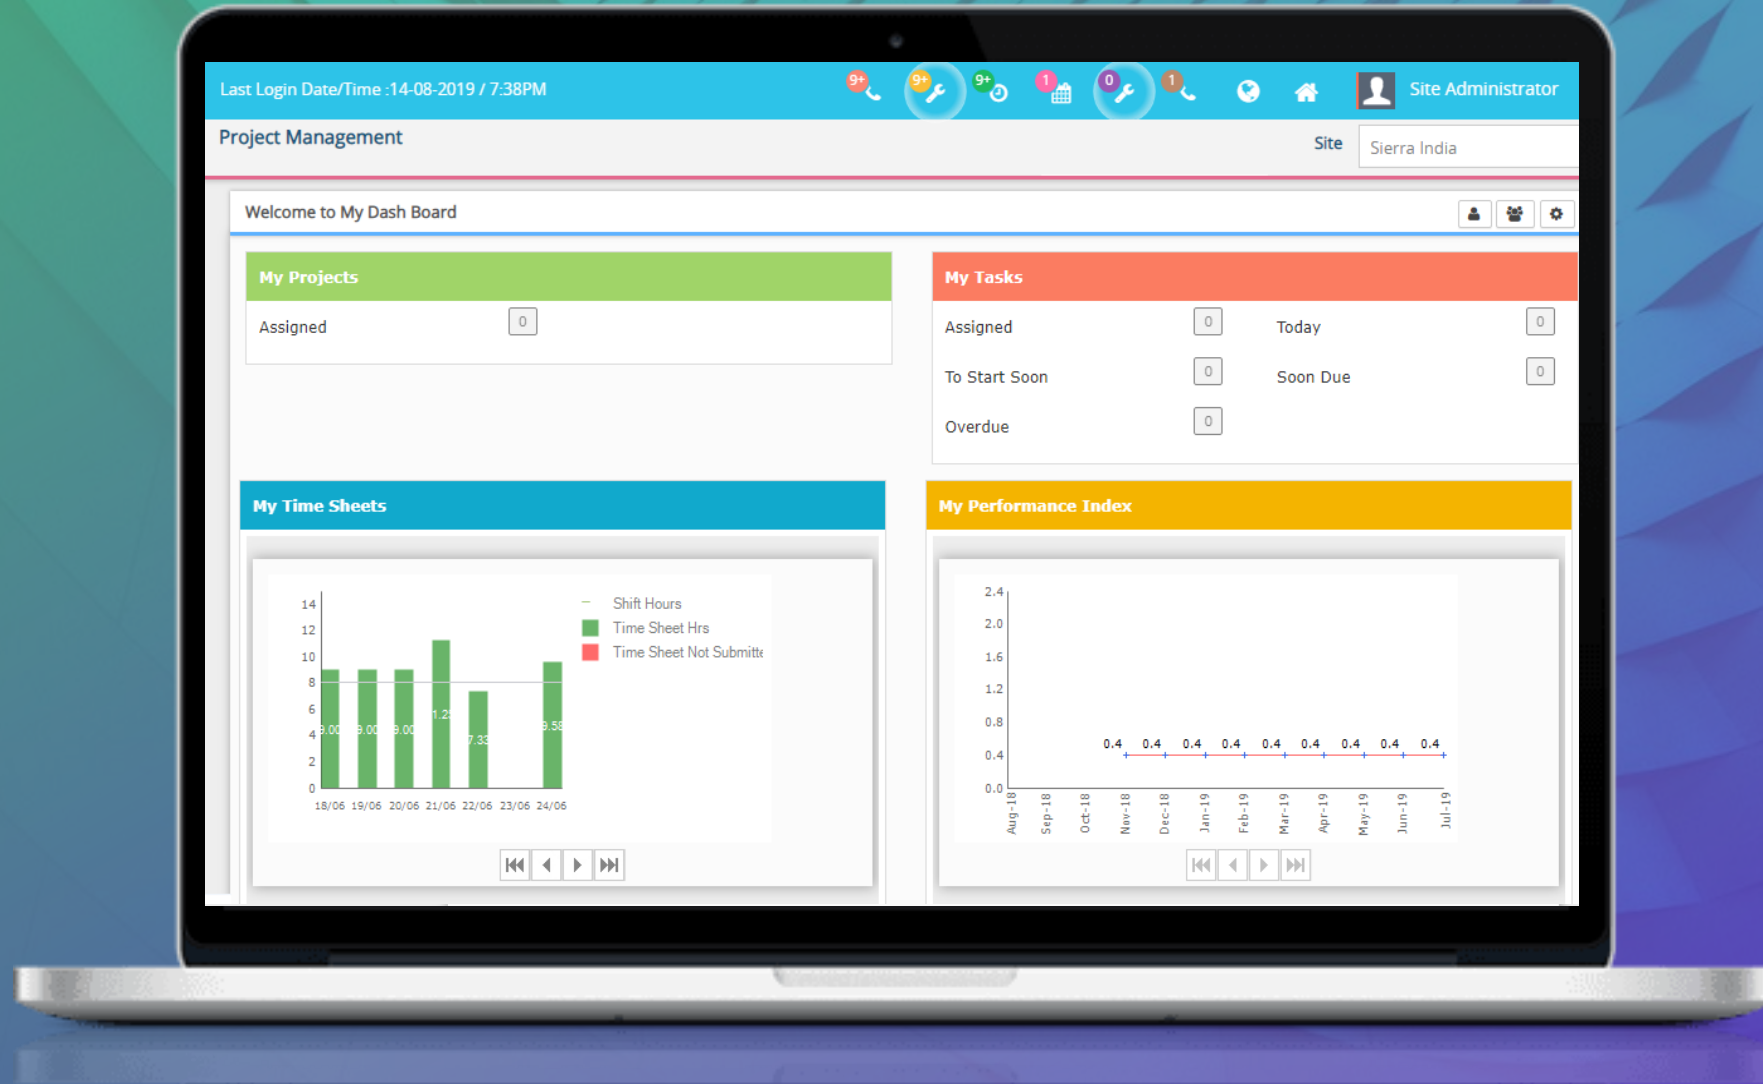

Timesheet Management

KEY FEATURES

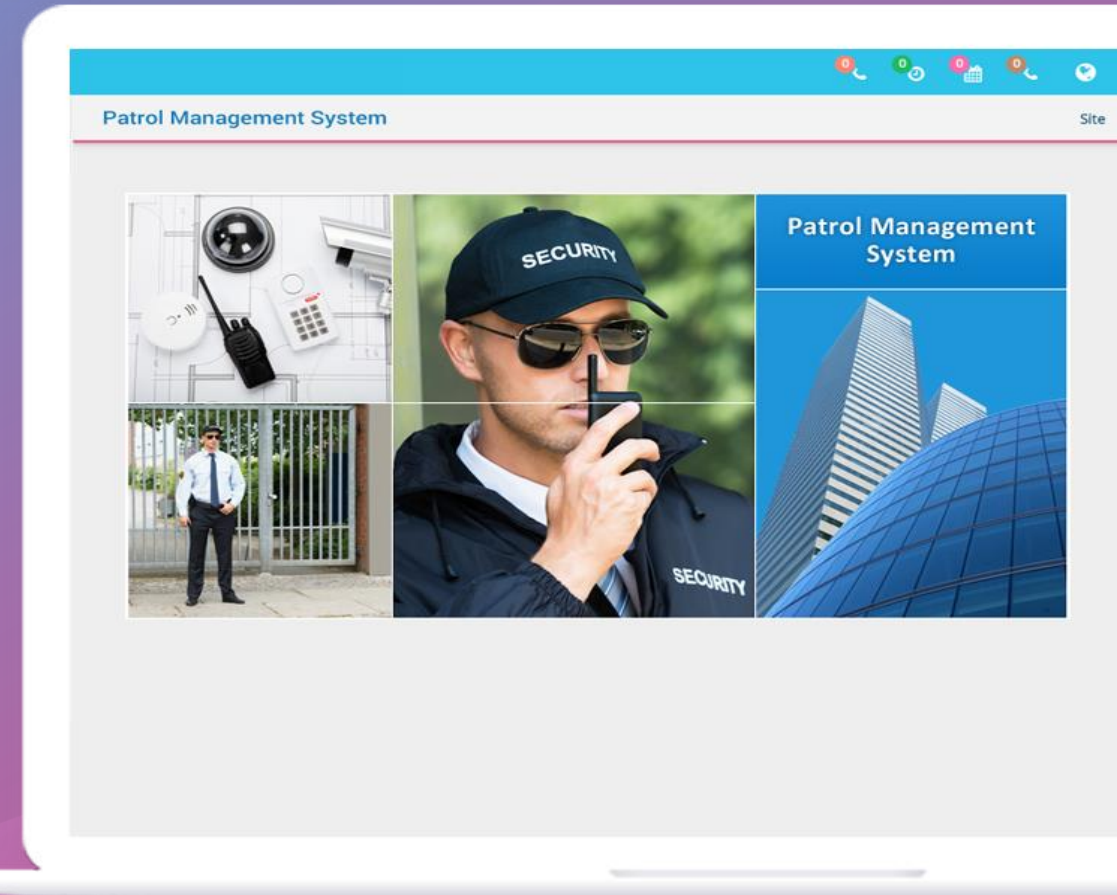

- Maintains the project details, time sheets to generate analysis report
- Project planning & tracking with a comprehensive breakdown of project details including tasks to be completed/pending, assigned team member for a particular task and the time required to complete the tasks
- Sharing and collaborating on documents, calendars and contact lists
- Review of project status - The project status can be viewed instantly with hours consumed so far and remaining project hours
- Dashboard view of task summary, current overrun and projected overrun
- Allows data to be exported to text files, spread sheets
- Configurable mail setting for weekly expected time shortage, time sheet submission & daily expected hours
- For both project and non-project tasks, provision to track utilized hours and balance hours against each employees

PROJECT MANAGEMENT SYSTEM

ROUTE ASSIGNMENTS, PATROL SCHEDULING, INCIDENT REPORTING, EMERGENCY ALERT POINTS

A convenient and powerful software that creates patrol schedules automatically, generates multiple types of patrol reports, tracks security vehicle / officer location, assesses guard performance and enables switch between databases

PATROL MANAGEMENT SYSTEM

Assists patrol planning, report generation, shift assignment, database maintenance and hardware settings

Automatic scheduling patrol management functions and predefined locations can be controlled based on actual time

Improves security and scanning of checkpoints through NFC and BLE using low cost android devices

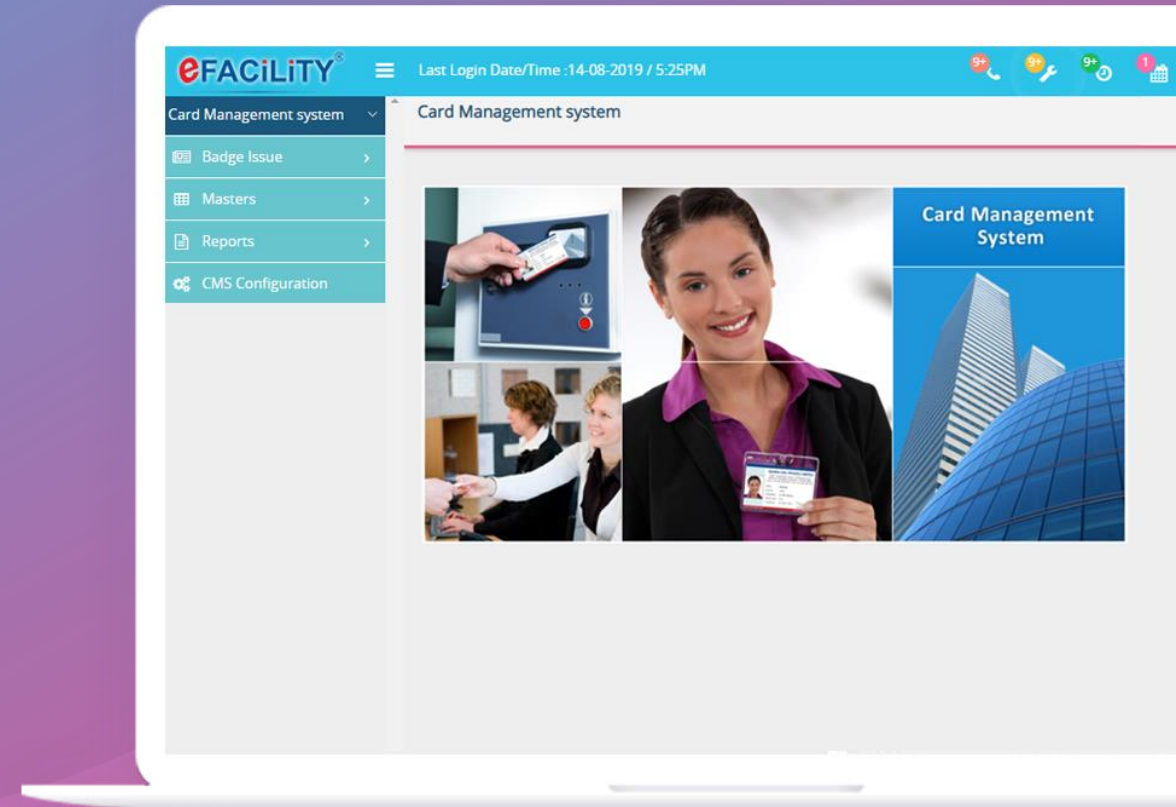

KEY FEATURES

- Shift assignment
- Patrol check point
- Patrol routes and frequency
- Patrollers / Guards Clock-In, Clock-Out terminals
- Daily patrol route assignment
- Patrol history
- Access control system integration
- Dashboard / Reports
- Patrol score summary
- Patrol Management – Mobile app
 - ✓ Clock-In via Scanning NFC, BLE & RFID, Barcode & QR code
 - ✓ My route
 - ✓ Scan checkpoints
 - ✓ Patrol history
 - ✓ SOS / Emergency alert

CREATE, ISSUE & TRACK DAILY VISITORS, BADGES AND PASSES

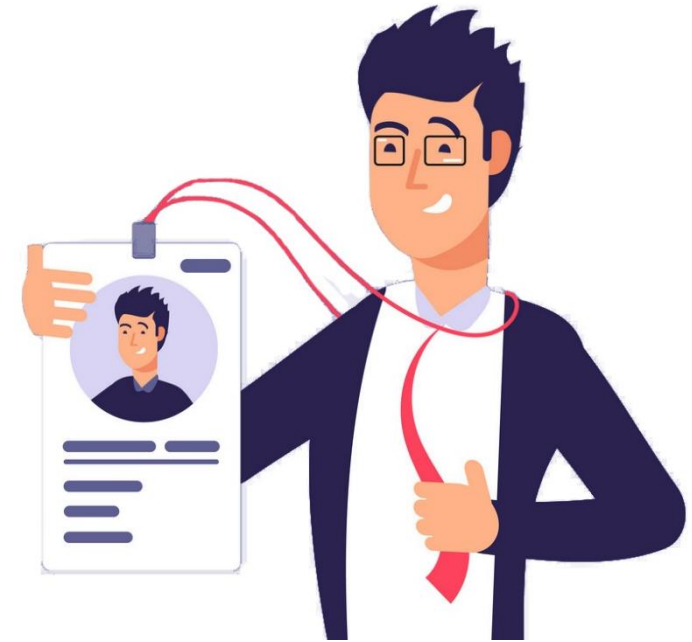

A system that manages the creation, issuance and tracking of badges and passes to employees, contractors, daily visitors like drivers of employees, etc.

CARD MANAGEMENT SYSTEM

Register and issue badges / passes to employees, contractors, temporary staff and drivers

User-defined badge templates for designing and printing

KEY FEATURES

- Temporary issue of badges
- Tracking expired badge / passes with automated alerts
- Registry of issued, expired badges and badges nearing expiry
- Auto-update of employee badge / passes in the user profile

MANAGE ALL FACILITY / EQUIPMENT DRAWINGS & DOCUMENTS

A digital file management tool to store, track and manage drawings, documents, pictures, manuals, software, etc., associated with the facility/building systems and equipment

FILE / DRAWING MANAGEMENT

Stores, maintains and manages floor plans, equipment drawings, building plans, technical drawings, wiring diagrams, network diagrams, etc.

Supports all types of files including DWG, BMP, JPG, PDF, DOCX, XLSX, etc.

Provision to upload any Facility / Equipment-wise drawings and documents

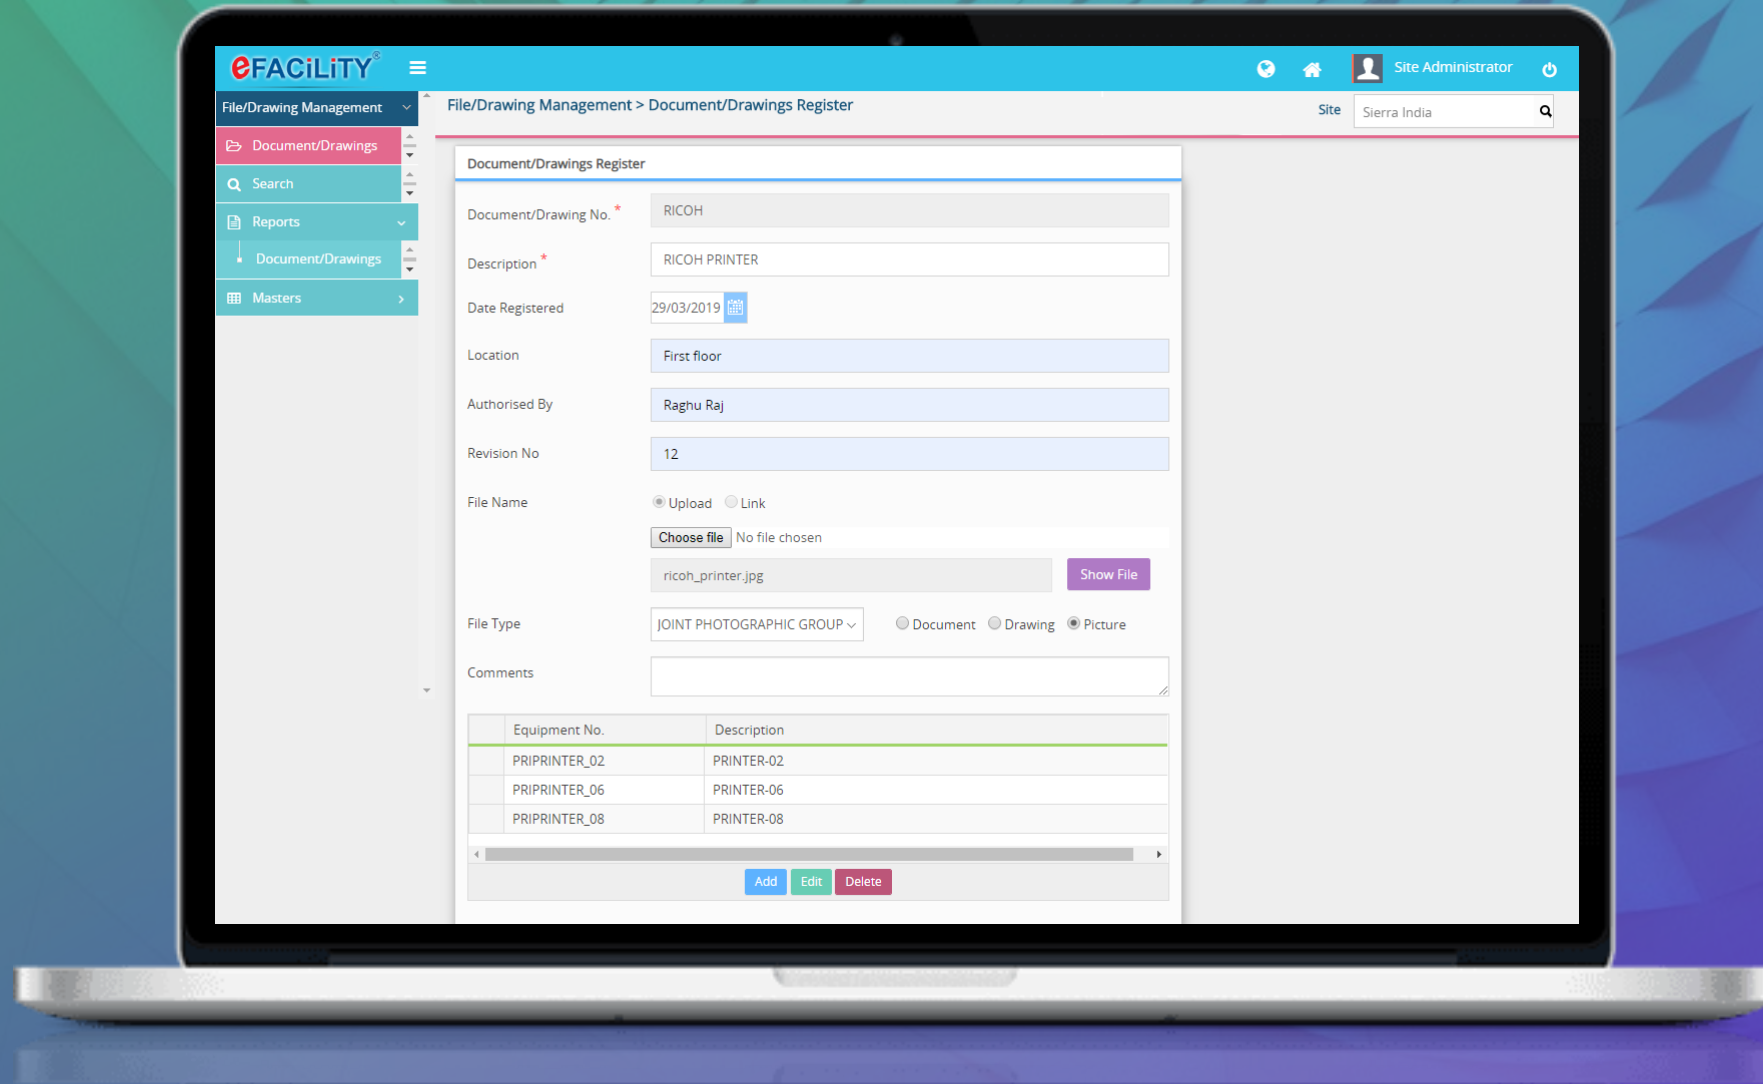

Detailed searching options for easy file access

KEY FEATURES

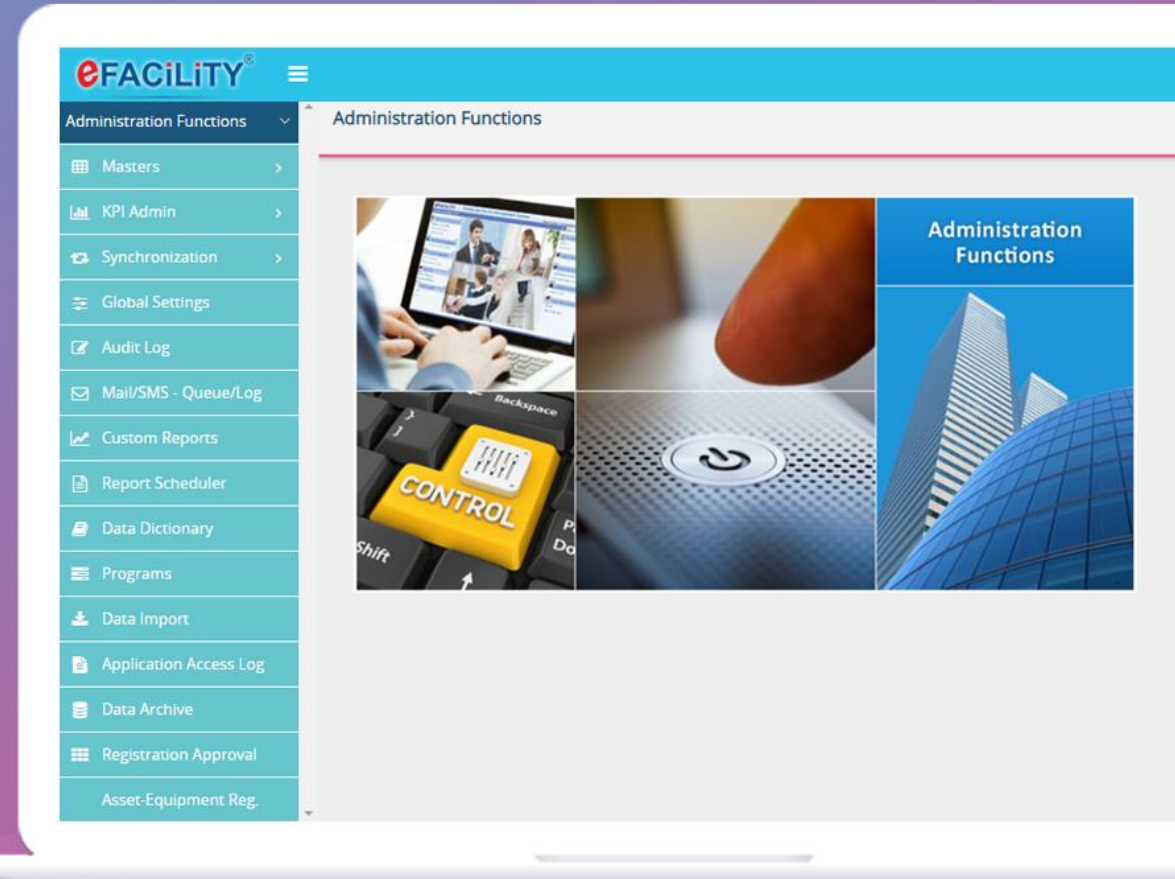

- Multiple drawings and documents for each entity
- Secured access
- Identify and retrieve the documents quickly
- Uploaded files can be viewed in both Asset equipment register and File / Drawing management module
- Privileged users can create / view / download / modify the files
- Detailed search options for searching based on facility, equipment, level, manufacturer, type of file, etc.

FILE / DRAWING MANAGEMENT

STREAMLINE THE COMPLEXITY OF ADMINISTRATIVE TASKS

Comprehensive administration functions to manage the various configuration parameters, system integration settings, lookup-lists, etc.

ADMINISTRATION FUNCTIONS

Complete tracking ability that allows administrators to enable / disable audit trails at each table level and column level

Centralized control all information that are common to avoid duplication

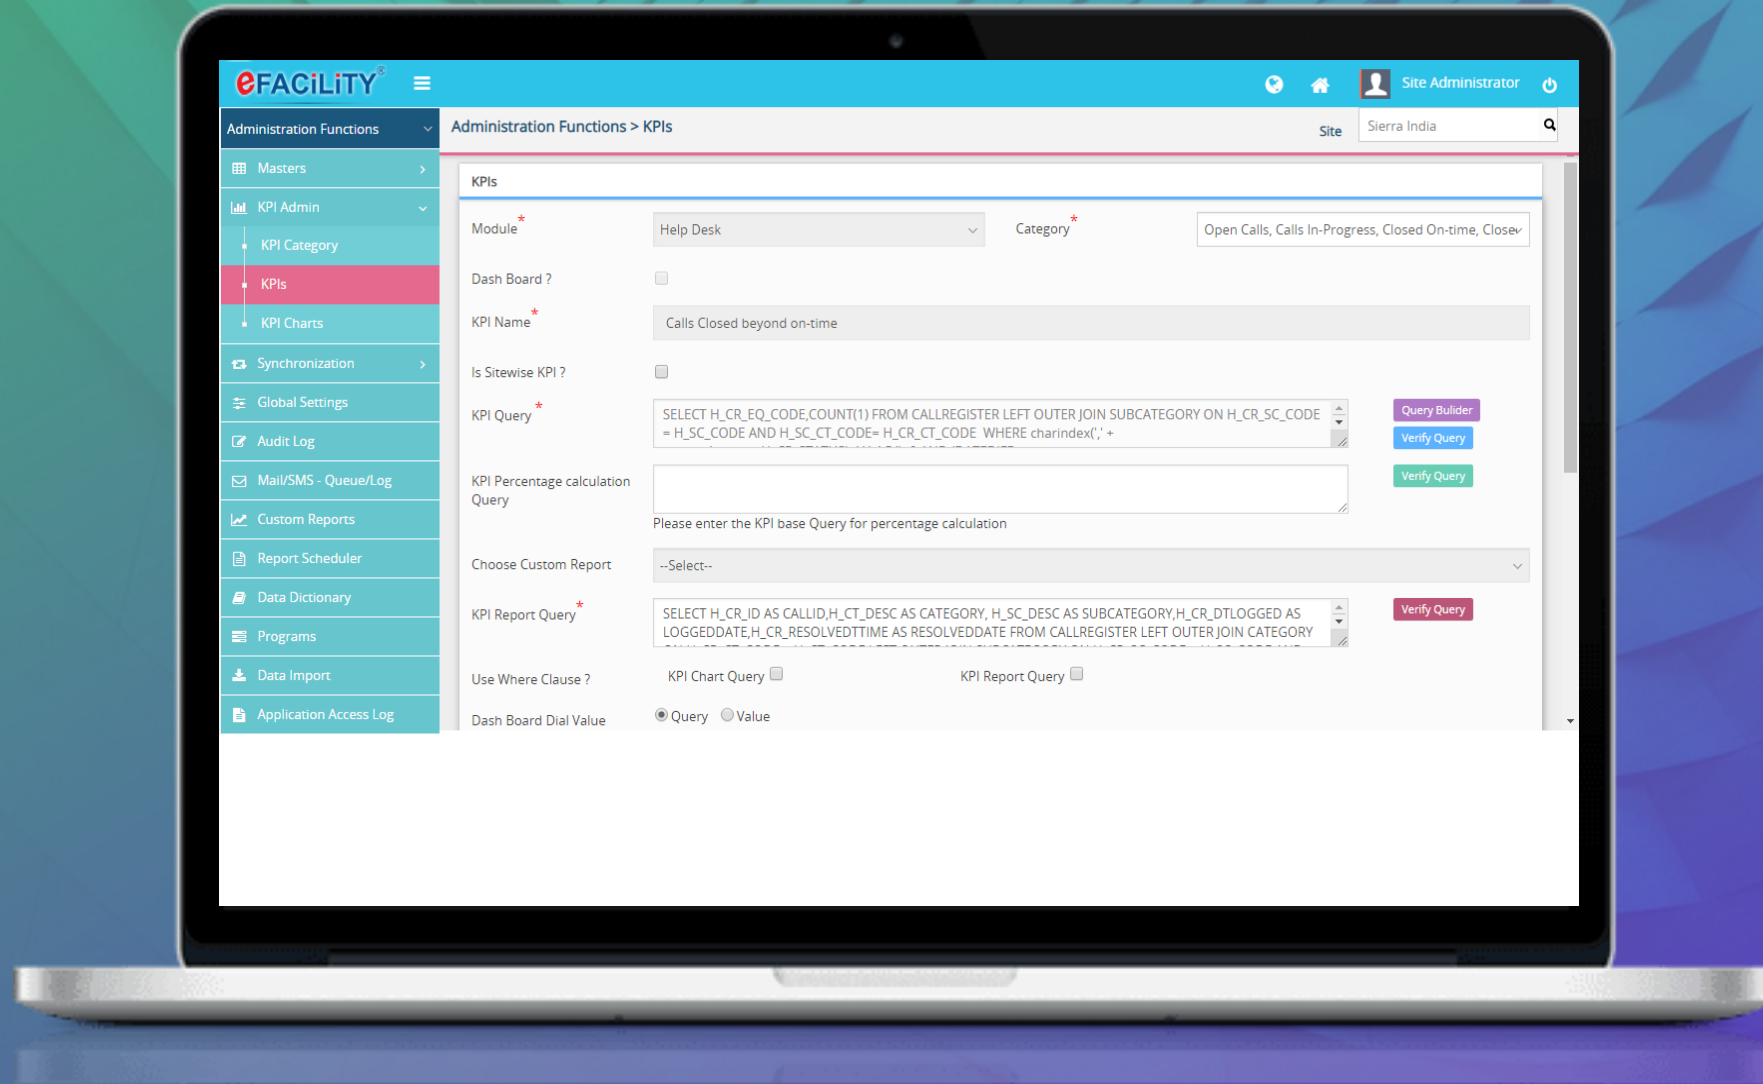

Ensures higher security levels to data through security policy management

KEY FEATURES

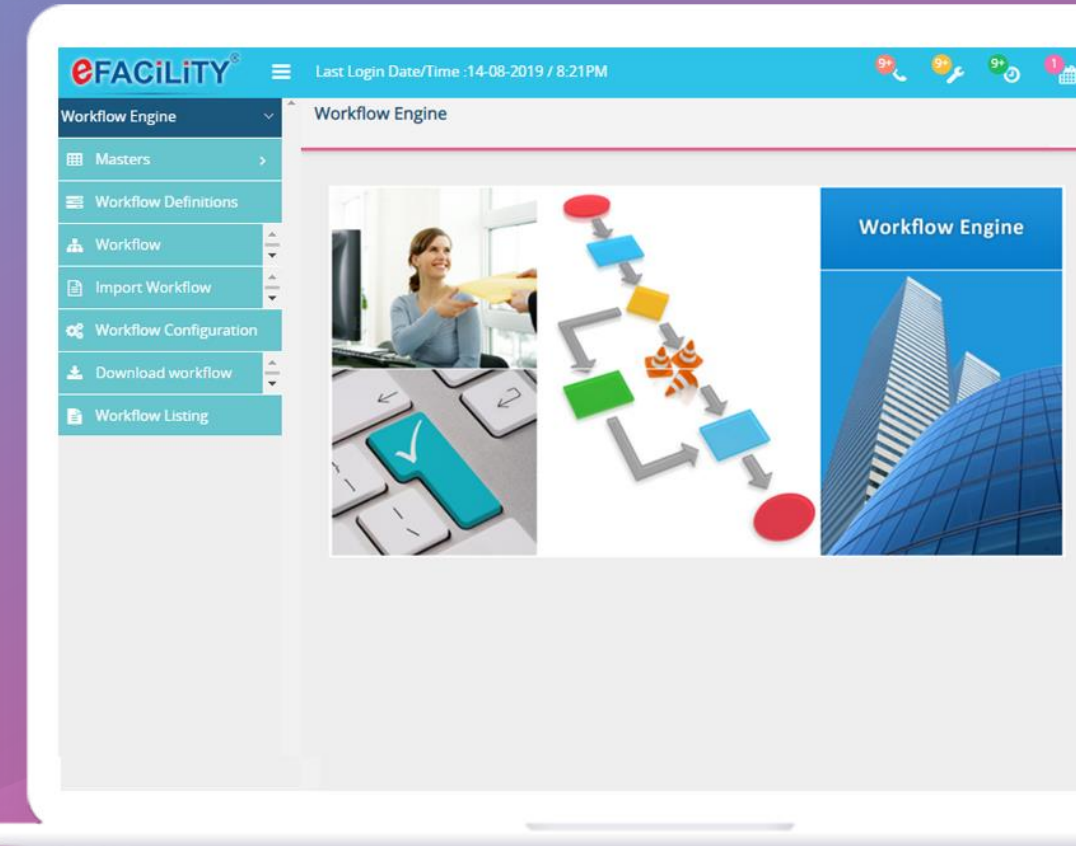

- Supports multiple sites implementation using a central installation
- Globalized application is available in several languages
- Supports Microsoft Active Directory, Oracle Single-Sign-on, LDAP, OneLogin, etc., to provide integrated security and controls
- Custom KPI builder & report generation capabilities
- Application access log to monitor user logins
- View any location data quickly by selecting the location / site
- Site-wise concept for multiple sites implementation using a central server
- Encrypted to ensure data security during data transmission through a network

ADMINISTRATION FUNCTIONS

IMPLEMENT COMPLEX WORKFLOWS SPECIFIC TO YOUR PROCESSES

A full-fledged workflow management tool for administrators to implement complex workflows involving multi-level approvals, rule-based branching to all eFACiLiTY® modules/functions

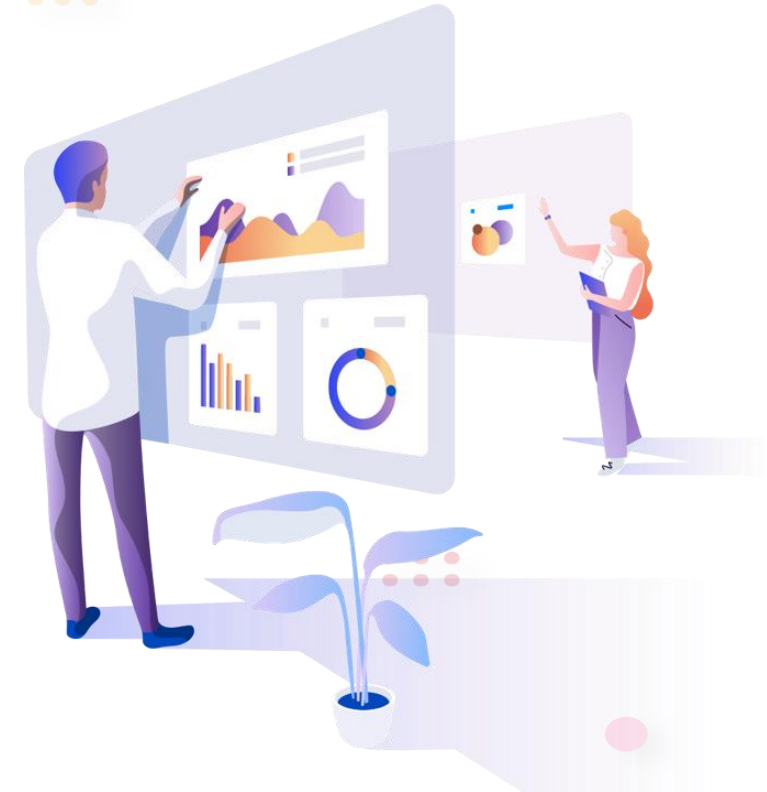

WORKFLOW ENGINE

Setup complex workflow rules and logic as per needs

Routing of workflows based on user actions

Auto reminders on pending approvals

Customizable email messages

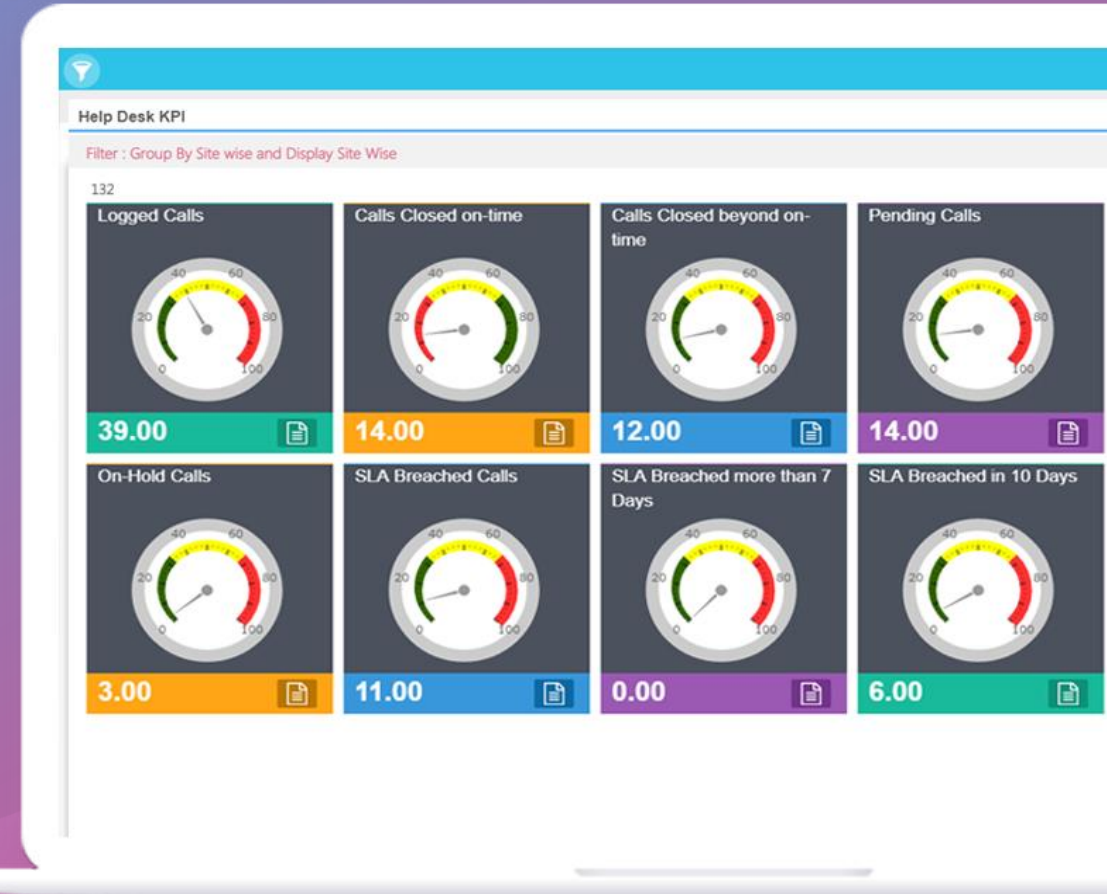

KEY FEATURES

- Setup and manage complex work flow rules and logic to manage complex and diverse business processes
- Routing of workflows based on user actions like approvals, rejections and update of key information
- Easily configurable approval / request / email / messages
- Reminders on pending approvals
- Enabling remote approvals within / outside network
- Supports web service calls, WCF calls, stored procedure calls, SQL query builder etc.
- Detailed tracking of all operations maintaining audit log / history

GENERATE A PLETHORA OF BUSINESS-SPECIFIC CUSTOM REPORTS

Generate custom reports, graphs, dashboards that can be displayed across multiple sites & organizations

Create your own KPIs, reports and dashboards

Drilldown provision to view detailed reports

Pivot grids for more detailed analysis

Link custom reports, KPIs to menu system

KEY FEATURES

- Standard KPIs – Preventive Maintenance Backlog, MTBF (Mean Time between Failures), Overdue PM Work Orders, Maintenance Cost variance etc.
- Site-wise KPIs
- Define custom KPIs that can be linked to menus and privileges
- Auto-refresh to show latest data
- Gauges, Bar charts, Pie-charts, etc.
